I. INTRODUCTION

A. RISK FACTORS

i. Standard Risk Factors:
   - Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
   - As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
   - Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
   - Axis Global Equity Alpha Fund of Fund is the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
   - The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Fund.
   - Axis Global Equity Alpha Fund of Fund is not a guaranteed or assured return scheme.

ii. Scheme Specific Risk Factors

Risk factors for a Fund of Funds Scheme
The Scheme will be investing primarily in shares / units of the underlying fund, which in turn invests in global equities. Hence the Scheme’s performance may depend upon the performance of the underlying fund. Any change in the investment policy or the fundamental attributes of the underlying fund will affect the performance of the Scheme.

Investments in the underlying fund, which is an equity fund, will have all the risks associated with investments in equity and the offshore markets.

The portfolio disclosure of the Scheme will be largely limited to the investments made by the Scheme.

Risk Factors for the Underlying Fund
The performance of the underlying fund will be affected by a number of risk factors, including the following, some of which have also been disclosed by the underlying fund in its prospectus filed with the appropriate regulatory authorities.

General Risks: Past performance is not a guide to future performance and investments, should be regarded as a medium to long-term investment. The value of investments and the income generated by them may go down as well as up and investors may not get back the amount originally invested. Where the fund Currency varies from the Investor's home currency, or where the Underlying Fund Currency varies from the currencies of the markets in which the Underlying Fund invests, there is the prospect of additional loss (or the prospect of additional gain) to the Investor greater than the usual risks of investment.

Investment Objective Risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macroeconomic environment, investment objectives may become more difficult or even impossible to achieve. There is no express or implied assurance as to the likelihood of achieving the investment objective for Underlying Fund.

Regulatory Risk: Investors should note that all the regulatory protections provided by their local regulatory authorities may not apply. Additionally, the Underlying Fund will be registered in non-EU jurisdictions. As a result of such registrations the Underlying Fund may be subject, without any notice to the investors in the Underlying Fund concerned, to more restrictive regulatory regimes. In such cases the Underlying Fund will abide by these more restrictive requirements. This may prevent the Underlying Fund from making the fullest possible use of the investment limits.
Business, Legal and Tax Risks: In some jurisdictions the interpretation and implementation of laws and regulations and the enforcement of shareholders’ rights under such laws and regulations may involve significant uncertainties. Furthermore, there may be differences between accounting and auditing standards, reporting practices and disclosure requirements and those generally accepted internationally. Underlying Fund may be subject to withholding and other taxes. Tax law and regulations of any jurisdiction are frequently reviewed and may be changed at any time, in certain cases with retrospective effect. The interpretation and applicability of tax law and regulations by tax authorities in some jurisdictions are not consistent and transparent and may vary from jurisdiction to jurisdiction and/or region to region. Any change in taxation legislation could affect the value of the investments held by and the performance of the Underlying Fund.

Risk Factors Relating to Industry Sectors / Geographic Areas: Underlying Fund that focus on a particular industry or geographic area are subject to the risk factors and market factors which affect this particular industry or geographic area, including legislative changes, changes in general economic conditions and increased competitive forces. This may result in a greater volatility of the Net Asset Value of the Underlying Fund. Additional risks may include greater social and political uncertainty and instability; and natural disasters.

Derivatives Risk:
For Underlying Fund that uses derivatives to meet its specific investment objective, there is no guarantee that the performance of the derivatives will result in a positive effect for the Underlying Fund.

Smaller Companies Risk:
Underlying Fund which invests in smaller companies may fluctuate in value more than other Funds. Smaller companies may offer greater opportunities for capital appreciation than larger companies, but may also involve certain special risks. They are more likely than larger companies to have limited product lines, markets or financial resources, or to depend on a small, inexperienced management group. Securities of smaller companies may, especially during periods where markets are falling, become less liquid and experience short-term price volatility and wide spreads between dealing prices. They may also trade in the OTC market or on a regional exchange, or may otherwise have limited liquidity. Consequently, investments in smaller companies may be more vulnerable to adverse developments than those in larger companies and the Fund may have more difficulty establishing or closing out its securities positions in smaller companies at prevailing market prices. Also, there may be less publicly available information about smaller companies or less market interest in the securities, and it may take longer for the prices of the securities to reflect the full value of the issuers’ earning potential or assets.

Initial Public Offerings Risk:
Underlying Fund may invest in initial public offerings, which frequently are smaller companies. Such securities have no trading history, and information about these companies may only be available for limited periods. The prices of securities involved in initial public offerings may be subject to greater price volatility than more established securities.

Emerging and Less Developed Markets Securities Risk:
Investing in emerging markets and less developed markets securities poses risks different from, and/or greater than, risks of investing in the securities of developed countries. These risks include; smaller market-capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible repatriation of investment income and capital.

In addition, foreign Investors may be required to register the proceeds of sales, and future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization or the creation of government monopolies. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging and less developed countries.

