QUICK TAKE

Near-term outlook remains balanced, with domestic resilience offset by geopolitical risks, crude volatility, and inflation concerns.

Valuations have become more reasonable post-correction, especially in large caps and select cyclical.

Investors are suggested to have their asset allocation plan based on one's risk appetite and future goals in life.

KEY HIGHLIGHTS

EQUITY REVIEW

September was a challenging month for Indian equities, with the correction broadening across market caps and sectors. The Nifty 50 declined 6.1%, while the Nifty Midcap 100 and Nifty Smallcap 100 fell 7.6% and 3.4%, respectively. IT, auto and realty were among the weaker segments. The decline reflected a combination of higher crude oil prices, rising global bond yields, renewed concerns around inflation and interest rates, and a reversal in foreign portfolio flows. Geopolitical uncertainty added another layer of caution, particularly given India's sensitivity to energy prices.

Importantly, the correction was not confined to a few pockets of the market. Investors appeared to reassess the interplay between valuations, earnings expectations and the changing /rising cost environment. The rise in crude and other input costs matters for India not simply from a macro perspective, but also from an earnings standpoint. Higher energy, commodity and freight costs can place pressure on margins, and the ability of individual businesses to absorb these costs or pass them on without affecting demand is likely to become increasingly relevant.

Flows also reflected the divergence between global and domestic investor sentiment. After two consecutive months of inflows, FPIs turned net sellers, with outflows of around US\$3.8 bn during September. DIIs, on the other hand, invested approximately US\$8 bn, providing a meaningful counterbalance. The growing depth of domestic institutional flows has increased the market's ability to absorb periods of foreign selling, though it does not entirely insulate valuations or market performance from global risk appetite. Primary markets remained active despite the weakness in listed equities, with 32 IPOs raising approximately US\$4.1 bn during September.

The external backdrop became more challenging during the month. Crude oil moved back into the US\$100-110 per barrel range amid geopolitical and supply concerns, while tighter monetary conditions pushed global bond yields higher. For India, these developments matter primarily through their influence on inflation, the currency, domestic yields, capital flows and corporate input costs.

The correction has brought some valuation moderation, particularly in large caps, but the opportunity is not uniform across the market. Mid-cap valuations ended September at a 52% premium to the Nifty, compared with a long-term average premium of 27%, while the small-cap premium touched a record 30%. Therefore, while headline indices have corrected, expectations embedded in parts of the broader market remain elevated. This distinction is important. A price correction does not automatically translate into attractive valuations.

OUTLOOK

Despite the near-term volatility, India's underlying domestic growth opportunity remains constructive. Demand conditions remain supportive across financials, consumption, pharmaceuticals and industrials. At the same time, the investment cycle continues to create opportunities across manufacturing, infrastructure, data centers and power transmission & distribution.

The upcoming earnings season will be an important test of this resilience. Our focus will be not only on headline revenue and profit growth, but also on the quality and sustainability of earnings. With energy, commodity and freight costs moving higher, the key question is how effectively companies can navigate these pressures. Pricing power will therefore become increasingly important. Some businesses may be able to pass higher costs through to consumers without materially affecting volumes, while others

may need to absorb a larger share of the increase. The resulting impact on margins is unlikely to be uniform.

This is why we believe margin resilience, balance sheet strength and execution could become increasingly important differentiators. In an environment where the cost backdrop is changing, companies that can maintain volumes, protect profitability and generate healthy cash flows should be better positioned than those dependent on benign input costs or aggressive pricing.

Externally, West Asia remains an important monitorable. The relevance for Indian equities goes beyond geopolitical uncertainty. Any prolonged disruption that keeps crude oil, commodities, freight or logistics costs elevated could feed into domestic inflation as well as corporate margins. Similarly, higher global bond yields and a stronger US dollar could continue to influence foreign portfolio flows and relative valuations.

At the same time, we would not extrapolate these near-term risks into the long-term India story. The domestic investment cycle remains healthy, formalisation continues, manufacturing capabilities are expanding and household consumption remains an important source of growth. These are multi-year trends and, in our view, provide a stronger anchor for portfolio construction than attempting to position around every short-term macro variable.

