The fund manager will consider various macroeconomic parameters (like GDP Growth, exports, interest rates, inflation etc.), High frequency indicators (like private consumption indicators, PMI, etc.), business and consumer sentiment indicators (corporate Earnings, business confidence index, forward looking estimates, etc.) to decide on the state of the business cycle.

No Market cap bias

## Business Cycle Investing

A Case for Conviction Driven Investing

  - Identify opportunities to benefit from earnings upgrades and/or valuation re-rating
- **Need For High Conviction:**
  - Meaningful allocation to sectors basis research indicators
  - Always Plan for Contingency - Nothing goes to Plan. Plan to diversify
- **Sell Discipline:**
  - Restructure portfolios once industry cycle plays out
  - Transition to new portfolio basis a changing business cycle

## Fund Manager Views

- As the name suggests, the fund focuses on the business cycle over a period and the stocks that could do well in those economic conditions.
- Accordingly, in the last couple of months, the fund has narrowed its focus both in sectors as well stocks by reducing positions in export oriented sectors such as IT while adding domestic sectors such as Banks (but reduced NBFCs) and domestic auto.
- Overall, Fund is o/w in banks, capital goods, auto, chemicals and metals and u/w in NBFC, IT, oil&gas and utilities.
- Given the uncertainty on global front due to geopolitical tensions, we will continue to evaluate such developments and try to actively position the fund to minimize impact while taking advantage of potential positives such as domestic economic recovery as well as conclusion of US & EU trade deals.