Although many of the emerging and less developed market securities in which Underlying Fund may invest are traded on securities exchanges, they may trade in limited volume and may encounter settlement systems that are less well organized than those of developed markets. Supervisory
authorities may also be unable to apply standards that are comparable with those in developed markets. Thus there may be risks that settlement may be delayed and that cash or securities belonging to the Underlying Fund may be in jeopardy because of failures of or defects in the systems or because of defects in the administrative operations of counterparties. Such counterparties may lack the substance or financial resources of similar counterparties in a developed market. There may also be a danger that competing claims may arise in respect of securities held by or to be transferred to the Underlying Fund and compensation schemes may be non-existent or limited or inadequate to meet the Underlying Fund's claims in any of these events.

Additional risks of emerging market securities may include: greater social, economic and political uncertainty and instability; more substantial governmental involvement in the economy; less governmental supervision and regulation; unavailability of currency hedging techniques; companies that are newly organized and small; differences in auditing and financial reporting standards, which may result in unavailability of material information about issuers; and less developed legal systems.

In addition, taxation of interest and capital gains received by non-residents varies among emerging and less developed markets and, in some cases may be comparatively high. There may also be less well-defined tax laws and procedures and such laws may permit retroactive taxation so that the Fund could in the future become subject to local tax liabilities that had not been anticipated in conducting investment activities or valuing assets.

**Currency risk** – The assets in which the underlying fund is invested and the income from the assets will or may be quoted in currencies which are different from the underlying fund’s base currency. The performance of the underlying fund will therefore be affected by movements in the exchange rate between the currencies in which the assets are held and the underlying funds’ base currency and hence there can be the prospect of additional loss or the prospect of additional gain to the investors greater than the usual risks of investment. The performance of the underlying fund may also be affected by changes in exchange control regulations.

**Settlement Risks** - The securities markets in some countries lack the liquidity, efficiency and regulatory and supervisory controls of more developed markets. Lack of liquidity may adversely affect the ease of disposal of assets. The absence of reliable pricing information in a particular security held by the underlying fund may make it difficult to assess reliably the market value of assets. The share register of companies in which the underlying fund invests in may not be properly maintained and the ownership or interest may not be (or remain) fully protected.

Registration of Securities may be subject to delay and during the period of delay it may be difficult to prove beneficial ownership of the Securities. The provision for custody of assets may be less developed than in other more mature markets and thus provides an additional level of risk for the fund. Settlement procedures may be less developed and still be in physical as well as in dematerialized form.

**Risks associated with investments in Equity and Equity related instruments**

- Equity and equity related instruments are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, currency exchange rates, changes in law/ policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual securities, a specific sector or all sectors.
- Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.

- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors/unitholders, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Risks associated with investing in foreign securities/overseas investments/offshore securities
- Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.

- Investment in Foreign Securities involves a currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

Risks associated with investments in Fixed Income Securities

- **Interest-Rate Risk**: Fixed income securities such as government bonds, corporate bonds, money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.

- **Re-investment Risk**: Investments in fixed income securities carry re-investment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

- **Basis Risk**: The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.

- **Spread Risk**: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

- **Liquidity Risk**: The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.

- **Liquidity Risk on account of unlisted securities**: The liquidity and valuation of the Schemes’ investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

- **Credit Risk**: This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the
credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

**Settlement Risk:** Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

**Risks associated with Repo transactions in Corporate Bonds**
The Scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo transactions, the collateral may be sold and a loss is realized only if the sale price is less than the repo amount. The risk is further mitigated through over-collateralization (the value of the collateral being more than the repo amount).

**Risks associated with Segregated Portfolio**
1. Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
2. Security comprises of segregated portfolio may not realise any value.
3. Listing of units of segregated portfolio on recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

**Risk Factor associated with Debt instruments having Credit enhancement:**
The Scheme may invest in debt instruments having credit enhancement backed by equity shares/guarantees or other any assets as collateral. The profile of these issuers tend to be relatively weak and there may be a pledge of shares of a related party to enhance credit quality or guarantees provided or any other asset provided as security acceptable to lenders.

Where equity shares are provided as collateral there is the risk of sharp price volatility of underlying securities which may lead to erosion in value of collateral which may affect the ability of the fund to enforce collateral and recover capital and interest obligations. Also there is a possibility of guarantor going insolvent which also can impact the recovery value of exposure. In case of credit enhanced structures backed by equity share the liquidity of the underlying shares may be low leading to a lower recovery and a higher impact cost of liquidation. In case of other assets provided recovery value and enforce ability of asset can also be a risk factor which can lower the recovery value.

**Risk associated with Securitized Debt**
The Scheme may invest in domestic securitized debt such as Asset Backed Securities (ABS) or Mortgage Backed Securities (MBS). ABS are securitized debts where the underlying assets are receivables arising from various loans including automobile loans, personal loans, loans against consumer durables, etc. MBS are securitized debts where the underlying assets are receivables arising from loans backed by mortgage of residential / commercial properties.

