

# AXIS RETIREMENT FUND - AGGRESSIVE PLAN

An open-ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier)  
(Formerly known as Axis Retirement Savings Fund - Aggressive Plan)

## About the Fund

The fund aims to help investors with their retirement planning. It aims to generate long term capital appreciation by investing primarily in equity and equity related instruments, along with regular income through investments in debt and money market instruments. Within equities and fixed income, the portfolio would be actively managed to optimize returns within the respective asset class.

Aggressive Plan

Ideal for young investors in the early stages of their careers

Equity exposure 65-80%.  
Rest spread across other asset classes\*

Default retirement age: 58 years. Please refer to SID for detailed investment strategy and asset allocation

\*Other asset classes include Debt & Money Market Instruments, Gold ETF and InvITs.

†The above framework is broadly indicative and the fund manager may change the framework depending on the market conditions

## How does Asset Allocation benefit investor portfolios

- **Lower Correlation among asset classes**  
When equity and debt don't move in the same direction, the risk quotient is lower
- **Periodic Rebalancing**  
Lowers overall risk and optimizes risk, making it cost & tax efficient for investors and lower overall risks.
- **Reasonable downside protection**  
Aims to limit the impact of potential losses from market downturns.
- **Benefit from active management**  
Through research by fund managers to actively allocate assets.

Current Portfolio Allocation is based on the prevailing market conditions and is subject to changes depending on the fund manager's view of the equity markets.

## Investment approach

- › **Equity**  
Large cap biased best ideas strategy with a bottom up approach to investing. The portfolio will be a compact portfolio of quality stocks that offer long-term sustainable growth opportunities with a competitive market advantage.
- › **Debt**  
The debt portion will be dynamically managed across duration and the credit spectrum. The fund will follow an active investment strategy that aims to generate absolute returns with the endeavor to capture opportunities across interest rate cycles by actively managing the duration and credit allocation of the fund's portfolio.

## Fund Manger Views

- › Rising geopolitical tensions in West Asia triggered a steep surge in crude oil prices. This sudden spike significantly worsened the global macro backdrop and amplified concerns around inflation, growth, and external balances.
- › Looking ahead, near-term market direction is likely to remain driven by global developments - particularly movements in crude oil prices, geopolitical headlines, and capital flows. From a sectoral and company-level perspective, the impact of the conflict is uneven. Energy remains the most directly affected sector: upstream producers benefit from higher realizations, while downstream PSU oil marketing companies face margin pressure due to limited pricing flexibility.
- › Historically, Indian equities have demonstrated an ability to recover once uncertainty subsides, provided oil prices stabilise and there is no prolonged disruption to shipping or energy supply. However, if crude prices remain elevated for an extended period, markets could begin pricing in higher inflation, a weaker rupee, fewer interest rate cuts, and potential earnings downgrades for oil-sensitive sectors. In such a scenario, volatility is likely to remain elevated, with performance diverging sharply between resilient and vulnerable segments of the market.
- › Fund is pro-cyclical and earnings focused towards themes such as manufacturing (EMS, China +1), strong growth in some of the sectors such as healthcare, travel, auto and other discretionary consumption which are beneficiaries of formalization and premiumization, and also immune from global uncertainties.
- › On the Debt side, Since February 2025, we have been steadily reducing portfolio duration, shifting away from long-duration strategies toward accrual-focused approaches. This year, we see accrual and selective tactical duration as the dominant themes, particularly in long bonds and state development loans (SDLs).
- › Our preferred positioning includes 2-year AA-rated corporate bonds for steady accrual and long-tenor government securities for duration plays, offering a combination of consistent accrual and potential upside.
