Investment Philosophy

What Do We Look for?

- Aims for stable returns
- Managed risk
- Opportunity to capture budding companies
- Balanced allocation in multiple segments
- Capture the best ideas regardless of size
- Capture the lifecycle of a company

Fund Manager's view

- Axis Multicap Fund is intended to invest in high-conviction ideas across market cap. The fund uses bottom-up stock selection process and invest in high quality and high ROE businesses with steady earnings (large caps) and with a blend of niche companies as well as scalable business models backed by strong fundamentals (mid & small caps).
- The current focus is more on Banks, Auto OEM and ancillaries and power equipment's.
- As the fund has exposure to B2B-oriented sectors like capital goods, IT. Portfolio has been hurt in near term.
- While from a valuation perspective, we may favour large cap over mid/small cap currently, However, given the bottom-up approach to stock selection, the fund will look for opportunities irrespective of the market cap segment.
- We believe that domestic growth stories will remain resilient, especially for companies delivering strong earnings growth. Portfolio tilt is towards companies with higher dependence on domestic markets/consumers and expanding addressable market opportunities.