POSITIONING

The September correction has improved the risk-reward in parts of the market, particularly among large caps, while valuations in several mid- and small-cap pockets continue to reflect optimistic growth expectations and will require strong earnings delivery to justify prevailing premiums. Our approach remains constructive, but selective, with the focus increasingly on the relationship between earnings growth, business quality and the price being paid for that growth. As the market transitions from a phase driven by liquidity and broad-based re-rating, we believe earnings delivery and stock selection will become increasingly important drivers of returns.

Our preferred areas continue to be those linked to India's domestic growth and investment cycle. These include banks, consumer discretionary, manufacturing-linked businesses, domestic capex, transmission & distribution, industrials, defence and electronic manufacturing services. We believe these areas can benefit from India's continuing investment cycle, manufacturing expansion and greater formalisation of the economy.

We remain cautious in areas such as consumer staples where higher input costs could challenge margins or where earnings visibility does not adequately compensate for prevailing valuations. More generally, businesses with limited pricing power could face a more difficult operating environment if commodity and energy costs remain elevated.

Overall, we remain constructive on Indian equities, but the character of the opportunity is changing. The next phase of market returns is likely to be driven less by broad-based multiple expansion and more by earnings delivery, execution and valuation discipline. Volatility, therefore, should not necessarily be viewed only as a risk. Where business fundamentals remain intact, periods of market weakness can provide opportunities to selectively build exposure to long-term structural growth.

Our emphasis remains straightforward - stay aligned with India's structural growth opportunities, remain disciplined on valuations and let earnings rather than narratives drive portfolio decisions.

AXIS LARGE CAP FUND

(Formerly known as Axis Bluechip Fund)

(An Open-Ended Equity Scheme Predominantly Investing In Large Cap Stocks.)

FACTSHEET

September 2026

INVESTMENT OBJECTIVE: To achieve long term capital appreciation by investing in a diversified portfolio predominantly consisting of equity and equity related securities of Large cap companies including derivatives. There is no assurance that the investment objective of the Scheme will be achieved.

AXIS BUSINESS CYCLES FUND

(An open ended equity scheme investing in business cycles based investing theme.)

FACTSHEET

September 2026

INVESTMENT OBJECTIVE: To provide long term capital appreciation by investing predominantly in equity and equity related securities with a focus on riding business cycles through dynamic allocation between various sectors and stocks at different stages of business cycles in the economy. There is no assurance that the investment objective of the Scheme will be achieved.

PERFORMANCE

(as on 30th September, 2026)

Period	1 Year		3 Years		5 Years		Since Inception		Date of Inception
	CAGR(%)	Current Value of Investment of ₹10,000/-	CAGR(%)	Current Value of Investment of ₹10,000/-	CAGR(%)	Current Value of Investment of ₹10,000/-	CAGR(%)	Current Value of Investment of ₹10,000/-	
Axis Business Cycles Fund - Regular Plan - Growth Option	2.40%	10,240	11.23%	13,770	NA	NA	15.13%	16,620	
Nifty 500 TRI (Benchmark)	-2.03%	9,797	9.50%	13,135	NA	NA	13.03%	15,552	22-Feb-23
Nifty 50 TRI (Additional Benchmark)	-7.09%	9,291	6.05%	11,931	NA	NA	8.58%	13,453	
Axis Business Cycles Fund - Direct Plan - Growth Option	3.51%	10,351	12.65%	14,306	NA	NA	16.62%	17,410	
Nifty 500 TRI (Benchmark)	-2.03%	9,797	9.50%	13,135	NA	NA	13.03%	15,552	22-Feb-23
Nifty 50 TRI (Additional Benchmark)	-7.09%	9,291	6.05%	11,931	NA	NA	8.58%	13,453	

Past performance may or may not be sustained in future. Different plans have different expense structure. Ashish Naik is managing the scheme since 22nd February 2023 and he manages 4 schemes of Axis Mutual Fund & Pratik Tibrewal is managing the scheme since 26th August 2026 and he manages 26 schemes of Axis Mutual Fund. Please refer to annexure on Page 143 for performance of all schemes managed by the fund manager. Returns greater than 1 year period are compounded annualised (CAGR). Face Value per unit: ₹10.

