Investment strategy

- › The fund will decide basis macro and market conditions best strategies to invest into, accordingly aim to allocate in best funds across fund houses
 - Investments will be restricted to top ten Debt AMCs. For other AMCs, we have internal maximum limit (with exception for temporary parking solutions).
 - We aim to have universe coverage of majority of underlying scheme (Debt) investments.
 - Funds will be selected based on AUM size, lower expenses, easy entry and exit barriers and performance track record.
- › The fund currently aims to build a core portfolio with a duration of 3-6 years. However, due to its active management approach, the fund may adjust its duration based on the prevailing macroeconomic environment.
- › As we expect surplus banking liquidity, lower supply of corporate bonds and CDs due to slowdown and delay in implementation of LCR guidelines along with attractive spreads and valuations, we have now built positions in the corporate bonds segment.
- › As of Sep end, underlying debt schemes have 100% AAA/SOV exposure.

Why invest

- › Better FM diversification & lower single manager risk in case of credit events
- › Ability to navigate credit cycles and leverage duration strategies
- › Better post-tax returns over a holding period of 24 months
- › Ease of rebalancing portfolio ensures effective execution of market view
- › No tax impact to investor when a Fund of Funds redeems from one fund to another.
