

# AXIS MULTI-ASSET ACTIVE FOF

(An open-ended fund of funds scheme investing in units of equity-oriented and debt-oriented mutual fund schemes and commodity based ETFs)

## About the Fund

Axis Multi Asset Active FoF dynamically allocate investments across multiple asset classes, aiming to capture opportunities as market conditions and themes evolve. Different asset classes tend to perform well during different market cycles, and this fund seeks to actively position itself to benefit from prevailing trends.

### Dynamic Equity allocation

10-80% of the portfolio across market cap

### Flexibility to ride the debt cycle

10-80% Active call on duration with tilt towards high quality portfolio in the underlying schemes

### Higher exposure optionality to Gold & Silver

10-35% active call between Gold and silver ETFs

## Investment approach

### Allocation range by internal model

The model is built around four key pillars—Valuations, Macro Indicators, Trends, and Commodities factors.

### Allocation further guided by internal committee

The non-quantifiable factors like geo-political scenarios, events and market expectations that impact the trend in the market across asset classes. The committee will actively guide on asset allocation.

### What to buy based on allocation?

Fund manager will actively take the underlying allocation call based on market view and underlying fund positioning.

- Equity investments span across all market caps, diversified and thematic funds.
- Debt funds are dynamically selected based on duration, demand-supply and credit view.
- Tactical decisions are made between gold and silver exposure

## Fund Manager Views

- Markets have been in a correction mode over the past one and half years, as moderation in growth has been met by global uncertainties, including tariff war and the recent Iran—US-Israel war. Large cap Valuation is now more reasonable compared to its 5-year average valuations.
- Rising geopolitical tensions in West Asia triggered a steep surge in crude oil prices. This sudden spike significantly worsened the global macro backdrop and amplified concerns around inflation, growth, and external balances.
- The fund will continue to take exposure in thematic/sector funds like banks, energy, FMCG etc. This will be complemented by allocations to broad-based diversified funds to ensure balance and risk mitigation.
- On fixed income side, we remain inclined toward lower-duration, accrual-oriented strategies.
- After a spectacular run-up, gold's and silver fortunes turned abruptly in the latter part of Q1 2026. . The downturn began with the widespread unwinding of leveraged positions as investors booked profits. The subsequent escalation in the US-Iran conflict pushed oil prices sharply higher, stoking inflation concerns. This, in turn, led to tighter global liquidity conditions and a stronger U.S. dollar, while falling surplus in parts of the Middle East further weighed on falling gold prices.
