

AXIS MIDCAP FUND

An open-ended equity scheme predominantly investing in mid cap stocks

About the Fund

An open-ended equity scheme predominantly investing in mid cap stocks. A true-to-label midcap portfolio with a relatively superior quality and liquidity profile.

Invests at least 65% in mid cap companies

Risk management embedded in the investment process

Combines growth potential of midcaps with track record of large caps

Focused on emerging sectors/businesses that have potential to deliver high growth

*The above framework is broadly indicative and the fund manager may change the framework depending on the market conditions

Why Axis Midcap Fund?

What do we look for

- Innovative & entrepreneurial companies with experienced management
- Market leaders in emerging industries or higher growth companies in established businesses

Portfolio focus

Portfolio focus remains 'fundamentals' driven investing while emphasizing on healthy consistent growth, quality of cash flows & RoE with 3 to 5 years' view.

What do we avoid

Companies with bad corporate governance and weak financial metrics

Fund Manager Views

- India continues to remain one of the fastest growing economies globally and the long-term growth story for India remains intact. Growth in midcaps and small caps has been better than large caps so far. We expect this trend to continue. However, this trend is well priced in the valuations, hence stock selection will be more important as compared to asset allocation.
- We maintain an overweight stance on power sector capex, electronic manufacturing services and defence, supported by sustained government spending. We are overweight the consumption theme exc of FMCG due to multiple supportive triggers—ample liquidity, lower interest rates, GST cuts and proactive regulatory measures. We are optimistic on autos, hotels, telecom and quick commerce. We also hold overweight position in chemicals. Conversely, we remain underweight in FMCG, oil & gas and metals/mining. We have reduced underweight position in financial services, the current underweight stance can largely be attributed to non-lenders. We expect the lenders to benefit from anticipated revival in credit demand driven by lower rates and improved liquidity conditions.
- The fund remains true-to-label in its portfolio allocations with a diversified and risk-managed mid-cap portfolio which has a superior liquidity profile.
