High Active Share:

The portfolio is constructed independent of benchmark weights, with investments driven by conviction rather than index representation.

Quality and Growth Focus:

Targets businesses capable of delivering sustainable ROE and ROCE over the medium to long term, with a strong emphasis on quality and growth.

Blended Investment Approach:

Combines top-down sector selection with bottom-up stock selection to identify attractive opportunities across sectors and market capitalizations.

Fund Manager's Views

The geopolitical risks remain unpredictable; accordingly, portfolio is tilted towards businesses with strong domestic demand drivers, expanding addressable markets and relatively lower dependence on global economic conditions.

Key areas of focus include **domestic manufacturing, Financials, consumer internet and healthcare**, where we believe there are attractive long-term growth opportunities.

The portfolio maintains a tilt towards large-cap companies with selective exposure to opportunities in the mid- and small-cap segments (Electronic equipment, Power and Fintech), focusing on differentiated businesses with strong competitive positioning despite elevated valuations.
