

AXIS AGGRESSIVE HYBRID FUND

An open ended hybrid scheme investing predominantly in equity and equity related instruments

(Formerly known as Axis Equity Hybrid Fund)

About the Fund

Axis Aggressive Hybrid Fund is an open ended hybrid scheme investing in equity as well as debt instruments. The fund has a balanced approach to investment with an asset allocation to both asset classes. The fund is categorized as an aggressive hybrid fund as it invests majority of the portfolio in equity and the balance in debt

Large cap biased strategy –
Equity – 65-80%

Tactical approach across
sovereign bonds and
corporate bonds – Debt –
20-35%

Eligible for equity
taxation

#The above framework is broadly indicative and the fund manager may change the framework depending on the market conditions

Why Invest?

- Multi-asset strategy helps in portfolio diversification
- Combining asset classes with low or negative correlation reduces investment risk and captures potential upside
- Gives a balance of mix asset classes while maintaining equity taxation attributes
- Emphasis on quality portfolio

Investment Approach

- ▶ **Equity** - The fund typically invests 50-70% of its portfolio in large cap companies with stable growth metrics and consistently high ROE/ROCE numbers. The mid and small cap companies generally comprise of 10-30% of the portfolio. These are companies which have high growth and disruptive business models.
- ▶ The fund invests 0-10% of the its portfolio in event specific ideas and the balance in frontier ideas. These are companies with favorable cyclical tailwinds and beta plays.
- ▶ **Debt** - The fixed income portion of the fund has a target portfolio duration of 1-7 years. The fund is actively managed and has a diversified portfolio. It is a mix of high quality corporate bonds and G-secs.
- ▶ It aims to capture opportunities in the yield curve spreads in the short to medium duration segment.

Fund Manager Views

- ▶ Rising geopolitical tensions in West Asia triggered a steep surge in crude oil prices. This sudden spike significantly worsened the global macro backdrop and amplified concerns around inflation, growth, and external balances.
- ▶ Indian equities have demonstrated an ability to recover once uncertainty subsides, provided oil prices stabilise and there is no prolonged disruption to shipping or energy supply. However, if crude prices remain elevated for an extended period, markets could begin pricing in higher inflation, a weaker rupee, fewer interest rate cuts, and potential earnings downgrades for oil-sensitive sectors. In such a scenario, volatility is likely to remain elevated, with performance diverging sharply between resilient and vulnerable segments of the market.
- ▶ Valuations have adjusted meaningfully over the month, improving the risk-reward balance across several parts of the market. The sharp correction has led to derating across large-cap as well as mid- and small-cap stocks, reducing some of the excesses that had built up over the past year. That said, valuations remain mixed.
- ▶ The fund continues to remain overweight on Capital Goods, focusing on companies well positioned to benefit from the China+1 strategy and the Government's Make in India initiative. It also maintains a constructive outlook on the Healthcare space, particularly hospital and diagnostic chains that are expanding their footprint across multiple cities through a mix of organic growth and strategic acquisitions. Within Financial Services, the portfolio is skewed towards NBFCs and Housing Finance Companies, underpinned by strong and sustained credit demand.
- ▶ On the Debt side, Since February 2025, we have been steadily reducing portfolio duration, shifting away from long-duration strategies toward accrual-focused approaches. Our preferred positioning includes 2-year AA-rated corporate bonds for steady accrual and long-tenor government securities for duration plays, offering a combination of consistent accrual and potential upside.

Portfolio Update

(30th March 2026)

EQUITY PORTION

Large Cap	79.00%
Midcap	8.96%
Smallcap	12.04%

FIXED INCOME PORTION

Residual Maturity	3.17 years	Mod Duration	2.31 years
Annualized Portfolio YTM [^] *	8.00 %	Macaulay Duration	2.44 years

[^]The yield to maturity given above is based on the debt portfolio of funds as on date given above. This should not be taken as an indication of the returns that may be generated by the fund and the securities bought by the fund may or may not be held till their respective maturities. The calculations are based on the invested corpus. *In case of semi annual YTM, it will be annualised.

Note: Portfolio allocation, maturity & duration is based on the current market conditions and is subject to changes depending on the fund manager's view of the markets.
