Fund Manger Views

- Rising geopolitical tensions in West Asia triggered a steep surge in crude oil prices. This sudden spike significantly worsened the global macro backdrop and amplified concerns around inflation, growth, and external balances. We believe at this juncture; impact of the global events is highly unpredictable. Portfolio tilt is towards companies with higher dependence on domestic markets/consumers and expanding could addressable market opportunities, emerge as potential winners in the near future.
- Fund will increase the top down alignment, however, be watchful of factors like business phase, valuation peaking phase
- The focus is to increase allocation to improved earning names and consolidate at high valuation-low growth stories name.
- The fund is focusing on companies with emphasis on domestic manufacturing, consumer internet and healthcare.
- Allocation to the individual positions is driven by choosing businesses having better competitiveness along with capturing major themes mentioned above.
- The scheme has maintained a larger allocation to the large cap segment with a dynamic allocation to the mid and small cap segment. Even though the valuation in mid and small cap segment remains high, we will continue to be selective and buy differentiated names in midcap and small cap allocation.
