Fund Manager Views

- ▶ Although growth has been slowing down globally and domestically, India continues to remain one of the fastest growing economies globally and the long-term growth story for India remains intact. Growth in midcaps and small caps has been better than large caps so far. We expect this trend to continue. However, this trend is well priced in the valuations, hence stock selection will be more important as compared to asset allocation.
- ▶ In the fund, we remain overweight on power sector CAPEX, electronic manufacturing services and defence. In the consumption space, we have more exposure to Retail, Hotels and Telecom. We are also overweight on auto and auto components. However, we remain underweight on Construction, financial services, FMCG and Metal / Mining.
- ▶ The fund remains true-to-label in its portfolio allocations with a diversified and risk-managed mid-cap portfolio which has a superior liquidity profile.
