Fund Manager Views

- › As medium to long-term growth is expected to be driven by both top-down themes such as manufacturing, defence, and energy transition and bottom-up momentum in consumer discretionary and industrials, the fund maintains sizable allocations across these areas, guided by bottom-up stock selection.
- › Fund tilts towards domestically focused companies with expanding market opportunities, given rising global friction. Compared to the benchmark, the fund is OW in Consumer Discretionary, Industrial Products and Healthcare. The scheme has maintained a larger allocation to the large cap segment.
- › Even though the valuation in mid and small cap segment remains high, we will continue to be selective towards midcap and small cap allocation given the growth opportunities in it.
- › In line with market dynamics, the scheme has also consolidated its positioning by increasing allocation in high conviction stocks.