INCOME DISTRIBUTION CUM CAPITAL WITHDRAWAL (IDCW)

Regular Plan					Direct Plan				
Options	Record Date	IDCW (₹ Per unit)		NAV per unit (Cum IDCW)	NAV per unit (Ex IDCW)	IDCW (₹ Per unit)		NAV per unit (Cum IDCW)	NAV per unit (Ex IDCW)
		Individuals /HUF	Others			Individuals /HUF	Others		
	Jul 03, 2026	1.31	1.31	16.90	16.79	1.37	1.37	17.66	17.55

Pursuant to payment of Distribution of Income & Capital, the NAV of the above stated IDCW options of the scheme/plan would fall to the extent of payout and statutory levy, if any. Past performance may or may not be sustained in future. Face value of units is ₹10. IDCW means Income Distribution cum Capital Withdrawal.

ENTRY & EXIT LOAD

Entry Load:	NA
Exit Load:	If redeemed / switched-out within 12 months from the date of allotment - For 10% of investment: Nil. For remaining investment: 1%. If redeemed/switched out after 12 months from the date of allotment: Nil.

*Risk-free rate assumed to be 5.28% (MIBOR as on 30-09-2026) - Source: www.fimdm.org

**Market caps are defined as per SEBI regulations as below: a. Large Cap: 1st - 100th company in terms of full market capitalization. b. Mid Cap: 101st - 250th company in terms of full market capitalization. c. Small Cap: 251st company onwards in terms of full market capitalization.

Since the fund has not completed 1-year, tracking error is taken from the launch date of the scheme. The tracking error may look optically elevated on account of deployment during the first few days of the scheme. This effect is transitional in nature and normalizes as the fund completes 1 year since fund launch.

^{^^}Market caps are defined as per SEBI regulations as below: a. Large Cap: 1st -100th company in terms of full market capitalization. b. Since the fund has not completed 1-year, tracking error is taken from the launch date of the scheme. The tracking error may look optically elevated on account of deployment during the first few days of the scheme. This effect is transitory in nature and normalizes as the fund completes 1 year since fund launch.

^{^^}Market caps are defined as per SEBI regulations as below: a. Large Cap: 1st -100th company in terms of full market capitalization. b. Mid Cap: 101st - 250th company in terms of full market capitalization. c. Small Cap: 251st company onwards in terms of full market capitalization. Nandik Malik is managing the scheme since 6th March 2026 and he manages 29 schemes of Axis Mutual Fund & Rohit Gautam is managing the scheme since 6th March 2026 and he manages 27 schemes of Axis Mutual Fund. Please refer to annexure on Page 143 for performance of all schemes managed by the fund manager. Returns greater than 1 year period are compounded annualised (CAGR). Face Value per unit: ₹10.

ENTRY & EXIT LOAD

Entry Load:	NA
Exit Load:	If redeemed/ switched out within 15 days from the date of allotment: 0.25%, if redeemed/ switched out after 15 days from the date of allotment: Nil

Since the fund has not completed 1-year, tracking error is taken from the launch date of the scheme. The tracking error may look optically elevated on account of deployment during the first few days of the scheme. This effect is transitional in nature and normalizes as the fund completes 1 year since fund launch.

^{^^}Market caps are defined as per SEBI regulations as below: a. Large Cap: 1st -100th company in terms of full market capitalization. b. Mid Cap: 101st - 250th company in terms of full market capitalization. c. Small Cap: 251st company onwards in terms of full market capitalization. FIXED INCOME

OUTLOOK
OCTOBER 2026

QUICK TAKE

- A gradual rise in interest rates over the later half of the year if crude stays elevated above US\$100 a barrel.
- Short term 2-5-year corporate bonds, tactical mix of long duration Gsecs and income plus arbitrage are best strategies to invest in the current macro environment.
- Selective Credits continue to remain attractive from a risk reward perspective given the improving macro fundamentals.