At present in Indian market, following types of loans are securitized:
1. Auto Loans (cars / commercial vehicles / two wheelers)
2. Residential Mortgages or Housing Loans
3. Consumer Durable Loans
4. Personal Loans
5. Corporate Loans

In terms of specific risks attached to securitization, each asset class would have different underlying risks. Residential Mortgages generally have lower default rates than other asset classes, but repossession becomes difficult. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Asset classes like personal loans, credit card receivables are unsecured and in an economic downturn
may witness higher default. A corporate loan/receivable, depend upon the nature of the underlying security for the loan or the nature of the receivable and the risks correspondingly fluctuate.

The rating agencies define margins, over collateralisation and guarantees to bring risk in line with similar AAA rated securities. The factors typically analyzed for any pool are as follows:

a. **Assets securitized and Size of the loan**: This indicates the kind of assets financed with the loan and the average ticket size of the loan. A very low ticket size might mean more costs in originating and servicing of the assets.

b. **Diversification**: Diversification across geographical boundaries and ticket sizes might result in lower delinquency.

c. **Loan to Value Ratio**: Indicates how much % value of the asset is financed by borrower’s own equity. The lower this value the better it is. This suggests that where the borrowers own contribution of the asset cost is high; the chances of default are lower.

d. **Average seasoning of the pool**: This indicates whether borrowers have already displayed repayment discipline. The higher the number, the more superior it is.

The other main risks pertaining to Securitised debt are as follows:

**Prepayment Risk**: This arises when the borrower pays off the loan sooner than expected. When interest rates decline, borrowers tend to pay off high interest loans with money borrowed at a lower interest rate, which shortens the average maturity of ABS. However, there is some prepayment risk even if interest rates rise, such as when an owner pays off a mortgage when the house is sold or an auto loan is paid off when the car is sold.

**Reinvestment Risk**: Since prepayment risk increases when interest rates decline, this also introduces reinvestment risk, which is the risk that the principal can only be reinvested at a lower rate.

**B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME**

The Scheme shall have a minimum of 20 Investors and no single Investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 Investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at Applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any Investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days’ notice to redeem his exposure over the 25% limit. Failure on the part of the said Investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic Redemption by the Mutual Fund at the Applicable NAV on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

The Scheme is designed to help investors create a basket of funds which are re-balanced on a periodical basis for achieving benefits of diversification across schemes within fixed income asset class. Scheme(s) will be allocated across the basket of debt schemes, depending on the fund manager’s view on fixed income market.

The investment objective of the Scheme is to optimize returns to the investor by designing a portfolio that will track interest rate movements and credit cycle by investing in the units of debt oriented schemes.

**Debt Instruments & Money Market Instruments**

The maturity period of CDs issued by the Banks is between 7 days to one year, whereas, in case of FIs, maturity is one year to 3 years from the date of issue.

**Commercial Paper**
Commercial Paper (CP) is an unsecured negotiable money market instrument issued in the form of a promissory note, generally issued by the corporates, primary dealers and all India Financial Institutions as an alternative source of short term borrowings. CP is traded in secondary market and can be freely bought and sold before maturity.

The Scheme may also invest in Cash Management Bill (CMB) issued by the Government of India to meet their short term borrowing requirements. CMB are generally issued for maturities of less than 91 days.

**Commercial Usance Bills**
Bill (bills of exchange/promissory notes of public sector and private sector corporate entities) Rediscouting, usance bills and commercial bills.

**Repos**
Repo (Repurchase Agreement) or Reverse Repo is a transaction in which two parties agree to sell and purchase the same security with an agreement to purchase or sell the same security at a mutually decided future date and price. The transaction results in collateralized borrowing or lending of funds. Presently in India, corporate debt securities, Government Securities, State Government Securities and T-Bills are eligible for Repo/Reverse Repo.

Tri-party repo means a repo contract where a third entity (apart from the borrower and lender), called a Tri-Party Agent, acts as an intermediary between the two parties to the repo to facilitate services like collateral selection, payment and settlement, custody and management during the life of the transaction.

The Scheme may undertake repo or reverse repo transactions in accordance with the directions issued by RBI and SEBI from time to time. Such investment shall be made subject to the guidelines which may be prescribed by the Board of Directors of the Asset Management Company and Trustee Company.

**Securities created and issued by the Central and State Governments** as may be permitted by RBI, securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills). State Government securities (popularly known as State Development Loans or SDLs) are issued by the respective State Government in co-
ordination with the RBI. Government Securities having an unexpired maturity up to one year are included in money market instruments.

**Non-Convertible Debentures**
Non convertible debentures are securities issued by companies / institutions promoted / owned by the Central or State Governments and statutory bodies which may or may not carry a Central/State Government guarantee, Public and private sector banks, all India Financial Institutions and Private Sector Companies. These instruments may be secured or unsecured against the assets of the Company and generally issued to meet the short term and long term fund requirements. These instruments may have fixed or floating rate coupon. The Scheme may also invest in the non convertible part of convertible debt securities. The Scheme will invest in instruments of original or initial maturity up to one year.

