(An open ended scheme investing in equity, arbitrage and debt)

(Formerly known as Axis Equity Saver Fund)

Registration Number: MF/061/09/02

AXIS MUTUAL FUND

*For riskometer and Product Labelling please refer slide no. 21

The importance of asset allocation

How does Asset Allocation work to benefit portfolios?

1. Asset class diversification reduces risk
2. Helps reasonable downside protection
3. Benefits from active management
4. Periodic Rebalancing helps buy low sell high
5. Lower correlation among asset classes helps optimize returns
6. Better Tax Efficiency*

*For individual nature of tax implications, investors are requested to consult their tax advisors before investing

The Need For Asset Allocation

AXIS MUTUAL FUND

Individual asset class returns can vary significantly

Since all asset classes don't move in lockstep, being appropriately diversified can help reduce volatility and optimize long-term returns.

2 Years returns (FY)	Stocks	Bonds	Cash	Equity Savings
2011-13	0%	9%	9%	6%
2012-14	14%	8%	9%	11%

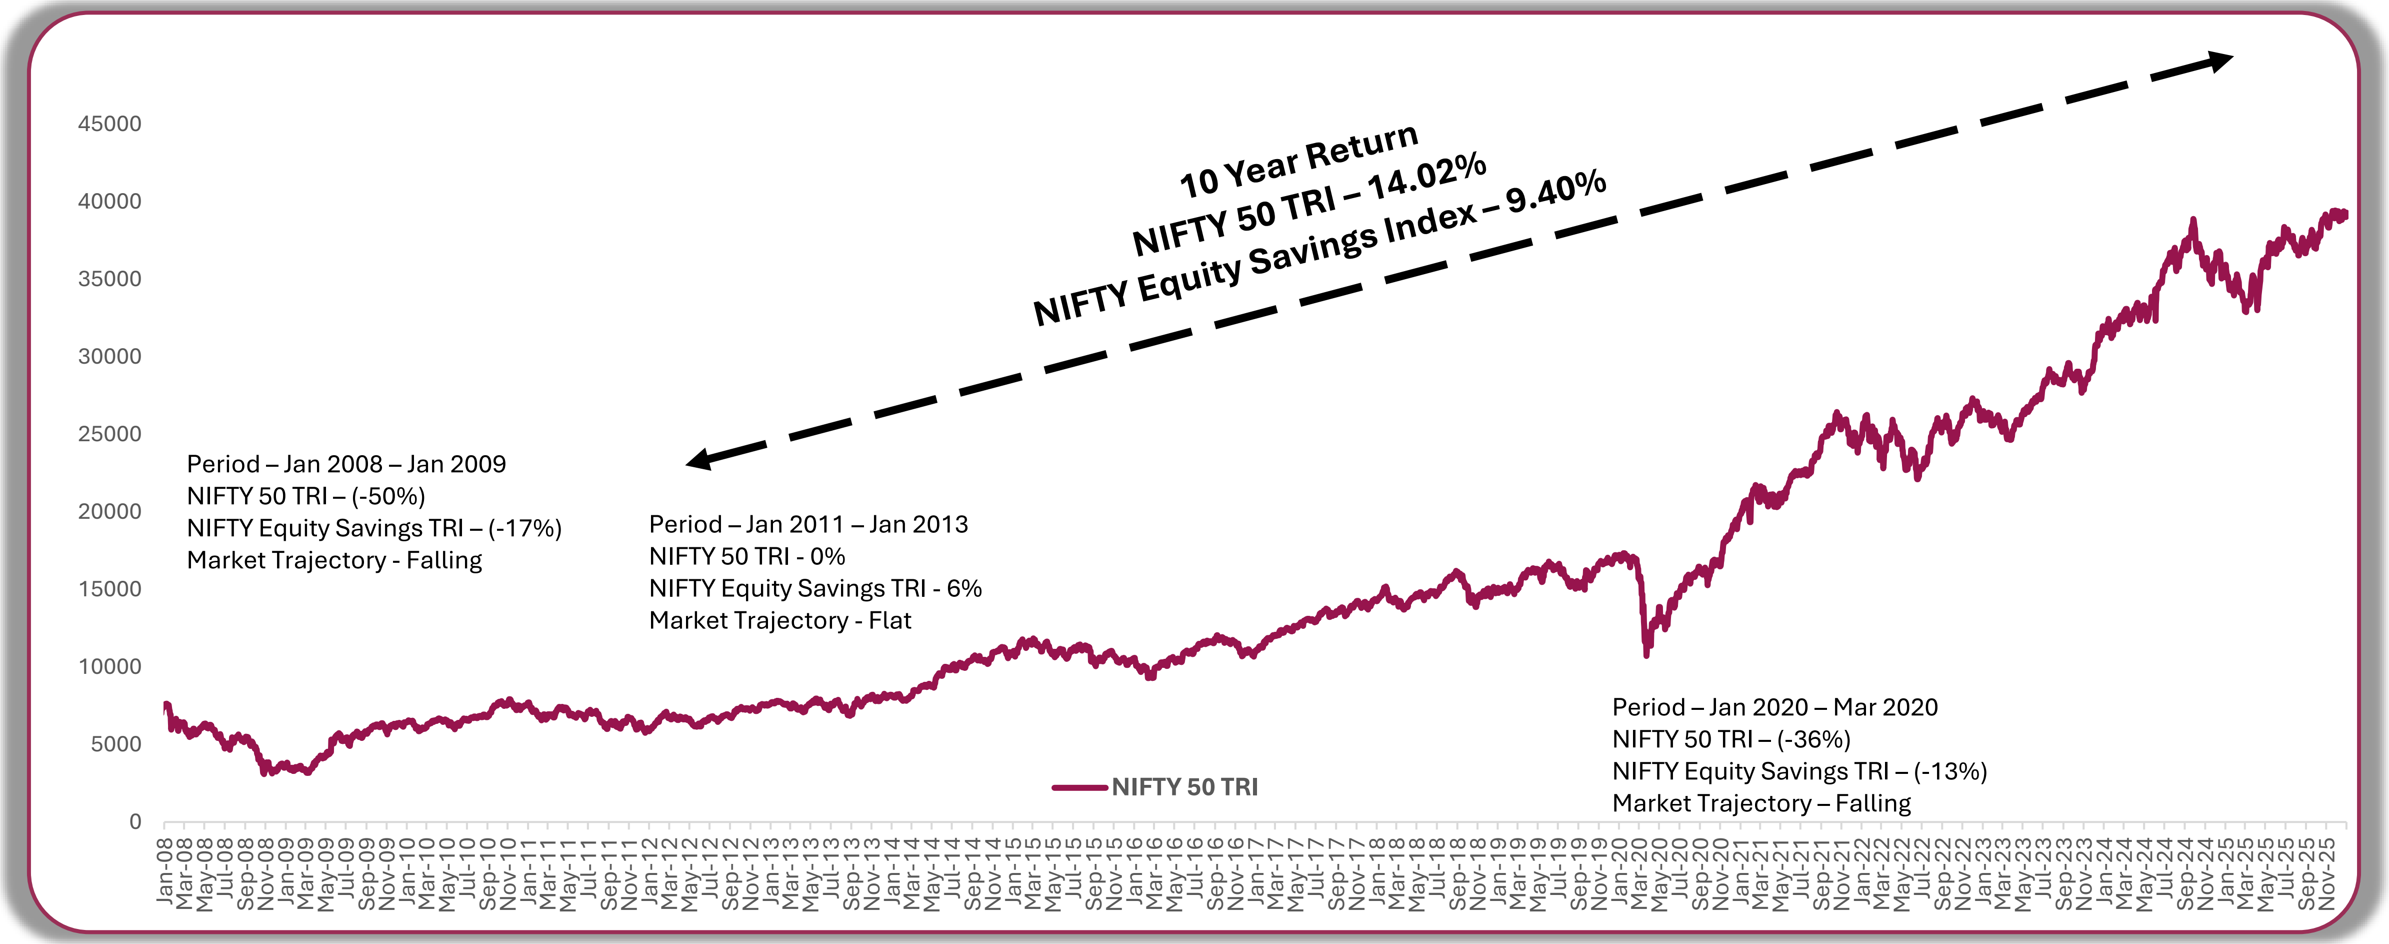
Source: NSE India, Axis MF Research. Data period : April 2011 – March 2025.
NIFTY Equity Savings TRI comprises of four components are 35 per cent exposure to Nifty 50 total return index; 30 per cent exposure to equity arbitrage (long position in Nifty 50 total return index and equivalent short position in Nifty 50 futures Index); 30 per cent exposure to Nifty short duration debt index; and 5 per cent exposure to Nifty 1D rate index. Equity is represented by the Nifty 50 TRI Index, Bonds is represented by NIFTY Composite Debt Index & cash is represented by NIFTY Liquid Index.
Past performance may or may not be sustained in future. The chart above is illustrative and is not an indication of returns.

