- Opportunity to capture budding companies
- Balanced allocation in multiple segments
- Capture the best ideas regardless of size

*The above framework is broadly indicative and the fund manager may change the framework depending on the market conditions

Fund Manager's view

- Axis Multicap Fund is intended to invest in high-conviction ideas across market cap. The fund uses bottom-up stock selection process and invest in high quality and high ROE businesses with steady earnings (large caps) and with a blend of niche companies as well as scalable business models backed by strong fundamentals (mid & small caps).
- This fund is primarily exposed to consumer-oriented companies especially in Capital goods, Autos, Hospitals, fintech/all platform and Realty.
- The fund also has a good blend of B2B-oriented sectors like Auto Ancillaries and EMS, although we have trimmed our significant overweight to the IT sector.
- While from a valuation perspective, we may favour large cap over mid/small cap currently, However, given the bottom-up approach to stock selection, the fund will look for opportunities irrespective of the market cap segment.
- We believe that domestic growth stories will remain resilient, especially for companies delivering strong earnings growth. Portfolio tilt is towards companies with higher dependence on domestic markets/consumers and expanding addressable market opportunities.

Current Portfolio Allocation is based on the prevailing market conditions and is subject to changes depending on the fund manager's view of the equity markets.
