

Axis Conservative Hybrid Fund

(An Open Ended Hybrid Scheme Investing Predominantly In Debt Instruments)

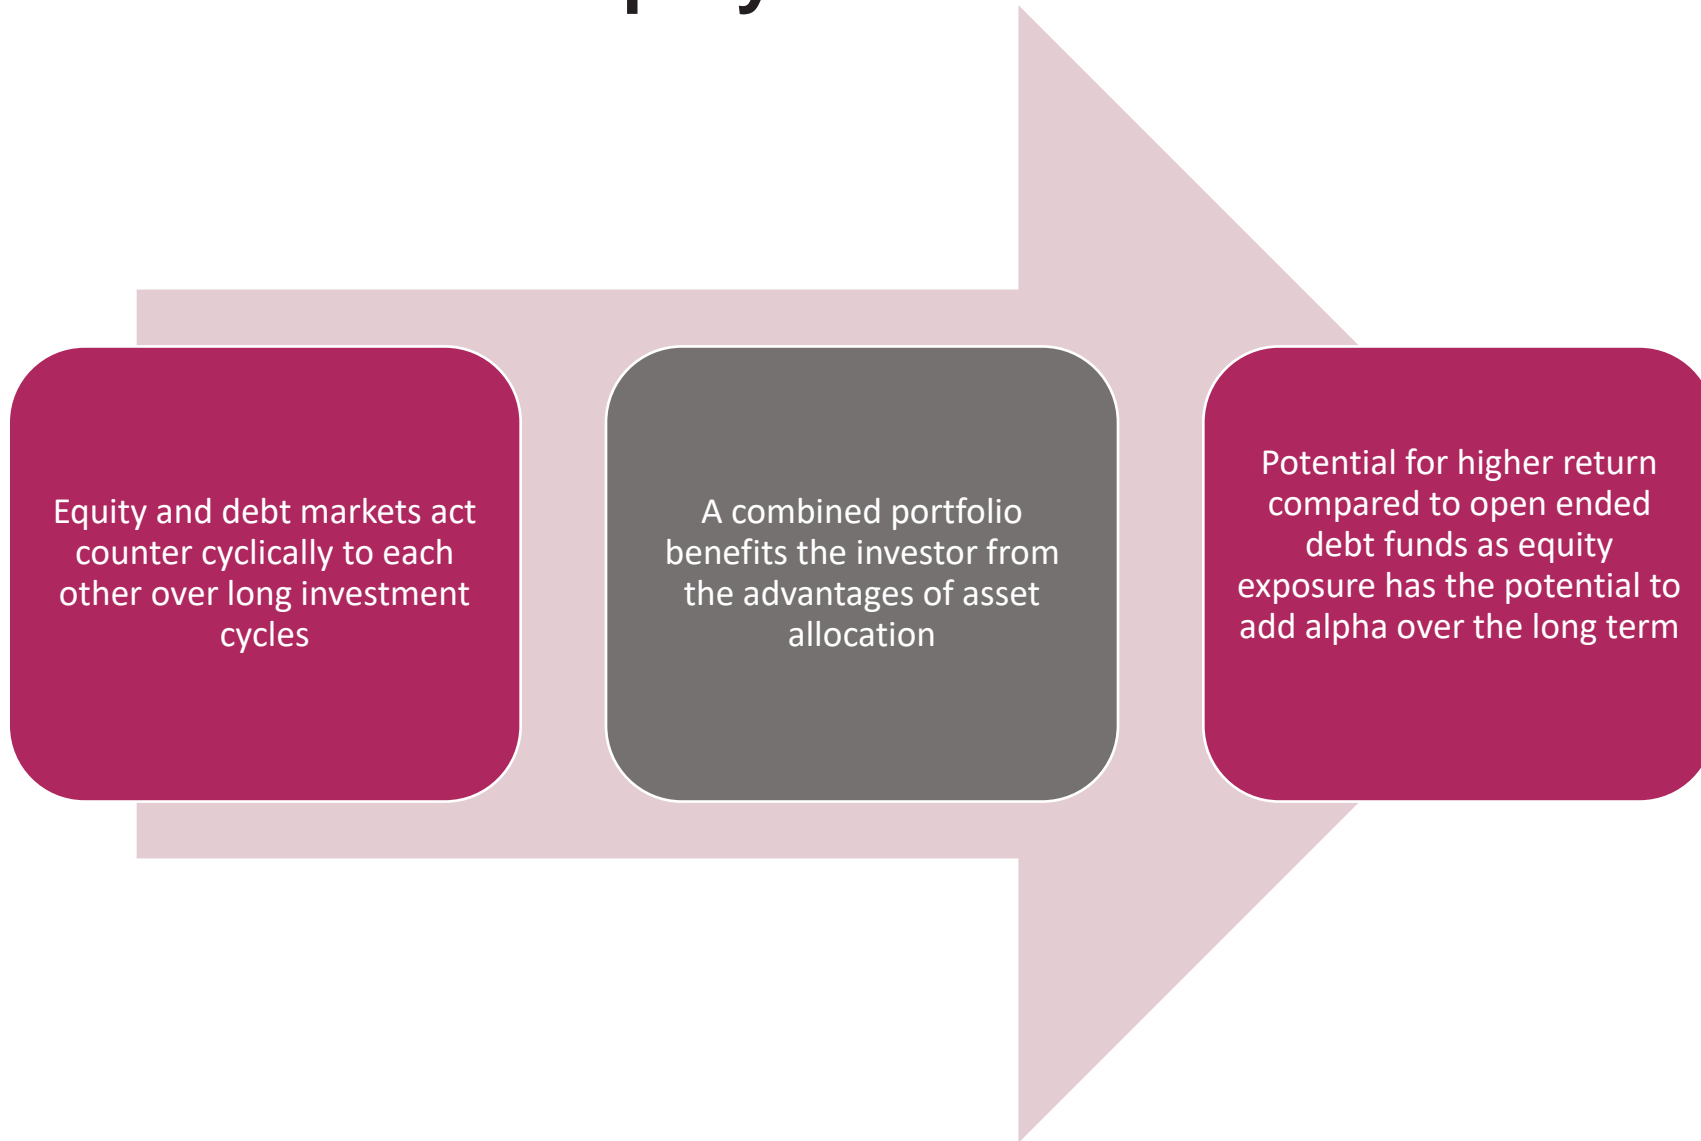

(Formerly known as Axis Regular Saver Fund)

What is a conservative hybrid fund?

- A conservative Hybrid Fund is a fund which allocates in a combination of Debt and Equity. It is called a Hybrid Debt Fund as a major portion of the portfolio is invested in Fixed Income
- The asset allocation is debt (75%-90%) and equity (10%-25%)
- The strategy aims to generate steady income via Debt investments and tries to add some alpha via equity exposure
- It is ideal for investors who want a steady portfolio with a small allocation to equities

Why combine debt and equity?

Individual asset classes behave differently during various times in a cycle...

Calendar Year	Nifty 50	Crisil composite bond fund index
2008	-52%	9%
2009	76%	4%
2010	18%	5%
2011	-25%	7%
2012	28%	9%
2013	7%	4%
2014	31%	14%
2015	-4%	9%
2016	3%	13%
2017	29%	5%
2018	3%	6%
2019	12%	11%
2020	15%	12%
2021	24%	3%
2022	6%	3%
2023	21%	7%

- It is difficult to **predict market cycles** and thereby the correct **asset class beneficiary**
 - Asset classes do not move in tandem at all times
- **Higher correlation** between asset classes **increases the overall risk** in the portfolio
- **Lower correlation** acts as hedge against each other and hence **reduces risk** and **optimizes return**

How does Asset Allocation work to benefit portfolios?

- 1 Asset class diversification reduces risk
- 2 Helps reasonable downside protection
- 3 Benefits from active management
- 4 Periodic Rebalancing helps buy low sell high
- 5 Lower correlation among asset classes helps optimize returns
- 6 Better Tax Efficiency*

*In view of individual nature of tax consequences, each unit holder is advised to consult his/her own professional tax advisors.

2 in 1 Asset Allocation Solution

An open ended hybrid scheme investing predominantly in debt instruments