Further the Scheme may invest in such other debt instrument of original or initial maturity up to one year as the RBI / SEBI may specify from time to time.

**Securitized Assets**
Securitization is a structured finance process which involves pooling and repackaging of cash flow producing financial assets into securities that are then sold to investors. They are termed as Asset Backed Securities (ABS) or Mortgage Backed Securities (MBS). ABS are backed by other assets such as credit card, automobile or consumer loan receivables, retail installment loans or participations in pools of leases. Credit support for these securities may be based on the underlying assets and/or provided through credit enhancements by a third party. MBS is an asset backed security whose cash flows are backed by the principal and interest payments of a set of mortgage loans. Such Mortgage could be either residential or commercial properties. ABS/MBS instrument reflect the undivided interest in the underlying assets and do not represent the obligation of the issuer of ABS/MBS or the originator of underlying receivables. Securitization often utilizes the services of SPV.

**Pass through Certificate (PTC)**
(Pay through or other Participation Certificates) represents beneficial interest in an underlying pool of cash flows. These cash flows represent dues against single or multiple loans originated by the sellers of these loans. These loans are given by banks or financial institutions to corporates. PTCs may be backed, but not exclusively, by receivables of personal loans, car loans, two wheeler loans and other assets subject to applicable regulations.

The following are certain additional disclosures w.r.t. investment in securitized debt:

1. **How the risk profile of securitized debt fits into the risk appetite of the Scheme**
Securitized debt is a form of conversion of normally non-tradable loans to transferable securities. This is done by assigning the loans to a special purpose vehicle (a trust), which in turn issues Pass-Through-Certificates (PTCs). These PTCs are transferable securities with fixed income characteristics. The risk of investing in securitized debt is similar to investing in debt securities. However it differs in two respects.

Typically the liquidity of securitized debt is less than similar debt securities. For certain types of securitized debt (backed by mortgages, personal loans, credit card debt, etc.), there is an additional pre-payment risk. Pre-payment risk refers to the possibility that loans are repaid before they are due, which may reduce returns if the re-investment rates are lower than initially envisaged.

Because of these additional risks, securitized debt typically offers higher yields than debt securities of similar credit rating and maturity. If the fund manager judges that the additional risks are suitably compensated by the higher returns, he may invest in securitized debt up to the limits specified in the asset allocation table above.
2. Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc

The originator is the person who has initially given the loan. The originator is also usually responsible for servicing the loan (i.e. collecting the interest and principal payments). An analysis of the originator is especially important in case of retail loans as this affects the credit quality and servicing of the PTC. The key risk is that of the underlying assets and not of the originator. For example, losses or performance of earlier issuances does not indicate quality of current series. However such past performance may be used as a guide to evaluate the loan standards, servicing capability and performance of the originator.

Originators may be: Banks, Non Banking Finance Companies, Housing Finance Companies, etc. The fund manager / credit analyst evaluates originators based on the following parameters

- Track record
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:
  - Outlook for the economy (domestic and global)
  - Outlook for the industry
  - Company specific factors

In addition a detailed review and assessment of rating rationale is done including interactions with the originator as well as the credit rating agency.

The following additional evaluation parameters are used as applicable for the originator / underlying issuer for pool loan and single loan securitization transactions:

- Default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios of the ultimate borrower (for single-sell downs) – both on a standalone basis as well on a consolidated level/ group level
- Higher proportion of reschedullement of underlying assets of the pool or loan, as the case may be
- Higher proportion of overdue assets of the pool or the underlying loan, as the case may be
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan, as the case may be.

3. Risk mitigation strategies for investments with each kind of originator

An analysis of the originator is especially important in case of retail loans as the size and reach affects the credit quality and servicing of the PTC. In addition, the quality of the collection process, infrastructure and follow-up mechanism; quality of MIS; and credit enhancement mechanism are key risk mitigants for the better originators / servicers.

In case of securitization involving single loans or a small pool of loans, the credit risk of the underlying borrower is analyzed. In case of diversified pools of loans, the overall characteristic of the loans is analyzed to determine the credit risk. The credit analyst looks at ageing (i.e. how long the loan has been with the originator before securitization) as one way of evaluating the performance potential of the PTC. Securitization transactions may include some risk mitigants (to reduce credit risk). These may include interest subvention (difference in interest rates on the underlying loans and the PTC serving as margin against defaults), overcollateralization (issue of PTCs of lesser value than the underlying loans, thus even if some loans default, the PTC continues to remain protected), presence of an equity / subordinate tranche (issue of PTCs of differing seniority when it comes to repayment - the senior tranches get paid before the junior tranche) and / or guarantees.
4. The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments

In case of securitization involving single loans or a small pool of loans, the credit risk of the borrower is analyzed. In case of diversified pools of loans, the overall characteristic of the loans is analyzed to determine the credit risk.

