Why Invest?

- Goal planning benefit: It is a great way to plan for your child's education or any other goal that he / she wants to pursue.
- Benefit of long-term investments: With the option of a longer holding period, you can have more time for the money to grow.
- Asset Allocation Benefit:
  - Money is invested in equities, therefore it holds great potential for long-term wealth creation.
  - Since a portion of money is also invested in debt & money market instruments, it gives the much-needed cushion in terms of relatively less volatility.

Fund Manager Views

- The easing of tensions in West Asia have significantly reduced near-term geopolitical risks and concerns over disruptions to global energy supplies. However, geopolitical risks remain unpredictable, the portfolio is tilted towards businesses with strong domestic demand drivers, expanding addressable markets and relatively lower dependence on global economic conditions.
- The fund is earnings focused on themes such as manufacturing (EMS, China +1), healthcare, power equipment & utilities, travel and select Banks and discretionary consumption which are beneficiaries of formalization and premiumization, and also immune from global uncertainties.
- On the debt side, since the fund has gradually shifted from long-duration strategies towards accrual-oriented opportunities, with a preference for high-quality corporate bonds and selective government security exposure through a barbell strategy.
