

AXIS CHILDREN'S FUND

(An open-ended fund, for investment for children, having a lock-in of 5 years or till the child attains age of majority (whichever is earlier)
(Formerly known as Axis Childrens Gift Fund)

About the Fund

- An open ended fund, for investment for children
- Investments can be made only in the name of a minor child (Child should be less than 18 years of age on the date of investment)
- 5 year lock-in or till the child attains age of majority (whichever is earlier)
- Investors/applicants could be parents, step-parents or grandparents, adult relatives, friends (including NRIs & PIOs) or HUF

Fixed Income
Strategy – 20-35%;
Equity strategy – 65-80%

Flexibility to invest in the entire
range of debt instruments across
the yield curve

Focus on building a
diversified portfolio of
strong growth companies

Active management with
bottom-up stock
selection strategy

*The above framework is broadly indicative and the fund manager may change the framework depending on the market conditions

Why Invest?

- Goal planning benefit: It is a great way to plan for your child's education or any other goal that he / she wants to pursue.
- Benefit of long-term investments: With the option of a longer holding period, you can have more time for the money to grow.
- Asset Allocation Benefit:
 - Money is invested in equities, therefore it holds great potential for long-term wealth creation.
 - Since a portion of money is also invested in debt & money market instruments, it gives the much-needed cushion in terms of relatively less volatility.

Fund Manager Views

- Near-term market direction is likely to remain driven by global developments - particularly movements in crude oil prices, geopolitical headlines, and capital flows. From a sectoral and company-level perspective, the impact of the conflict is uneven. Energy remains the most directly affected sector: upstream producers benefit from higher realizations, while downstream PSU oil marketing companies face margin pressure due to limited pricing flexibility. Fuel-intensive sectors such as aviation, logistics, and transportation experience immediate cost pressures. Autos, pharmaceuticals, and industrials face indirect headwinds through higher input costs and softer demand sentiment. Consumer companies are impacted primarily through inflationary pressures rather than direct exposure. Financials and IT services have corrected largely due to macro uncertainty, capital flow concerns, and global risk aversion, rather than balance sheet stress or structural demand impairment.
- Historically, Indian equities have demonstrated an ability to recover once uncertainty subsides, provided oil prices stabilise and there is no prolonged disruption to shipping or energy supply. However, if crude prices remain elevated for an extended period, markets could begin pricing in higher inflation, a weaker rupee, fewer interest rate cuts, and potential earnings downgrades for oil-sensitive sectors. In such a scenario, volatility is likely to remain elevated, with performance diverging sharply between resilient and vulnerable segments of the market.
- The fund is earnings focused towards themes such as manufacturing (EMS, China +1), healthcare, power equipment & utilities, travel and select Banks and discretionary consumption which are beneficiaries of formalization and premiumization, and also immune from global uncertainties.
- The Government announcement on GST cuts has improved sentiment in discretionary consumption stocks. We have been steadily increasing exposure to discretionary consumption stocks such as retail, jewellery, travel/tourism etc
- On the debt side, Since February 2025, we have been steadily reducing portfolio duration, shifting away from long-duration strategies toward accrual-focused approaches. This year, we see accrual and selective tactical duration as the dominant themes, particularly in long bonds and state development loans (SDLs).
- Our preferred positioning includes 2-year AA-rated corporate bonds for steady accrual and long-tenor government securities for duration plays, offering a combination of consistent accrual and potential upside.
