

AXIS ARBITRAGE FUND

(An open-ended scheme investing in arbitrage opportunities)

About the Fund

An open-ended scheme investing in arbitrage opportunities

Captures the cash-futures spread in the equity market without getting affected by the market direction

Low volatility absolute return strategies

Invests minimum 65% in the hedged equities[^]

Suitable for investors looking for parking their short term money

[^]This is current investment strategy which may change from time to time. Investors must refer to Scheme Information Document for Asset Allocation pattern and investment strategies in various scenarios

What is Arbitrage?

- › Buying and selling of an asset in two different markets simultaneously to earn a price differential is called Arbitrage
- › This price differential is called as spread or basis
- › By the expiry of contract, the basis tends to zero and the futures converge to spot irrespective of the market movements
- › Hence it helps to capitalize on the market inefficiencies and generate profits for the investors

Illustration: The below chart on LHS depicts the spot and future price movement for one month contract. While the chart on RHS explains how the spread between the future and the spot converges to zero by the expiry of the contract.

The above graph is used to explain the concept and is for illustration purpose only and should not be used for development or implementation of an investment strategy. Past performance may or may not be sustained in future.

Portfolio Characteristics*

*Based on the debt portion of the portfolio as on date given above. This should not be taken as an indication of the returns that may be generated by the fund and the securities bought by the fund may or may not be held till their respective maturities. The calculation are based on the invested corpus. In case of semi annual YTM, it will be annualised.

Note: Portfolio allocation, maturity & duration is based on the current market conditions and is subject to changes depending on the fund manager's view of the markets.