The credit analyst looks at ageing (i.e. how long the loan has been with the originator before securitization) as one way of judging the performance potential of the PTC. Additional risk mitigants may include interest subvention, over collateralization, presence of an equity / subordinate tranche and / or guarantees. The credit analyst also uses analyses by credit rating agencies on the risk profile of the securitized debt.

Currently, the following parameters are used while evaluating investment decision relating to a pool securitization transaction. The Investment Review Committee may revise the parameters from time to time.

* Currently, the Scheme will not invest in these types of securitized debt

Note 1: In case of securitization involving single loans or a small pool of loans, the credit risk of the borrower is analyzed. The investment limits applicable to the underlying borrower are applied to the single loan sell-down.

Note 2: Other investments will be decided on a case-to-case basis

The credit analyst may consider the following risk mitigating measures in his analysis of the securitized debt:
- Size of the loan
- Average original maturity of the pool
- Loan to Value Ratio
• Average seasoning of the pool
• Default rate distribution
• Geographical Distribution
• Credit enhancement facility
• Liquid facility
• Structure of the pool

5. Minimum retention period of the debt by originator prior to securitization
Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the “true sale” criteria including credit enhancement and liquidity enhancements. In addition, RBI has proposed minimum holding period of between nine and twelve months for assets before they can be securitized. The minimum holding period depends on the tenor of the securitization transaction. The Scheme will invest in securitized debt that are compliant with the laws and regulations.

6. Minimum retention percentage by originator of debts to be securitized
Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the “true sale” criteria including credit enhancement and liquidity enhancements, including maximum exposure by the originator in the PTCs. In addition, RBI has proposed minimum retention requirement of between five and ten percent of the book value of the loans by the originator. The minimum retention requirement depends on the tenor and structure of the securitization transaction. The Fund will invest in securitized debts that are compliant with the laws and regulations.

7. The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund
The key risk is securitized debt relates to the underlying borrowers and not the originator. In a securitization transaction, the originator is the seller of the debt(s) and the fund is the buyer. However, the originator is also usually responsible for servicing the loan (i.e. collecting the interest and principal payments). As the originators may also invest in the scheme, the fund manager shall ensure that the investment decision is based on parameters as set by the Investment Review Committee (IRC) of the Asset Management Company and IRC shall review the same at regular interval.

8. The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt
The fund management team including the credit analyst has the experience to analyze securitized debt. In addition, credit research agencies provide analysis of individual instruments and pools. On an on-going basis (typically monthly) the servicer provides reports regarding the performance of the pool. These reports would form the base for ongoing evaluation where applicable. In addition, rating reports indicating rating changes would be monitored for changes in rating agency opinion of the credit risk.

Foreign Securities
The Scheme shall invest in units/securities issued by overseas mutual funds investing in eligible securities in terms of SEBI Circular SEBI/IMD/CIR No.7/104753/07 dated September 26, 2007 as amended from time to time / RBI, and commensurate with the Scheme objectives. The Mutual Fund may also appoint overseas investment advisors and other service providers, to the extent permissible under the Regulations.

As per SEBI Circular SEBI/IMD/CIR No.7/104753/07 dated September 26, 2007, mutual funds can make overseas investments subject to a maximum of US $300 million or such limits as may be prescribed by SEBI from time to time. Subject to the approval of RBI / SEBI and conditions as may be prescribed by them, the Mutual Fund may open one or more foreign currency accounts abroad.
either directly, or through the custodian/sub-custodian, to facilitate investments and to enter into/deal in forward currency contracts, currency futures, interest rate futures / swaps, currency options for the purpose of hedging the risks of assets of a portfolio or for its efficient management. However, the use of such instruments shall be as permitted from time to time. All the requirement of the SEBI circular dated September 26, 2007, would be adhered to by the AMC for investment in foreign securities.

Investment in overseas securities shall be made in accordance with the requirements including appointment of a dedicated Fund Manager stipulated by SEBI and RBI from time to time.

**Short Term Deposits**

Pending deployment of funds as per the investment objective of the Scheme, the Funds may be parked in short term deposits of the Scheduled Commercial Banks, subject to guidelines and limits specified by SEBI.

The securities / instruments mentioned above and such other securities the Scheme is permitted to invest in could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of any maturity.

The securities may be acquired through initial public offering (IPOs), secondary market, private placement, rights offers, negotiated deals etc. Further investments in debentures, bonds and other fixed income securities will be in instruments which have been assigned investment grade rating by the Credit Rating Agency.

Investment in unrated debt instruments shall be subject to complying with the provisions of the Regulations and within the limit as specified in Schedule VII to the Regulations. The AMC may constitute committee(s) to approve proposals for investments in unrated debt instruments. The AMC Board and the Trustee shall approve the detailed parameters for such investments. However, in case any unrated debt security does not fall under the parameters, the prior approval of Board of AMC and Trustee shall be sought.

For applicable regulatory investment limits please refer paragraph “Investment Restrictions”.

The Fund Manager may invest in any other security as maybe permitted from time to time and which are in line with the investment objectives of the Scheme.

