

AXIS QUANT FUND

An open ended equity scheme following a quantitative model

Axis Mutual Fund - MF/061/09/02

About the Fund

Axis Value Fund is an equity strategy that follows a value investing approach, seeking long-term capital appreciation through a diversified portfolio of companies trading below their intrinsic value. The fund aims to identify businesses with the potential for earnings improvement and valuation re-rating over time.

Key Attributes

Q-GARP Framework:

The investment process follows a proprietary Q-GARP (Quality at a Reasonable Price) philosophy, combining Quality, Growth and Valuation factors within a single framework.

Quant Meets Fundamental Research:

Blends traditional research-driven investing with quantitative screening methodologies to identify attractive investment opportunities.

Unbiased Portfolio Construction:

A rules-based approach helps reduce behavioural biases while maintaining consistency in stock selection and portfolio construction.

Multi-Factor Stock Selection:

Portfolio decisions are driven by a combination of quality characteristics, improving growth prospects and attractive valuations, rather than reliance on a single investment factor.

Fund Manager's Views

The fund follows a disciplined quantitative investment framework that combines model-driven stock selection with fund manager oversight. Stocks are screened and ranked using factors such as beta, liquidity and volatility, while incorporating qualitative governance filters.

A dynamic hedge overlay is employed to manage downside risk and portfolio volatility, with hedge exposure adjusted based on changing market conditions and technical indicators.

The fund is currently large cap tilted with top 4 allocation to Auto, finance and banks, Oil, & gas and consumer services.

Data as on 31st August, 2026

Current Portfolio Allocation is based on the prevailing market conditions and is subject to changes depending on the fund manager's view of the equity markets.