The importance of asset allocation

Diversification: During a falling/flat market scenario Equity Savings gives better downside protection



Source: MFI explorer, Axis MF Research. Data period : Jan 2008 – Dec 2025, 10 Year return - 31st Dec 2015 – 31st Dec 2025
NIFTY Equity Savings TRI comprises of four components are 35% exposure to Nifty 50 total return index; 30% exposure to equity arbitrage (long position in Nifty 50 total return index and equivalent short position in Nifty 50 futures Index); 30% exposure to Nifty short duration debt index; and 5 per cent exposure to Nifty 1D rate index. Equity is represented by the Nifty 50 TRI Index. **Past performance may or may not be sustained in future.** The chart above is illustrative and is not an indication of returns.

Why invest in an Equity Savings Fund?

Potential for capital appreciation

Equity Savings Funds aim to generate returns higher than traditional fixed income products, such as fixed deposits. This makes it attractive for those investors who wants to earn more without taking excessive risk

Diversified Portfolio

The mix of equity, debt, and arbitrage provides diversification, which can help in reducing overall portfolio risk in a volatile market scenario

Stability

Equity Savings Funds offer relatively stable returns due to their lower equity exposure compared to pure equity funds. This fund is ideal for people who want to have a balanced approach to portfolio management.

Ideal for Conservative investors

Equity savings funds may be suitable for investors who want to invest in equity markets but are not comfortable with the high risk involved. Such investors can opt for equity savings funds, which offer exposure to equities while reducing the risk through investments in debt and arbitrage opportunities.

Current Portfolio Allocation is based on the prevailing market conditions and is subject to changes depending on the fund manager's view of the equity markets. Asset allocation mentioned above is for normal circumstances. For detailed asset allocation, please refer Scheme Information Document of the scheme.

