

AXIS QUANT FUND

An open ended equity scheme following a quantitative model

About the Fund

Axis Quant fund aims to leverage Axis AMC's fundamental research base and strategically use quantitative data to offer a fundamentally driven alpha strategy with an endeavour to generate consistent alpha for long term investors. The offering blends traditional research based approach with rules based criteria to identify stocks and sectors within a well-established quality framework.

Unique fundamentally driven quantitative approach

Unbiased approach to portfolio management

Aims to capture the best of Valuation, Growth & Quality parameters

Diversified across sectors and market capitalization

*The above framework is broadly indicative and the fund manager may change the framework depending on the market conditions

Investment Philosophy

- A philosophy that aims to identify Quality stocks in combination with the tenets of Growth and Value investing
- The approach focuses on selecting a portfolio of Quality stocks with good Growth but At a Reasonable Price

Parameters comprising Q-GARP

Quality

The tendency of lower risk and higher quality assets to generate higher risk adjusted returns

Growth

A parameter that captures the excess return on stocks due to improving growth prospects

Valuation

An important parameter that acts as a safety net by identifying the difference between market price and the fair value

Fund Manager Views

- > Axis Quant Fund is a well-balanced, risk-controlled product that offers exposures to multiple styles including Valuation, Growth and Quality. On the cap front the portfolio incorporates a flexi approach where the allocations to Large, Mid and small caps evolve according to return opportunities available in our universe.
- The macro environment remains in flux given a lacklustre reporting season, moderating earnings expectations, slowing economy and uncertainty surrounding policy and monetary policy especially in the west. Given this background, we believe, our Q-GARP philosophy coupled with our unbiased risk aware approach to portfolio construction is more likely to be well rewarded by the markets.