**Units of Mutual Fund schemes**

The scheme may invest in units of liquid mutual fund schemes of Axis AMC or in the Scheme of other mutual funds in conformity with the investment objective of the Scheme and in terms of the prevailing SEBI (MF) Regulations. Provided that such investment will be within the limits specified under SEBI (MF) Regulations and will be done for cash management purposes.

**E. WHAT ARE THE INVESTMENT STRATEGIES?**

The investment objective of the Scheme is to provide long term capital appreciation by predominantly investing in Schroder International Selection Fund Global Equity Alpha, a fund that aims to provide capital growth by investing in equity and equity related securities of companies worldwide. The Scheme may also invest a part of its corpus in debt, money market instruments and / or units of liquid schemes in order to meet liquidity requirements from time to time.

However, there can be no assurance that the investment objective of the Scheme will be realized.
The Scheme will be passively managed fund investing predominantly in unit / shares of Schroder International Selection Fund Global Equity Alpha. The investment made in the Schroder International Selection Fund Global Equity Alpha will be based on the subscriptions and redemptions received in the Scheme and within the overall limits specified by SEBI/RBI.

**About Schroder International Selection Fund Global Equity Alpha:**

The Fund invests at least two-thirds of its assets in equity and equity related securities of companies worldwide. ‘Alpha’ funds invest in companies in which the manager has a high conviction that the current share price does not reflect the future prospects for that business. As the Fund is index unconstrained it is managed without reference to an index. The manager seeks to identify companies which he believes will deliver future earnings growth above the level expected by the market typically on a 3-5-year horizon (we term this as ‘a positive growth gap’). The Fund is managed with reference to material environmental, social and governance factors. This means issues such as climate change, environmental performance, labor standards or board composition that could impact a company’s value may be considered in the assessment of companies.

Returns quoted are based on NAV to NAV (Bid to Bid), adjusted for dividends, net of On Going Charge. The above performance is for Share Class C Accumulation of SISF Global Equity Alpha Fund launched on July 29, 2005 (the Scheme may invest in any other shareclass of SISF Global Equity Alpha).

**Portfolio Turnover**

As the Scheme will predominantly follow a passive investment strategy for investments in the overseas mutual fund, the endeavour will be to minimise the portfolio turnover subject to exigencies and needs of the scheme. Generally, for the investments in overseas fund, the turnover will be confined to the subscriptions and redemptions (including inter-fund switches, if any) in the underlying overseas fund. However, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

For domestic securities investments, there may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, the cost would be negligible as compared to the total expenses of the Scheme. Frequent trading may increase the profits which will offset the increase in costs. The fund manager will endeavor to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to estimate with reasonable accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.

**Debt and Money Markets in India**

The Indian debt market is today one of the largest in Asia and includes securities issued by the Government (Central & State Governments), public sector undertakings, other government bodies, financial institutions, banks and corporates. Government and public sector enterprises are the predominant borrowers in the markets. The major players in the Indian debt markets today are banks, financial institutions, mutual funds, insurance companies, primary dealers, trusts, pension funds and corporates. The Indian debt market is the largest segment of the Indian financial markets.
The debt market comprises broadly two segments, viz. Government Securities market or G-Sec market and corporate debt market. The latter is further classified as market for PSU bonds and private sector bonds.

The Government Securities (G-Secs) market, consists of G-Sec outstanding of Rs. 63,37,947.748 crs as on Jul 21, 2020 (State Govt securities - Rs 2678159.25 cr, (as on Jul 19) Source: CCIL), is the oldest and the largest component (50% share in market cap) of the Indian debt market in terms of market capitalization, outstanding securities and trading volumes. The G-Secs market plays a vital role in the Indian economy as it provides the benchmark for determining the level of interest rates in the country through the yields on the Government Securities which are referred to as the risk-free rate of return in any economy. Over the years, there have been new products introduced by the RBI like zero coupon bonds, floating rate bonds, inflation indexed bonds, etc.

The corporate bond market, in the sense of private corporate sector raising debt through public issuance in capital market, is only an insignificant part of the Indian Debt Market. A large part of the issuance in the non-Government debt market is currently on private placement basis.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). In a predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates. In money market, activity levels of the Government and nongovernment debt vary from time to time. Instruments that comprise a major portion of money market activity include but not limited to:

- Overnight Call
- Tri Party Repo
- Repo/Reverse Repo Agreement
- Treasury Bills
- Government securities with a residual maturity of < 1 year.
- Commercial Paper
- Certificate of Deposit

Apart from these, there are some other options available for short tenure investments that include MIBOR linked debentures with periodic exit options and other such instruments. Though not strictly classified as Money Market Instruments, PSU / DFI / Corporate paper with a residual maturity of < 1 year, are actively traded and offer a viable investment option.

The market has evolved in past 2-3 years in terms of risk premia attached to different class of issuers. Bank CDs have clearly emerged as popular asset class with increased acceptability in secondary market. PSU banks trade the tightest on the back of comfort from majority government holding. Highly rated manufacturing companies also command premium on account of limited supply. However, there has been increased activity in papers issued by private/foreign banks/NBFCs/companies in high-growth sector due to higher yields offered by them. Even though companies across these sectors might have been rated on a same scale, the difference in the yield on the papers for similar maturities reflects the perception of their respective credit profiles.

