

AXIS RETIREMENT FUND - CONSERVATIVE PLAN

An open-ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier)

(Formerly known as Axis Retirement Savings Fund - Conservative Plan)

About the Fund

The fund aims to help investors with their retirement planning. A moderately high risk fund suitable for an investment horizon of more than 2 years. Brings stability to your portfolio by investing primarily in fixed income instruments. Offers the potential for capital growth through limited exposure to equity instruments.

Conservative Plan

Ideal for investors about to enter their retirement years

40-80% debt exposure in high quality debt instruments, 20-40% in Equity exposure.

Default retirement age: 58 years. Please refer to SID for detailed investment strategy and asset allocation

*Other asset classes include Debt & Money Market Instruments, Gold ETF and REITs & InvITs.

*The above framework is broadly indicative and the fund manager may change the framework depending on the market conditions

Why combine debt and equity?

- Equity and debt markets act counter cyclically to each other over long investment cycles.
- The risk of losing money over 1 year is much higher for equity than debt
- A combined portfolio benefits from growth potential of equity but cuts down the risk of losses due to cushion from debt.
 - Potential for higher return than debt funds
 - Lower risk of losing money as often as a pure equity oriented scheme

Data: ACE MF, Axis MF Research.

Note: Equity refers to Nifty 50. Debt refers to I-SEC Sovereign Bond Index.

Fund Manger Views

- ▶ While markets have rebounded from the March lows, earnings downgrades have continued so far with single digit growth in the last few quarters. However, on the positive side, the Indian economy is standing out for its relative economic stability, with several macro parameters slowly turning favourable. Rationalize GST rates could potentially boost demand for certain consumption items with low fiscal impact. The Consumption recovery & credit pickup could give comfort on earnings outlook.
- ▶ Though concerns around tariffs persist, India has more inward-looking economy (exports to GDP 2%), should be less impacted by trade volatility, in our view, though will continue to bear the brunt of weak FII flows.
- ▶ The fund is predominantly focused on large caps in sectors such as Banks, NBFC, Power, Telecom
