Fund Manger Views

- ▶ While markets have rebounded from the March lows, earnings downgrades have continued so far with single digit growth in the last few quarters. However, on the positive side, the Indian economy is standing out for its relative economic stability, with several macro parameters slowly turning favourable. Rationalize GST rates could potentially boost demand for certain consumption items with low fiscal impact. The Consumption recovery & credit pickup could give comfort on earnings outlook.
- ▶ Though concerns around tariffs persist, India has more inward-looking economy (exports to GDP 2%), should be less impacted by trade volatility, in our view, though will continue to bear the brunt of weak FII flows.
- ▶ The fund is pro-cyclical and earnings focused towards themes such as manufacturing (EMS, China +1), healthcare, power equipment & utilities, travel and select Banks and discretionary consumption which are beneficiaries of formalization and premiumization, and also immune from global uncertainties.
- ▶ The Government announcement on GST cuts has improved sentiment in discretionary consumption stocks. We have been steadily increasing exposure to discretionary consumption stocks such as retail, jewellery, travel/tourism etc
