For complete details on the scheme investment strategy refer the scheme information document.

## Fund Manager Views

- › Nifty midcap and smallcap have underperformed large caps in 2025. Largecap valuations are no longer the primary concern, although certain pockets still carry elevated expectations.
- › Accordingly, the valuations in large caps are lucrative on relative basis. GST reform could be increased savings in the hands of consumers. The market is optimistic given the coordinated policy measures from the RBI and the Government such as rate cuts, CRR reduction, liquidity infusion, accelerated capex and nearly Rs1.5 trn in GST reductions aimed at boosting mass consumption.
- › Fund historically has a tilt towards consumption theme with current exposure of more than 65%.
- › The fund has an overweight in banks, NBFC, aviation, telecom, hospitals and Auro. With underweight towards FMCG, IT, Metals, O&G, Utilities.
- › The fund has reduced expensive high growth stocks and added to reasonable value UW segments
- › We remained focused on identifying long term themes and opportunities currently at play in the equity markets. Fund will continuously evaluating & adding more exposure to growth at reasonable price, while being selective. The focus will be more on Lenders & Healthcare.