September was a challenging month for bond markets, as global and domestic developments kept yields under pressure. The global bond sell-off intensified amid a sharp rise in crude oil prices, rate hike by the US Federal Reserve (Fed) and resilient US economic data. Hawkish commentary from the Fed reinforced expectations that interest rates could remain higher for longer, pushing US Treasury yields higher across maturities and weighing on global fixed-income sentiment. Domestic bond markets mirrored these pressures. The RBI's announcement of OMO sales of 1 trillion added pressure at the shorter end of the yield curve as the central bank sought to absorb surplus liquidity, while higher-than-expected government bond supply for 2HFY27 weighed on longer maturities. The benchmark 10-year G-Sec yield traded in a 6.93–7.19% range during September, with movements in crude oil prices, global yields, liquidity conditions and government borrowing influencing market sentiment.

KEY MARKET EVENTS

RBI hikes rates for the first time since February 2023 : The Reserve Bank of India (RBI) raised repo rates by 25 bps to 5.5%, the first rate hike since February 2023. The RBI changed the stance from neutral to calibrated tightening. While acknowledging that domestic growth remains resilient, the RBI noted that the inflation outlook had turned less favourable due to elevated food and fuel prices, weather-related risks, and renewed uncertainty from higher global commodity prices and geopolitical developments. The RBI revised its FY27 GDP growth forecast upward to 7.1%, reflecting the economy's underlying strength, but also raised its FY27 CPI inflation forecast to 5.2%, citing broader inflationary pressures. The policy decision reflected the MPC's assessment that preserving price stability remains critical to sustaining durable growth, warranting a more cautious and tighter policy stance. Moreover, the central bank indicated that rate cuts are off the table and policy action over the next few months can be rate hikes or a pause as macro environment evolves.

2HFY27 borrowing calendar broadly in line with expectations : The central government announced gross G-Sec borrowing of 7.86 trillion for 2HFY27, accounting for around 49% of the FY27 Budget Estimate, compared with 8.1 trillion in 1HFY27. The borrowing mix remains tilted towards longer maturities, with 53.1% scheduled in the 7–15-year segment, including 26.3% in the 10-year tenor, while 28% will be raised through 30–50-year securities. Net G-Sec issuance for 2HFY27 is pegged at 6.3 trillion. Separately, 3QFY27 gross T-bill issuance is scheduled at 2.99 trillion, with net issuance of 297 billion, while the Ways and Means Advances (WMA) limit for 2HFY27 has been retained at 500 billion.

Rupee remains relatively resilient : The INR depreciated by just 0.7% against the US dollar in September, despite a stronger DXY, rising crude prices and FPI outflows of around US\$6.5 bn across equity and debt. RBI intervention helped contain volatility, with the rupee recovering modestly during the second half of the month despite persistent global pressures. The RBI's continued focus on limiting excessive currency volatility remains important, particularly as higher oil prices and global yields could add to imported inflation and influence domestic liquidity and rate expectations.

Inflation rises in August : Inflation pressures intensified in August, with headline CPI inflation rising to 4.8%, up from 4.5% in July. The increase was driven primarily by food prices, reflecting the impact of an uneven monsoon, worsening El Niño conditions and higher prices across key food categories. Elevated crude oil prices and commodity costs also added to price pressures, increasing concerns around the broader inflation outlook. More importantly, core inflation also firmed up, indicating that inflationary pressures were becoming more broad-based rather than being confined to food and fuel. With food inflation remaining elevated, energy prices rising following the West Asia conflict and risks of second-round effects feeding into inflation expectations, the RBI assessed that inflation was no longer as benign as in the previous year.

