

AXIS RETIREMENT FUND - AGGRESSIVE PLAN

An open-ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier)
(Formerly known as Axis Retirement Savings Fund - Aggressive Plan)

About the Fund

The fund aims to help investors with their retirement planning. It aims to generate long term capital appreciation by investing primarily in equity and equity related instruments, along with regular income through investments in debt and money market instruments. Within equities and fixed income, the portfolio would be actively managed to optimize returns within the respective asset class.

Aggressive Plan

Ideal for young investors in the early stages of their careers

Equity exposure 65-80%.
Rest spread across other asset classes[®]

Default retirement age: 58 years. Please refer to SID for detailed investment strategy and asset allocation

[®]Other asset classes include Debt & Money Market Instruments, Gold ETF and REITs & InvITs.

[®]The above framework is broadly indicative and the fund manager may change the framework depending on the market conditions

How does Asset Allocation benefit investor portfolios

- **Lower Correlation among asset classes**

When equity and debt don't move in the same direction, the risk quotient is lower

- **Periodic Rebalancing**

Lowers overall risk and optimizes risk, making it cost & tax efficient for investors and lower overall risks.

- **Reasonable downside protection**

Aims to limit the impact of potential losses from market downturns.

- **Benefit from active management**

Through research by fund managers to actively allocate assets.

Current Portfolio Allocation is based on the prevailing market conditions and is subject to changes depending on the fund manager's view of the equity markets.

Investment approach

› Equity

Large cap biased best ideas strategy with a bottom up approach to investing. The portfolio will be a compact portfolio of quality stocks that offer long-term sustainable growth opportunities with a competitive market advantage.

› Debt

The debt portion will be dynamically managed across duration and the credit spectrum. The fund will follow an active investment strategy that aims to generate absolute returns with the endeavor to capture opportunities across interest rate cycles by actively managing the duration and credit allocation of the fund's portfolio.

Fund Manger Views

- › While markets have rebounded from the March lows, earnings downgrades have continued so far with single digit growth in the last few quarters. However, on the positive side, the Indian economy is standing out for its relative economic stability, with several macro parameters slowly turning favourable. Rationalize GST rates could potentially boost demand for certain consumption items with low fiscal impact. The Consumption recovery & credit pickup could give comfort on earnings outlook.
- › Though concerns around tariffs persist, India has more inward-looking economy (exports to GDP 2%), should be less impacted by trade volatility, in our view, though will continue to bear the brunt of weak FII flows.
- › The fund is pro-cyclical and earnings focused towards themes such as manufacturing (EMS, China +1), healthcare, power equipment & utilities, travel and select Banks and discretionary consumption which are beneficiaries of formalization and premiumization, and also immune from global uncertainties.
- › The Government announcement on GST cuts has improved sentiment in discretionary consumption stocks. We have been steadily increasing exposure to discretionary consumption stocks such as retail, jewellery, travel/tourism etc
