What is Factor Investing?

Factor Investing – Combination of both worlds

Factor investing sits between Active and Passive investing and looks to combine the best of both worlds

| Passive Investing | Factor Investing | Active Investing |
|-----------------------------|--|--|
| Market Return | Combination of both worlds (beta and alpha) (aka - Smart Beta / Factors) | Potential to outperform market |
| Low cost | | Stock Selection based on stock attributes |
| Rule based framework | | Fund Manager risk |
| Transparent | | Identify factors to generate alpha |

Chart above is to explain the concept of factor investing; however, the scheme (underlying) follows a passive investing strategy.

What are Factors?

A factor is any characteristic that helps explain the long-term risk and return of an asset/stock.

Among many, commonly **popular factors are Momentum, Low Volatility, Quality and Value.**

Like in cricket attacking, classic and defensive batsmen play an important role to build solid batting lineup; adding factor(s) to your portfolio, could make difference to your portfolio performance.

Attack

Momentum investing capitalizes aggressively during the bull markets, similar to an **attacking batsman**.

Class

Value investing relates to classic approach and performs during recovery phase like a **batsman's class** to build solid innings.

Defence

Low volatility & Quality investing aims for stable returns while reducing risk like a **defensive batsman** protecting their wicket.

Are you a Factor investor?

Do you look for one or more of the following when selecting which stocks to invest in?

Introducing the 'Value' factor

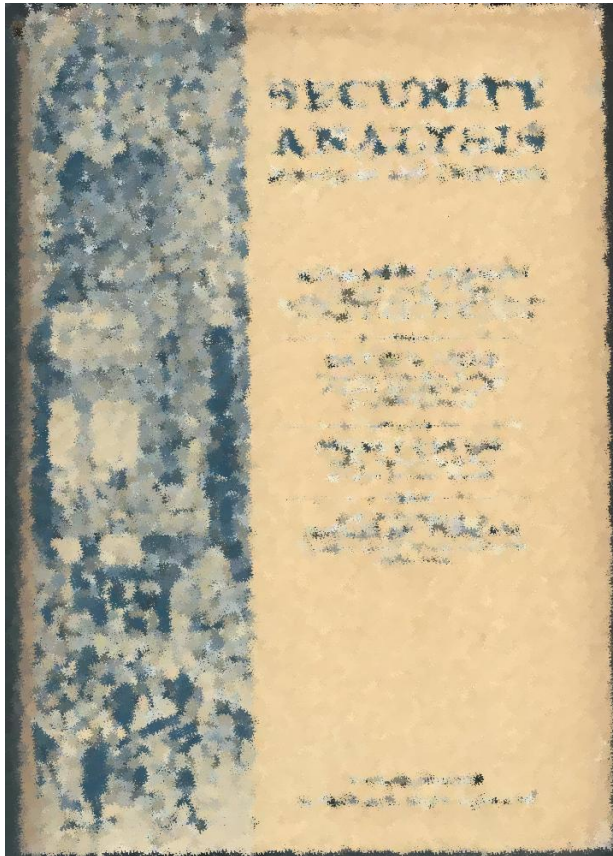

What is Value?

If you do any or all of the following, **you are a 'Value' investor**

- Buying a mobile phone online – **wait till late night for prices to drop**
- Booking a flight ticket – **juggle between different credit cards for best offers**
- Shopping at town's popular mall – **wait for Monsoon or Diwali sale**
- Booking a table at fine dine restaurant – **book through an app that offers highest discount**
- Investing in a company – **prefer stocks at less expensive valuation multiples**

In essence, we are trying to get certain value at lower price.

Oldest styles of investing

- The **book “Security Analysis”** written by Benjamin Graham and David Dodd, **first published in 1934**.
- This book is **considered a foundational text** in the field of **value investing**.
- **It widely used factor globally as well as in India.**

Source:

https://web.archive.org/web/20170808215345id_/http://s3.amazonaws.com/zanran_storage/faculty.haas.berkeley.edu/ContentPages/2529798149.pdf

Principle of Value Investing

In the **realm of Investing**

Philosophy - The Value factor is based on a notion that **stocks that are inexpensive** relative to some measure of fundamental value, **outperform those that are pricier in the long term.**

At the core of value investing is the belief that “cheaply” valued assets tend to outperform “richly” valued assets over a long horizon.

How does Value Investing work?

1

**Buy stock that
are trading at
attractive
valuations**

"We know from experience that eventually the market catches up with **value**. It realises it in one way or another." Benjamin Graham 1955.

How does Value Investing work?

"We know from experience that eventually the market catches up with **value**. It realises it in one way or another." Benjamin Graham 1955.

How does Value Investing work?

"We know from experience that eventually the market catches up with value. It realises it in one way or another." Benjamin Graham 1955.

Finding Value Stocks

Know your 'Value' descriptors

| P/E Price to Earnings | P/BV Price to Book Value | P/S Price to Sales | Dividend Yield |
|--|--|---|--|
| <ul style="list-style-type: none">• Earnings per share (EPS) compared to stock's price• Lower P/E multiple indicates better earnings per share in relation to stock's price | <ul style="list-style-type: none">• Book Value per share compared to stock's price• Book Value of company indicates net worth of the company• Lower P/BV means higher book value for the stock price | <ul style="list-style-type: none">• Sales per share compared to stock's price• Lower P/S multiple indicates attractive valuation | <ul style="list-style-type: none">• Dividend per share compared to stock's price• Higher dividend paid per stock indicates good value stock |
| Lower the better | Lower the better | Lower the better | Higher the better |

Explainer - **Book value is the value of a company's assets after netting out its liabilities. It approximates the total value shareholders would receive if the company were liquidated.*