Bond yields continue to rise globally : Global bond markets remained under pressure through September as central banks maintained a hawkish bias amid resurgent inflation concerns and rising energy prices. The US 10-year Treasury yield extended its rise, supported by the Fed's 25 bps rate hike and guidance that policy rates are likely to remain higher for longer. Elevated crude oil prices, driven by supply constraints and geopolitical tensions in West Asia, further reinforced concerns that inflation could prove more persistent than previously anticipated. The sell-off in global bonds was not confined to the US. Sovereign yields across Europe and Japan also moved higher as investors reassessed the outlook for inflation, fiscal sustainability and monetary policy. Higher global yields, combined with tighter financial conditions and a stronger US dollar, weighed on risk sentiment and increased volatility across fixed income markets. The move higher in global rates underscores the challenge facing central banks as they balance resilient growth against renewed inflationary pressures and heightened geopolitical uncertainty.

MARKET VIEW

The RBI's rate hike action was broadly in line with our expectations - a 25 bps hike and a probability of change in stance. In our view, the policy reinforces the RBI's growing confidence in the resilience of the domestic economy while highlighting its commitment to remain vigilant on inflation and external risks.

We expect the RBI to raise rates by an additional 50-75 bps in the near term, taking the operative rate towards 6.0-6.25%. Beyond that, the depth and duration of the tightening cycle will become increasingly data dependent, with key monitorables including the developments in the West Asia conflict, the trajectory of crude oil prices, global bond yields, domestic core inflation and the resilience of growth.

With substantial surplus liquidity in the banking system, we expect the RBI to continue withdrawing liquidity through measures such as OMO sales, fx sell-buy operations and VRRR auctions, complementing rate action. This calibrated combination of higher policy rates and tighter liquidity should help address emerging inflation risks while balancing the need to support growth. For investors, near-term pressure on bond yields could create opportunities to gradually lock into attractive yields as the tightening cycle progresses.

Meanwhile, while the Fed has raised rates, the pertinent question is whether it is already behind the curve given that other central banks moved ahead of it to tighten policy. The European Central Bank began raising rates in June, the Bank of Japan tightened in June and again in September, while the Reserve Bank of Australia delivered three increases between February and May. In our view, another two to three hikes may be required, potentially taking the operative policy rate towards 4.5%, after which rates are likely to remain higher for longer. The key risk to this view is a sharp slowdown in AI investment. If that were to materially weaken US growth, the Fed's ability to continue hiking would become constrained. For investors, therefore, the more important debate is no longer simply whether the Fed is behind the curve, but how far it can raise rates before growth begins to become the binding constraint.

What should investors do?

Overweight 1–3 year Corporate Bonds; cautious on Long SDLs. The fixed income opportunity remains attractive, but selectivity is key. We prefer the 1–3 year segment of the curve, particularly high-quality corporate bonds, where favourable carry, ample liquidity and limited CD issuance create an attractive risk-reward balance.

We remain neutral on government securities for now. The RBI's use of OMO sales to absorb surplus liquidity, alongside the deferment of Bloomberg index inclusion, higher fiscal slippage risks, could keep yields under pressure and limit the scope for a sustained rally. However, as the rate-hiking cycle progresses and yields look attractive, we would look for opportunities to tactically add duration.

We remain cautious on long-duration SDLs. Elevated state borrowing and an unfavourable demand-supply balance could keep yields elevated and limit meaningful spread compression. Risks around the 8th Pay Commission, softer tax collections and subsidy pressures also warrant caution.

Thus, our preference today is to earn carry at the shorter end, stay patient on duration and use periods of yield repricing to gradually add duration when the risk-reward becomes more favourable.

OVERWEIGHT

- 1-3Y Corporate Bonds**
- Lack of CD Issuance
 - Ample liquidity remains supportive

NEUTRAL / TACTICAL

- Long Government Bonds & 5 year OIS**
- (Positive) Aggressive rate hikes largely priced in
 - (Positive) Attractive term premia
 - (Negative) Deferment of Bloomberg inclusion
 - (Negative) OMO sales
 - (Negative) Fiscal breach risk

AVOID / UNDERWEIGHT

- Long SDLs**
- High SDL supply likely to keep yields elevated
 - Spread compression limited

Source: Axis MF Internal Research

Risks to our view: The risks to our view at this point are as below

- 1) The duration of the conflict
- 2) Crude oil prices above US\$100 a barrel
- 3) Excessive currency depreciation
- 4) Hawkish Fed Policy

Strategy : With a conservative stance, short-duration, accrual-focused target-maturity strategies are particularly well positioned in the current macro environment. Higher yields, combined with supportive liquidity conditions, enhance the potential for better risk-adjusted returns and predictability when held to maturity.