The following table gives approximate yields prevailing on July 21, 2020 on some of the instruments and further illustrates this point.

These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing consequent to changes in macro-economic conditions and RBI policy. The price and yield on various debt instruments fluctuate from time to time depending upon the macro economic situation, inflation rate, overall liquidity position, foreign exchange scenario etc. Also, the price and yield vary according to maturity profile, credit risk etc.

Risk Control
Risk management is going to be an integral part of the investment process. Effective risk management is critical to fund management for achieving financial soundness. The performance of overseas mutual funds will be regularly monitored. The investment team of the AMC will carry out rigorous in depth credit evaluation of the money market and debt instruments (other than G-Secs) proposed to be invested in Investments by the Scheme shall be made as per the investment objectives of the Scheme and provisions of SEBI regulations. AMC has implemented the Bloomberg Portfolio Order Management System as Front Office System (FOS). The system has incorporated all the investment restrictions as per SEBI guidelines and “soft” warning alerts at appropriate levels for preemptive monitoring. The system enables identifying & measuring the risk through various risk measurement tools like various risk ratios, average duration and analyzes the same and acts in a preventive manner.

G. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

MSCI World  (Net TR)

Justification for use of benchmark
The MSCI World Index, is a broad global equity benchmark that represents large and mid-cap equity performance across 23 developed markets countries. It covers approximately 85% of the free float-adjusted market capitalization in each country and MSCI World benchmark does not offer exposure to emerging markets. This best captures the investible universe.

The Trustee/AMC reserves the right to change the benchmark for the evaluation of the performance of the Scheme from time to time, keeping in mind the investment objective of the Scheme and the appropriateness of the benchmark, subject to SEBI guidelines and other prevalent guidelines.

At present the following conditions and norms shall apply to repo in corporate debt securities:

(i) The gross exposure of the Scheme to repo transactions in corporate debt securities shall not be more than 10% of the net assets of the Scheme.
(ii) The cumulative gross exposure through repo transactions in corporate debt securities along with shares / units of Underlying Fund, debt and money market instrument shall not exceed 100% of the net assets of the Scheme.
(iii) The Scheme shall participate in repo transactions only in AA and above rated corporate debt securities.
(iv) The Scheme shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months.
(v) The Trustee and the Asset Management Company have framed guidelines interalia considering the following aspects:
   i. Category of counterparty
   ii. Credit rating of counterparty
   iii. Tenor of collateral
   iv. Applicable haircuts

(vi) Counterparty selection & credit rating
   The counterparty must be an acceptable counterparty for debt transactions. The Mutual Fund follows a counterparty empanelment process for fixed income transactions and the same shall be used for selection of counterparties for corporate bond repos. All repo transactions in corporate bonds will be governed by a repo agreement as specified by FIMMDA and/or other specified authorities.

(vii) Collateral tenor & quality
   The exposure limit/investment restrictions prescribed under the Seventh Schedule of the Regulations and circulars issued there under (wherever applicable) shall be applicable to repo transactions in corporate bonds. The Scheme shall further follow guidelines framed by Trustee and the AMC from time to time.

(viii) Applicable haircuts
   Currently mutual funds are permitted to carry out repo transactions in government securities without any haircuts. The Reserve Bank of India has notified a minimum haircut based on rating of the corporate bond and other securities. In addition, the Fixed Income and Money Market Dealers Association (FIMMDA) would maintain a rating-haircut matrix on an ongoing basis. The Scheme shall further follow guidelines framed by Trustee and the AMC from time to time.

The haircuts seek to protect the lender of funds from the event of the counterparty failing to honor the repurchase leg of the repo. In such a circumstance, the Fund would suffer a loss if the value of the collateral depreciates by more than the haircut. The fall in the value of the collateral could be on account of higher yields and/or deterioration of credit quality.
As the typical tenor of repos is short (typically overnight), the haircuts represent a relatively high degree of safety in relation to the interest rate risk on the collateral. The risk of collateral depreciation based on historical volatility is given in the table below:

In the above table, the price volatility of a 10-year bond is about 3.4% annualized. That is a 10% price move represents nearly a 3-sigma event on an annualized basis. For overnight tenors, this represents a 48-sigma event (for comparison a 6-sigma event occurs about once in a million observations).

It is apparent that the haircuts stipulated by RBI are more than sufficient to mitigate interest rate risk. Credit event risk remains (the collateral could default during the tenor of the repo). This risk is to be mitigated by ensuring that the collateral is acceptable from a credit point of view.

Note: According to the Asset Allocation of the Scheme, the gross exposure of the Scheme to repo transactions in corporate debt securities shall not be more than 5% of the net assets of the Scheme.