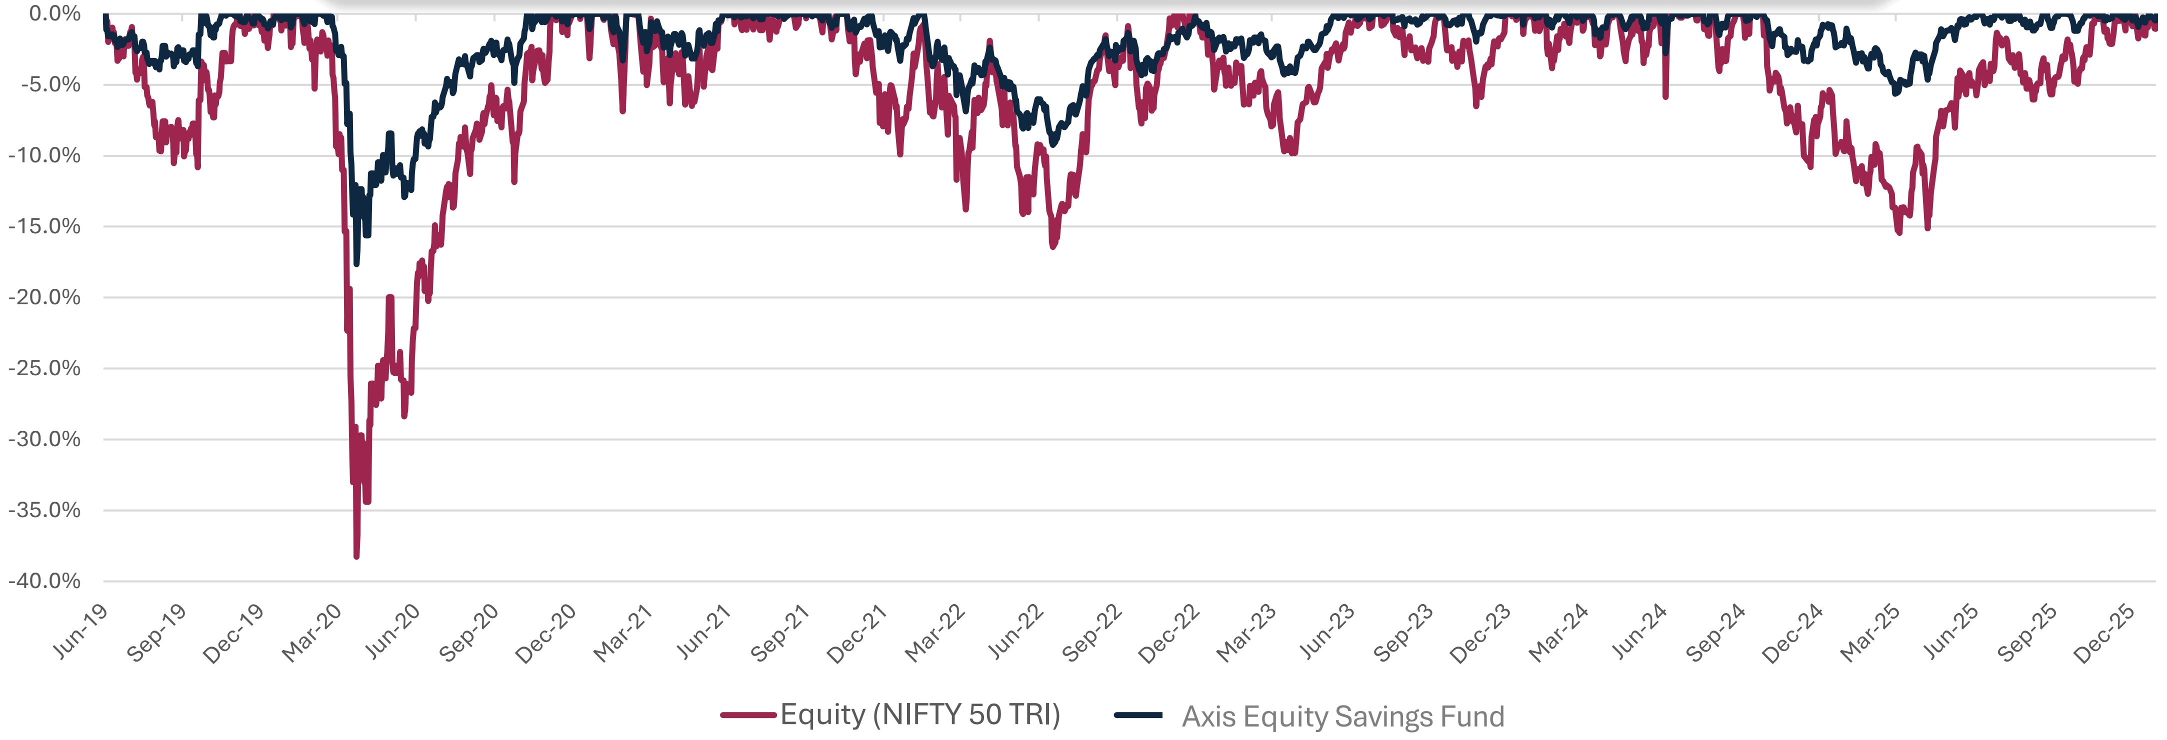
2. Diversified Portfolio

Mitigates drawdown risk and volatility

Fund has lower volatility than Nifty 50

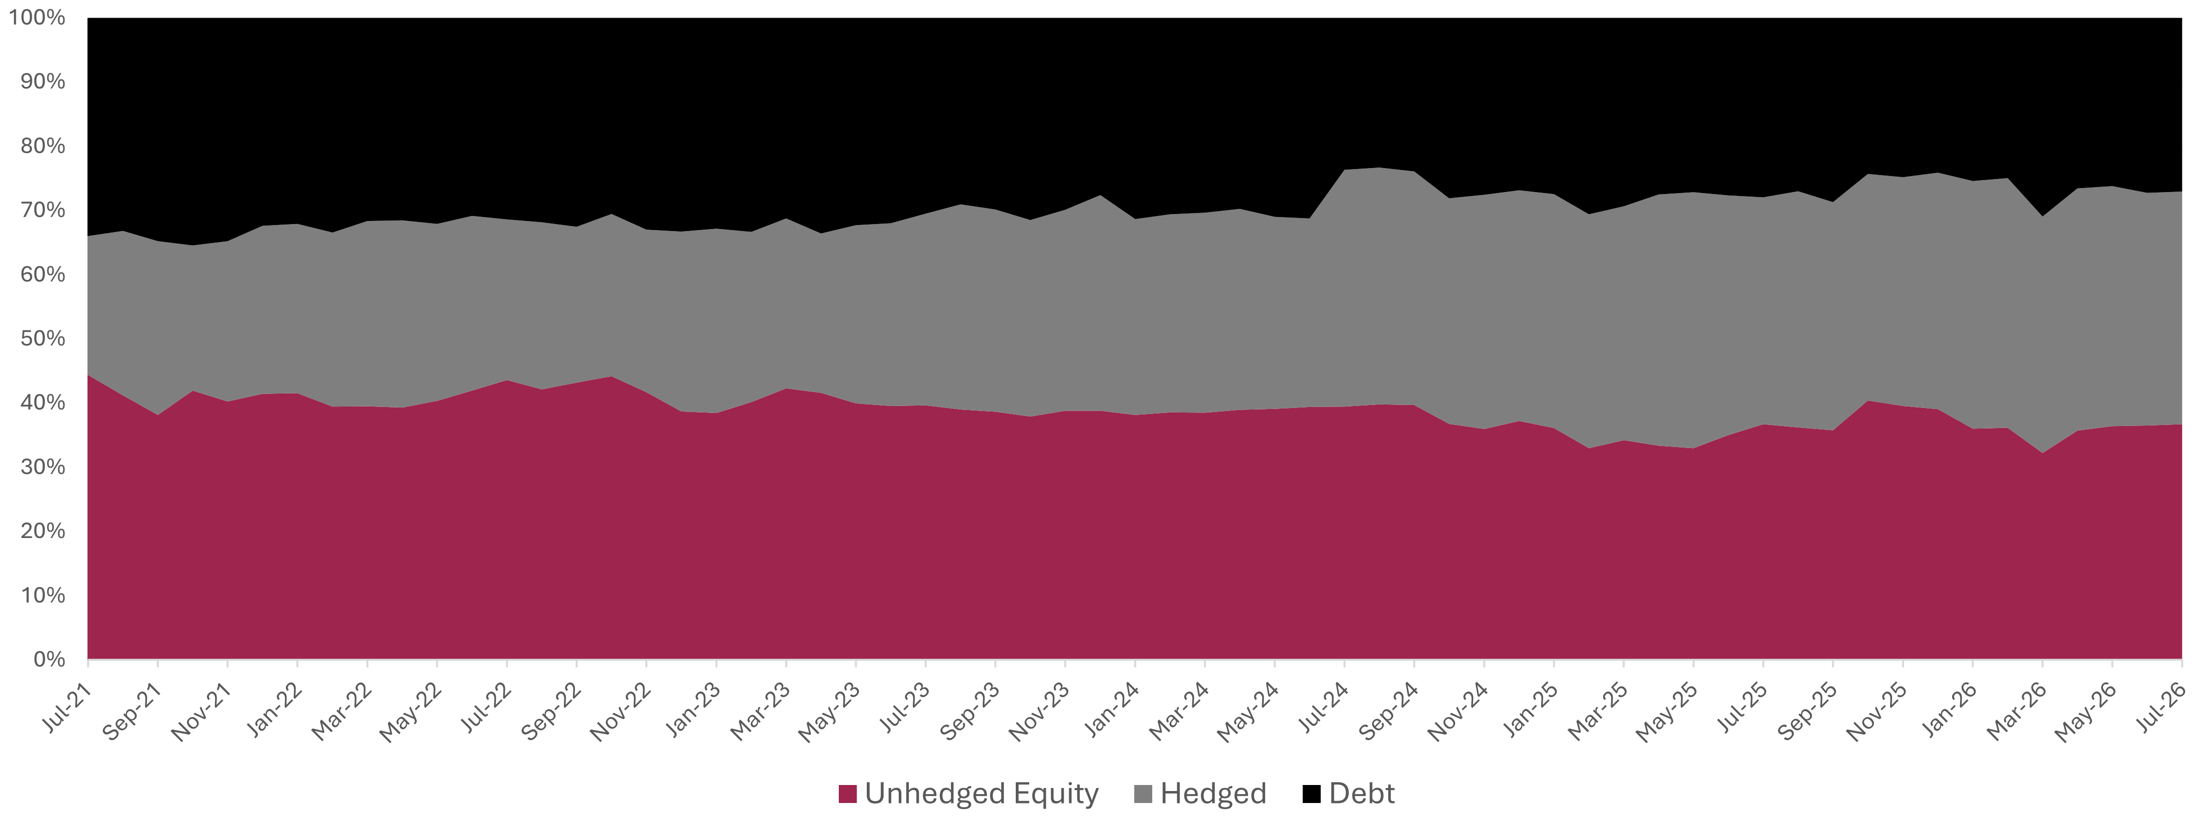


Source: NSE India, Axis MF Research. Data period : June 2019 – Dec 2025.

NIFTY Equity Savings TRI comprises of four components are 35 per cent exposure to Nifty 50 total return index; 30 per cent exposure to equity arbitrage (long position in Nifty 50 total return index and equivalent short position in Nifty 50 futures Index); 30 per cent exposure to Nifty short duration debt index; and 5 per cent exposure to Nifty 1D rate index. Equity is represented by the NIFTY 50 TRI Index. Past performance may or may not be sustained in future. The chart above is illustrative and is not an indication of returns.

3. Asset Allocation

The fund’s asset allocation has been consistent which offers stable returns



Source: NSE India, Axis MF Research. Data period : Jul 2021 – Jul 2026.
Past performance may or may not be sustained in future. The chart above is illustrative and is not an indication of returns.

Investment Strategy – Equity

Aim for Capital Appreciation

Follows a Multi cap strategy (more titled towards large caps, but also actively invests in mid and small caps)

Emphasis on quality stocks with sustainable growth potential