Source: Bloomberg, Axis MF Research.

AXIS OVERNIGHT FUND

(An open ended debt scheme investing in overnight securities. A relatively low interest risk & relatively low credit risk.)

FACTSHEET
September 2026

INVESTMENT OBJECTIVE: The investment objective of the Scheme is to provide reasonable returns commensurate with very low interest rate risk and providing a high level of liquidity, through investments made primarily in overnight securities having maturity/residual maturity of 1 business day. There is no assurance that the investment objective of the Scheme will be achieved.

HYBRID

OUTLOOK ₹ 
OCTOBER 2026

Quick Take - Equity

- Near-term outlook remains balanced, with domestic resilience offset by geopolitical risks, crude volatility, and inflation concerns.
- Valuations have become more reasonable post-correction, especially in large caps and select cyclicals.
- Investors are suggested to have their asset allocation plan based on one's risk appetite and future goals in life.

Quick Take - Fixed Income

- A gradual rise in interest rates over the later half of the year if crude stays elevated above US\$100 a barrel.
- Short term 2-5-year corporate bonds, tactical mix of long duration Gsecs and income plus arbitrage are best strategies to invest in the current macro environment.
- Selective Credits continue to remain attractive from a risk reward perspective given the improving macro fundamentals.

KEY HIGHLIGHTS

September was a challenging month for Indian equities, with the correction broadening across market caps and sectors. The Nifty 50 declined 6.1%, while the Nifty Midcap 100 and Nifty Smallcap 100 fell 7.6% and 3.4%, respectively. IT, auto and realty were among the weaker segments. The decline reflected a combination of higher crude oil prices, rising global bond yields, renewed concerns around inflation and interest rates, and a reversal in foreign portfolio flows. Geopolitical uncertainty added another layer of caution, particularly given India's sensitivity to energy prices.

Flows also reflected the divergence between global and domestic investor sentiment. After two consecutive months of inflows, FPIs turned net sellers, with outflows of around US\$3.8 bn during September. DIIs, on the other hand, invested approximately US\$8 bn, providing a meaningful counterbalance. The growing depth of domestic institutional flows has increased the market's ability to absorb periods of foreign selling, though it does not entirely insulate valuations or market performance from global risk appetite. Primary markets remained active despite the weakness in listed equities, with 32 IPOs raising approximately US\$4.1 bn during September.

Global and domestic developments kept bond market yields under pressure. The global bond sell-off intensified amid a sharp rise in crude oil prices, rate hike by the US Federal Reserve (Fed) and resilient US economic data. Hawkish commentary from the Fed reinforced expectations that interest rates could remain higher for longer, pushing US Treasury yields higher across maturities and weighing on global fixed-income sentiment.

Domestic bond markets mirrored these pressures. The RBI's announcement of OMO sales of 1 trillion added pressure at the shorter end of the yield curve as the central bank sought to absorb surplus liquidity, while higher-than-expected government bond supply for 2HFY27 weighed on longer maturities. The benchmark 10-year G-Sec yield traded in a 6.93-7.19% range during September, with movements in crude oil prices, global yields, liquidity conditions and government borrowing influencing market sentiment.

Key Market Events

RBI hikes rates for the first time since February 2023: The Reserve Bank of India (RBI) raised repo rates by 25 bps to 5.5%, the first rate hike since February 2023. The RBI changed the stance from neutral to calibrated tightening. While acknowledging that domestic growth remains resilient, the RBI noted that the inflation outlook had turned less favourable due to elevated food and fuel prices, weather-related risks, and renewed uncertainty from higher global commodity prices and geopolitical developments. The RBI revised its FY27 GDP growth forecast upward to 7.1%, reflecting the economy's underlying strength, but also raised its FY27 CPI inflation forecast to 5.2%, citing broader inflationary pressures.

