Investment Strategy

- Innovative & entrepreneurial companies with experienced management
- Market leaders in emerging industries or higher growth companies in established businesses

The Overseas allocation is based on advice from Schroders Investment Management and follows a high conviction alpha strategy.

Stock ideas are based on:

- Stocks where the current price doesn't reflect future prospects
- Companies expect to deliver future earnings growth above consensus over 3-5-year horizon
- Material environmental, social and governance (ESG) factors

Fund Manager Views

- As expected, global economy focus has shifted to evolving geopolitical tensions, the impact of policy changes and tariff implementation. We believe at this juncture; impact of the global events is highly unpredictable. Portfolio tilt is towards companies with higher dependence on domestic markets/consumers and expanding addressable market opportunities, could emerge as potential winners in the near future.
- Coordinated policy measures from the RBI and the Government such as rate cuts, CRR reduction, liquidity infusion, accelerated capex and nearly Rs1.5 trn in GST reductions aimed at boosting mass consumption.
- The fund has a large cap bias, given the relative safety amidst the current market environment. The midcap allocation Favors companies with market leadership attributes and largely consumer facing business models. Given the elevated valuations, we have rotated positions across segments, currently we are OW on Healthcare and Consumer services. We will remain in consolidation mode, based on earning growth profile.
- Given the concerns on geopolitical issues such as tariff and Geo-political ,concerns and pace of Global growth with mixed economic data, we remain at low exposure to global stocks. However, we maintain we balanced exposure of traditional and new age companies name.
