

AXIS GILT FUND

An open-ended debt scheme investing in government securities across maturity. A relatively high-interest rate risk and relatively low credit risk.

About the Fund

Axis Gilt Fund is an open ended debt scheme which aims to create a liquid vehicle to invest in government securities market. The fund tactically allocates assets in Gsec securities.

very low credit risk

Invests across the Gsec curve

Actively managed

Advantages of Axis Gilt Fund

Axis Gilt Fund invests in government securities to generate return from sovereign securities issued by the Central Government and State Governments; thus has a relatively low credit risk.

The fund may also invest in bonds backed by the central government or respective state governments.

The fund manager strives to enhance portfolio returns by actively managing interest rate risks arising due to market

Rating Allocation

Asset Allocation

Residual Maturity (in yrs)

Annualized Portfolio YTM (in %)

Note: Current portfolio allocation, maturity & duration is based on the current market conditions and is subject to changes depending on the fund manager's view of the markets.

Portfolio Characteristics

*The yield to maturity given above is based on the portfolio of funds as on date given above. This should not be taken as an indication of the returns that may be generated by the fund and the securities bought by the fund may or may not be held till their respective maturities. The calculations are based on the invested corpus. In case of semi annual YTM, it will be annualised.