Rupee remains relatively resilient : The INR depreciated by just 0.7% against the US dollar in September, despite a stronger DXY, rising crude prices and FPI outflows of around US\$6.5 bn across equity and debt. RBI

KEY HIGHLIGHTS

intervention helped contain volatility, with the rupee recovering modestly during the second half of the month despite persistent global pressures. The RBI's continued focus on limiting excessive currency volatility remains important, particularly as higher oil prices and global yields could add to imported inflation and influence domestic liquidity and rate expectations.

Inflation rose in August : Inflation pressures intensified in August, with headline CPI inflation rising to 4.8%, up from 4.5% in July. The increase was driven primarily by food prices, reflecting the impact of an uneven monsoon, worsening El Niño conditions and higher prices across key food categories. Elevated crude oil prices and commodity costs also added to price pressures, increasing concerns around the broader inflation outlook. More importantly, core inflation also firmed up, indicating that inflationary pressures were becoming more broad-based rather than being confined to food and fuel.

Bond yields continue to rise globally : Global bond markets remained under pressure through September as central banks maintained a hawkish bias amid resurgent inflation concerns and rising energy prices. The US 10-year Treasury yield extended its rise, supported by the Fed's 25 bps rate hike and guidance that policy rates are likely to remain higher for longer. Elevated crude oil prices, driven by supply constraints and geopolitical tensions in West Asia, further reinforced concerns that inflation could prove more persistent than previously anticipated.

Equity Market View

Despite the near-term volatility, India's underlying domestic growth opportunity remains constructive. Demand conditions remain supportive across financials, consumption, pharmaceuticals and industrials. At the same time, the investment cycle continues to create opportunities across manufacturing, infrastructure, data centers and power transmission & distribution.

The upcoming earnings season will be an important test of this resilience. Our focus will be not only on headline revenue and profit growth, but also on the quality and sustainability of earnings. With energy, commodity and freight costs moving higher, the key question is how effectively companies can navigate these pressures. Pricing power will therefore become increasingly important. Some businesses may be able to pass higher costs through to consumers without materially affecting volumes, while others may need to absorb a larger share of the increase. The resulting impact on margins is unlikely to be uniform.

The September correction has improved the risk-reward in parts of the market, particularly among large caps, while valuations in several mid- and small-cap pockets continue to reflect optimistic growth expectations and will require strong earnings delivery to justify prevailing premiums. Our approach remains constructive, but selective, with the focus increasingly on the relationship between earnings growth, business quality and the price

being paid for that growth. As the market transitions from a phase driven by liquidity and broad-based re-rating, we believe earnings delivery and stock selection will become increasingly important drivers of returns.

Our preferred areas continue to be those linked to India's domestic growth and investment cycle. These include banks, consumer discretionary, manufacturing-linked businesses, domestic capex, transmission & distribution, industrials, defence and electronic manufacturing services. We believe these areas can benefit from India's continuing investment cycle, manufacturing expansion and greater formalisation of the economy.

Bonds

The RBI's rate hike action was broadly in line with our expectations - a 25 bps hike and a probability of change in stance. In our view, the policy reinforces the RBI's growing confidence in the resilience of the domestic economy while highlighting its commitment to remain vigilant on inflation and external risks.

We expect the RBI to raise rates by an additional 50-75 bps in the near term, taking the operative rate towards 6.0-6.25%. Beyond that, the depth and duration of the tightening cycle will become increasingly data dependent, with key monitorables including the developments in the West Asia conflict, the trajectory of crude oil prices, global bond yields, domestic core inflation and the resilience of growth.

With substantial surplus liquidity in the banking system, we expect the RBI to continue withdrawing liquidity through measures such as OMO sales, fx sell-buy operations and VRRR auctions, complementing rate action. This calibrated combination of higher policy rates and tighter liquidity should help address emerging inflation risks while balancing the need to support growth. For investors, near-term pressure on bond yields could create opportunities to gradually lock into attractive yields as the tightening cycle progresses.

