

AXIS CONSUMPTION FUND

(An open-ended equity scheme following consumption theme)

About the Fund

Axis Consumption Fund is an open-ended equity scheme following the consumption theme and offering investment opportunities to investors who want to participate in this expanding segment. The Scheme aims to provide long-term capital growth from an actively managed diversified portfolio of equity & equity related securities of companies engaged in consumption and consumption related sector or allied sectors.

Actively managed portfolio

Potential to invest across large caps, mid caps and small caps

Focus on bottom-up stock picking to build a quality-oriented portfolio

Why Axis Consumption Fund?

- Consumption theme is not specific only to the FMCG sector but is very broad based and covers various other sectors like Automobiles, Realty, Telecom, Durable goods, Retailing, etc., giving investors a much diversified portfolio.
- India's economic landscape is rapidly evolving, propelled by a large young population and emergence of the world's largest middle class coupled with increasing income levels and aspirations. Such a trend offers a golden opportunity for businesses to capitalize on the expanding market, making it an ideal time to invest in India's consumption-driven growth story via Axis Consumption Fund
- The fund intends to capture trends like a preference for experience, product, premiumization, urbanization, and digitization.

Fund Manager Views

- Consumption is a theme that focuses on participating in companies that benefit from consumer spending and behaviour trends. This theme capitalizes on the growth prospects offered by the evolving and expanding Indian consumer market driven by factors such as demographic shifts, rising incomes, and changing consumer preferences (like the need for luxury goods).
- India remains a long-term structural growth story driven by consumption and investment theme at large. A pickup in investments directly boosts consumption and we expect the improving rural demand, festive season, normalized monsoon, income tax reduced rate and easing inflation with lower interest rate to drive consumption forward. Furthermore, we have a bias towards high end consumption such as jewellery, travel etc.
- The recent GST rationalization is expected to boost consumption with benefits spread across sectors. Beyond the sectors directly impacted by GST rate cuts (FMCG, durables, GST rationalization is expected to gradually stimulate demand, with the auto sector already showing early signs of recovery ahead of the festive season. This positive momentum is likely to extend to other segments such as FMCG, consumer durables, cement, and broader discretionary categories, supported by rural recovery and recent direct tax relief measures. Additionally, the upcoming festive period is anticipated to further boost consumption across sectors, with rising expectations already evident in both the automobile and staples segments.
- Although underweight FMCG and automobiles, we have recently increased exposure through selective stocks. We maintain an overweight in consumer services (discretionary, hotels and retail) and financial services (NBFCs)
