

# AXIS CHILDREN'S FUND

(An open-ended fund, for investment for children, having a lock-in of 5 years or till the child attains age of majority (whichever is earlier)  
(Formerly known as Axis Childrens Gift Fund)

## About the Fund

- An open ended fund, for investment for children
- Investments can be made only in the name of a minor child (Child should be less than 18 years of age on the date of investment)
- 5 year lock-in or till the child attains age of majority (whichever is earlier)
- Investors/applicants could be parents, step-parents or grandparents, adult relatives, friends (including NRIs & PIOs) or HUF

Fixed Income  
Strategy – 20-35%;  
Equity strategy – 65-80%

Flexibility to invest in the entire  
range of debt instruments across  
the yield curve

Focus on building a  
diversified portfolio of  
strong growth companies

Active management with  
bottom-up stock  
selection strategy

\*The above framework is broadly indicative and the fund manager may change the framework depending on the market conditions

## Why Invest?

- Goal planning benefit: It is a great way to plan for your child's education or any other goal that he / she wants to pursue.
- Benefit of long-term investments: With the option of a longer holding period, you can have more time for the money to grow.
- Asset Allocation Benefit:
  - Money is invested in equities, therefore it holds great potential for long-term wealth creation.
  - Since a portion of money is also invested in debt & money market instruments, it gives the much-needed cushion in terms of relatively less volatility.

## Fund Manager Views

- As we enter 2026, markets reflect slow recovery from a challenging 2025. Equities regained their previous highs in 2025 following correction seen in 2024, while valuations, though off their peaks, remain in line with long-term averages. Importantly, India's valuation premium over emerging markets and global peers has narrowed considerably and appears to have stabilized. The earnings cycle seems to have bottomed out, with signs of a gradual recovery ahead.
- Domestic consumption demand is expected to remain buoyant, driven by premiumization trends, rural recovery supported by agricultural activity, and fiscal support from state governments. These factors collectively create a favorable backdrop for sustained economic expansion. The resolution of tariff issues between the US and India can help accelerate recovery.
- The fund is pro-cyclical and earnings focused towards themes such as Banks, healthcare, power equipment & utilities, travel and select discretionary consumption.
- The Government announcement on GST cuts has improved sentiment in discretionary consumption stocks. We have been steadily increasing exposure to discretionary consumption stocks such as retail, jewellery, travel/tourism etc
- On the debt side, Since February 2025, we have been steadily reducing portfolio duration, shifting away from long-duration strategies toward accrual-focused approaches. This year, we see accrual and selective tactical duration as the dominant themes, particularly in long bonds and state development loans (SDLs).
- Our preferred positioning includes 2-year AA-rated corporate bonds for steady accrual and long-tenor government securities for duration plays, offering a combination of consistent accrual and potential upside.