The fixed income opportunity remains attractive, but selectivity is key. We prefer the 1-3 year segment of the curve, particularly high-quality corporate bonds, where favourable carry, ample liquidity and limited CD issuance create an attractive risk-reward balance. We remain neutral on government securities for now. The RBI's use of OMO sales to absorb surplus liquidity, alongside the deferment of Bloomberg index inclusion, higher fiscal slippage risks, could keep yields under pressure and limit the scope for a sustained rally. However, as the rate-hiking cycle progresses and yields look attractive, we would look for opportunities to tactically add duration. We remain cautious on long-duration SDLs. Elevated state borrowing and an unfavourable demand-supply balance could keep yields elevated and limit meaningful spread compression. Risks around the 8th Pay Commission, softer tax collections and subsidy pressures also warrant caution.

AXIS CONSERVATIVE HYBRID FUND

FACTSHEET

September 2026

(An open ended hybrid scheme investing predominantly in debt instruments.)

INVESTMENT OBJECTIVE: The Scheme seeks to generate regular income through investments in debt & money market instruments, along with capital appreciation through limited exposure to equity and equity related instruments. There is no assurance that the investment objective of the Scheme will be achieved.

AXIS RETIREMENT FUND - DYNAMIC PLAN

(An open-ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age whichever is earlier.)

FACTSHEET
September 2026

INVESTMENT OBJECTIVE: The investment objective of the Investment Plan(s) under the Scheme is to provide long-term capital appreciation / income by investing in a mix of equity, debt and other instruments to help investors meet their retirement goals. There is no assurance that the investment objective of the Scheme will be achieved. The Investment Plan has a dual objective of generating capital appreciation by investing in equity and equity related securities as well as generating income by investing in debt and money market securities, while attempting to manage risk from the market through active asset allocation. The Investment Plan may also invest in units of Gold ETF or units of REITs & InvITs for income generation / wealth creation.

SIP PERFORMANCE OF SELECT SCHEMES (as on September 30, 2026)

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time. SIP returns are computed after accounting for cash flow by using XIRR method (investment internal rate of return).*

Additional Benchmark Returns (Annualised)	5.25%	5.65%	4.56%	1.18%

*Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. Benchmark: CRISIL Hybrid 75+25 - Conservative Index. Additional Benchmark: Nifty 50 yr Benchmark G-Sec. Inception Date: Dec 20, 2019. This scheme is managed by Jayesh Sundar & Krishnaa N & Devang Shah & Hardik Shah. Please refer to the Annexure for returns of all the schemes managed by them.

SIP PERFORMANCE OF SELECT SCHEMES (as on September 30, 2026)

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time. SIP returns are computed after accounting for cash flow by using XIRR method (investment internal rate of return).*

Axis Retirement Fund - Dynamic Plan - Regular Plan - Growth Option

SIP Investments	Since Inception SIP	5 Year SIP	3 Year SIP	1 Year SIP
Total Amount Invested	8,20,000	6,00,000	3,60,000	1,20,000
Market value as on September 30, 2026	10,96,769	7,10,204	3,71,648	1,17,468
Returns (Annualised)	8.39%	6.68%	2.08%	-3.90%
Benchmark Returns (Annualised)	9.29%	6.82%	2.59%	-4.81%
Additional Benchmark Returns (Annualised)	8.69%	4.60%	-1.42%	-13.60%

*Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. Benchmark: CRISIL Hybrid 35+65 - Aggressive Index. Additional Benchmark: Nifty 50 TRI. Inception Date: Dec 20, 2019. This scheme is managed by Jayesh Sundar & Krishnaa N & Devang Shah & Hardik Shah. Please refer to the Annexure for returns of all the schemes managed by them.

Axis Multi Asset Allocation Fund - Regular Plan - Growth Option

SIP Investments	Since Inception SIP	10 Year SIP	5 Year SIP	3 Year SIP	1 Year SIP
Total Amount Invested	19,40,000	12,00,000	6,00,000	3,60,000	1,20,000
Market value as on September 30, 2026	46,80,816	21,01,269	7,63,458	4,09,550	1,20,039
Returns (Annualised)	10.10%	10.80%	9.58%	8.57%	0.06%