Bottom up stock picking approach with an endeavour to add value to investor's returns

Current Portfolio Allocation is based on the prevailing market conditions and is subject to changes depending on the fund manager's view of the equity markets. *Top 10 of Unhedged equity exposure Market caps are defined as per SEBI regulations as below: a. Large Cap: 1st -100th company in terms of full market capitalization. b. Mid Cap: 101st - 250th company in terms of full market capitalization. c. Small Cap: 251st company onwards in terms of full market capitalization.

Current Positioning – Equity

An actively managed diversified portfolio of quality growth companies using bottom-up stock picking approach.

The unhedged equity allocation has ranged between 35-45% in the last one year with a cap at 45%. Current unhedged equity allocation stands at 37%, arbitrage at 36% and debt at 27%.

The fund follows multi-cap strategy - primarily oriented toward large-caps, aiming to balance and manage risk effectively in the fund. The fund takes active bets in mid-cap and small-cap names, recognizing strong growth potential over the medium to long term. The current exposure is 72% in large-cap, 10% in mid-cap and 18% in small-cap.

The current sector/theme is balanced between Consumption, Investment and Exports.

The fund strategy remains focused on absolute return opportunities with a bias toward large caps, domestic consumption, and manufacturing-led growth, while maintaining an underweight/neutral stance in global-facing and defensive sectors.

Fixed Income - Positioning

- The fund uses an active investment strategy that aims to generate stable returns with the endeavor to capture interest rate cycles by dynamically managing the fund's duration.
- Comfort on domestic and global macros will play an important role in debt allocation.
- Aims to capitalize on the 'carry' play at the shorter end and 'duration' at the longer end.
- The fixed income allocation has high quality bias and the investments are heavily concentrated in high-grade assets (GSECS / SDLs / AAA) with a relatively smaller allocation in credits.
- Since March 2025, we have been steadily reducing portfolio duration, shifting away from long-duration strategies toward accrual-focused approaches.
- In this context, a barbell strategy emerges as the most effective approach—balancing short-tenor bonds for liquidity with long-duration bonds for tactical opportunities.
- Our preferred positioning includes 2-year AA-rated corporate bonds for steady accrual and long-tenor government securities for duration plays, offering a combination of consistent accrual and potential upside.
