#ThePowerPackedFund**

**Potential to benefit from all the three viz large, mid & small market cap. The scheme does not guarantee any returns.

Axis Mutual Fund - MF/061/09/02

About the Fund

Investment approach

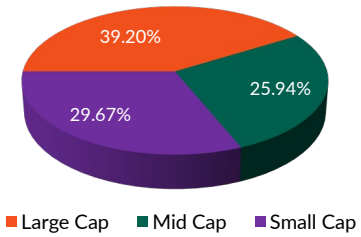

- The Fund follows a diversified investment approach across the market-cap spectrum.
- This approach balances the stability of the Large Cap segment with the growth potential of the Mid Small cap segments.

Allocation approach

- Maintains a minimum allocation of 25% each to large-cap, mid-cap, and small-cap stocks.
- The remaining 25% dynamically deployed based on the fund manager's market outlook and opportunities.

Current market cap split

(% NAV)

Key Attributes

High-conviction, market-cap diversification approach:
Focuses on capturing the best investment ideas irrespective of size, driven by bottom-up stock selection

Dynamic portfolio allocation:
Actively adjusts sector and market-cap exposure to capitalize on evolving market opportunities and valuation trends

Quality-focused investing:
Blends investment in high-quality, high ROE large-cap companies with mid-cap and small-cap businesses that offer a blend of niche companies as well as scalable business models

Fund Manager's Views

The portfolio is currently tilted towards companies demonstrating resilience to external headwinds such as crude oil volatility. In line with this, the fund maintains an overweight stance on sectors such as Banks, Auto Ancillaries, Capital goods where earnings, visibility and structural growth drivers remain strong.

The fund continues to adopt a high-conviction, bottom-up investment approach, increasing exposure to select pockets where strong fundamentals and earnings momentum are evident. While valuations currently appear more attractive in large caps than in mid and small caps, the strategy remains market-cap agnostic, allowing us to capitalize on opportunities across the spectrum as they arise.

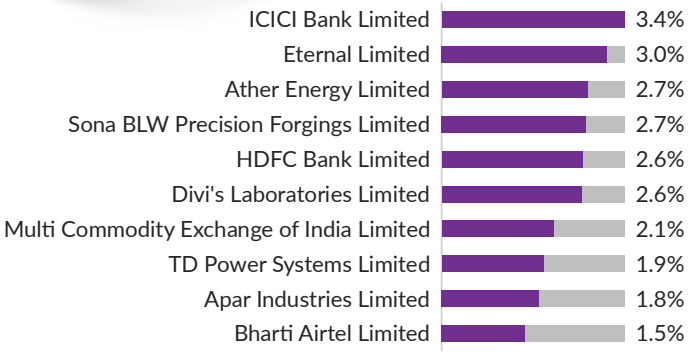

Looking ahead, the fund maintains a constructive view on domestic growth, with a preference for companies benefiting from strong internal demand, expanding addressable markets, and strong earnings growth. Accordingly, the portfolio remains tilted towards businesses with a higher dependence on domestic consumption and structural growth themes (energy transition, electrification & renewables), positioning it to participate in India's long-term growth trajectory.
