

AXIS MOMENTUM FUND

(An open-ended equity scheme following the momentum theme)

About the Fund

The Axis Momentum Fund is an actively managed thematic fund that leverages momentum as its core strategy. It employs price trends and a model-based approach for selecting stocks and constructing its portfolio. The fund utilizes an in-house model for stock selection, focusing on price trends and risk factors such as stock liquidity and other portfolio level constraints. This approach aims to enhance risk management and achieve better risk-adjusted performance.

Why Axis Momentum Fund

The Axis Momentum Fund is a thematic fund that offers a unique investment opportunity by leveraging the momentum strategy, active management, and robust risk management to potentially deliver superior returns. This fund employs a model-driven approach, systematically identifying and investing in high-momentum securities across various sectors. The framework filters securities by considering data availability and liquidity, and then evaluates them based on price momentum trends.

Momentum as a strategy is a dynamic signal, and the active management of the momentum strategy in the Axis Momentum Fund allows it to capture opportunities as market dynamics evolve. This makes it a flexible and responsive investment option.

Momentum investing can be a powerful tool when combined with a diversified asset allocation strategy. By incorporating momentum funds alongside broad-based index funds, investors can benefit from high-performing stocks while managing overall portfolio risk.

Fund Manager Views

- Axis Momentum Fund invests in a portfolio of established recent winners as measured through price momentum. We look at price momentum across different time horizon to identify opportunities. By focusing on risk in addition to Momentum and rebalancing the portfolio frequently the fund intends to leverage on the dynamic nature of price momentum.
- The momentum strategy is relatively aggressive compared to the broad market strategies and hence this approach can lead to higher volatility, especially during market downturns.
- The fund has shown relatively better resilience vs other momentum indices/passive peers during last one year.
