

# AXIS FLEXI CAP FUND

(An open ended dynamic equity scheme investing across large cap, mid cap, small cap stocks.)

## About the Fund

Axis Flexi Cap Fund seeks to invest across the market cap spectrum in high conviction ideas with improved risk adjusted return characteristics. The fund manager looks for stocks that are expected to report faster growth relative to the benchmark.

Invests across market cap spectrum Typically, 50-100% in Large cap and 0-50% in Mid & Small cap

Capital Appreciation over medium to long term

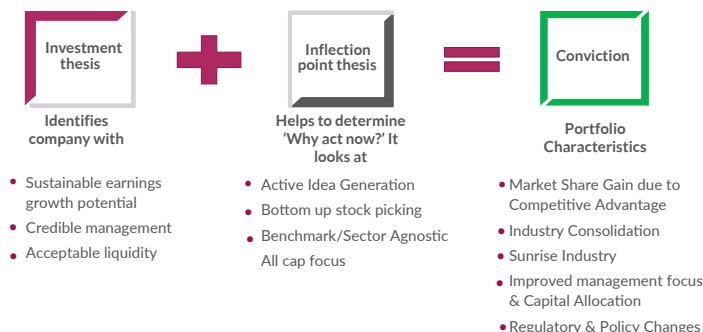

Aims to look for stocks that are at inflection point

\*The above framework is broadly indicative and the fund manager may change the framework depending on the market conditions

## Why Axis Flexicap Fund?

- Access to entire market spectrum and opportunities to focus on fast growing sectors
- Stocks are selected in the portfolio based on their ability to grow earnings on a sustainable basis while maintaining a highly liquid and risk managed portfolio.
- Uses bottom-up stock selection process (Focus on appreciation potential of individual stocks from a fundamental perspective)

### Inflection point Investing: Anchors for company selection

## Fund Manager Views

- ▶ As expected, global economy focus has shifted to evolving geopolitical tensions, the impact of policy changes and tariff implementation. We believe at this juncture; impact of the global events is highly unpredictable. Portfolio tilt is towards companies with higher dependence on domestic markets/consumers and expanding addressable market opportunities, could emerge as potential winners in the near future.
- ▶ GST reforms are expected to support consumption at the same time it will drive formalisation further. The fund focus remains on bottom up business fundamentals along with macro alignment. As medium to long-term growth is expected to be driven by both top-down themes such as manufacturing, defence, and energy transition and bottom-up momentum in services and consumer discretionary. Fund maintains sizable allocations across these areas, guided by bottom-up stock selection.
- ▶ Fund tilts towards domestically focused companies with expanding market opportunities, given rising global friction and tariff uncertainty.
- ▶ The scheme has maintained a larger allocation to the large cap segment with a dynamic allocation to the mid and small cap segment. Even though the valuation in mid and small cap segment remains high, we will continue to be selective towards midcap and small cap allocation.
- ▶ The tilt of the fund in favour of growth and quality remains unchanged and is visible in the portfolio growth estimates.

The figure displays two semi-circular riskometer charts side-by-side, comparing the risk levels of a 'Fund' and the 'NIFTY 500 TRI' benchmark.

**Fund Riskometer:** The chart is divided into five segments representing risk levels: Low Risk (green), Low to Moderate Risk (light green), Moderate Risk (yellow), Moderately High Risk (light orange), and High Risk (orange). The needle points to the 'Very High Risk' segment (red), indicating that the risk of the scheme is very high.

**NIFTY 500 TRI Riskometer:** The chart is divided into five segments representing risk levels: Low Risk (green), Low to Moderate Risk (light green), Moderate Risk (yellow), Moderately High Risk (light orange), and High Risk (orange). The needle points to the 'High Risk' segment (orange), indicating that the risk of the benchmark is very high.