14. The Mutual Fund/AMC shall make investment out of the NFO proceeds only on or after the closure of the NFO period. The Mutual Fund/AMC can however deploy the NFO proceeds in TREPS before the closure of NFO period. However, AMCs shall not charge any investment management and advisory fees on funds deployed in TREPS during the NFO period. The appreciation received from investment in TREPS shall be passed on to investors.

Further, in case the minimum subscription amount is not garnered by the scheme during the NFO period, the interest earned upon investment of NFO proceeds in TREPS shall be returned to investors, in proportion of their investments, along-with the refund of the subscription amount.

The exposure limit/ investment restrictions prescribed under the Seventh Schedule of the Regulations and circulars issued thereunder (wherever applicable) shall be applicable to repo transactions in corporate bonds.

The Scheme will comply with the other Regulations applicable to the investments of Mutual Funds from time to time.

All the investment restrictions will be applicable at the time of making investments.

The AMC/Trustee may alter these above stated restrictions from time to time to the extent the Regulations change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its respective investment objective.
J. CREATION OF SEGREGATED PORTFOLIO

Creation of segregated portfolio shall be subject to guidelines specified by SEBI from time to time and includes the following:

In this regard, the term ‘segregated portfolio’ shall mean a portfolio comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme. The term ‘main portfolio’ shall mean the scheme portfolio excluding the segregated portfolio. The term ‘total portfolio’ shall mean the scheme portfolio including the securities affected by the credit event.

Credit Event

a. For rated debt or money market instruments

1) Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:
   a. Downgrade of a debt or money market instrument to ‘below investment grade’, or
   b. Subsequent downgrades of the said instruments from ‘below investment grade’, or
   c. Similar such downgrades of a loan rating

2) In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as mentioned above and implemented at the ISIN level.

3) Creation of segregated portfolio is optional and is at the discretion of Axis Asset Management Company Ltd. (‘Axis AMC’/‘the AMC’)

b. For unrated debt or money market instruments

Segregated portfolio of unrated debt or money market instruments may be created only in case of actual default of either the interest or principal amount by the issuer. Credit event in this case shall be ‘actual default’ by the issuer of such instruments and shall be considered for creation of segregated portfolio.

Process for Creation of Segregated Portfolio

1) On the date of credit event, the AMC shall decide on creation of segregated portfolio. Once AMC decides to segregate portfolio, it shall:
   a. seek approval of trustees prior to creation of the segregated portfolio.
   b. immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. Axis Mutual Fund shall disclose that the segregation shall be subject to Trustee approval. Additionally, the said press release shall be prominently disclosed on the website of the AMC.
   c. ensure that till the time the Trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the Scheme shall be suspended for processing with respect to creation of units and payment on redemptions.

2) Once Trustee approval is received by the AMC:
   a. Segregated portfolio shall be effective from the day of credit event
   b. AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information will also be submitted to SEBI.
   c. An e-mail or SMS shall be sent to all unit holders of the Scheme.
d. The NAV of both segregated and main portfolios shall be disclosed from the day of the credit event.

e. All existing investors in the Scheme as on the day of the credit event shall be allotted equal number of units in the segregated portfolio as held in the main portfolio.

f. No redemption and subscription shall be allowed in the segregated portfolio. AMC shall enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.

3) If the trustees do not approve the proposal to segregate portfolio, AMC will issue a press release immediately informing investors of the same.

**Valuation**
Notwithstanding the decision to segregate the debt and money market instrument, the valuation shall take into account the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and circular(s) issued thereunder.

**Processing of Subscription and Redemption Proceeds**
All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as under:

i. Upon trustees’ approval to create a segregated portfolio -
   - Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
   - Investors subscribing to the Scheme will be allotted units only in the main portfolio based on its NAV.

ii. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

**Disclosure**
In order to enable the existing as well as the prospective investors to take informed decision, the following shall be adhered to:

a. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.

b. Adequate disclosure of the segregated portfolio shall be made in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the Scheme.

c. The Net Asset Value (NAV) of the segregated portfolio shall be declared on daily basis.

d. The information regarding number of segregated portfolios created in the Scheme shall appear prominently under the name of the Scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.

e. The Scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The Scheme performance should clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, shall be disclosed as a footnote to the Scheme performance.

f. The disclosures at paragraph (d) and (e) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
g. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

**TER for the Segregated Portfolio**

1) Axis AMC shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.

2) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.

3) The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.

4) The costs related to segregated portfolio shall in no case be charged to the main portfolio.

**Monitoring by Trustees**

In order to ensure timely recovery of investments of the segregated portfolio, Trustees shall ensure that:

a. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.

b. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.

c. The Trustees shall monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, Trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the Scheme.

**Email ID & Mobile Number**

Investors should provide their own email address and mobile number to enable Axis AMC for speed and ease of communication in a convenient and cost-effective manner, and to help prevent fraudulent transactions.

**Ultimate Beneficial Ownership details**

SEBI vide its circular no. CIR/MIRSD/2/2013 dated January 24, 2013 further read with AMFI Best practices guidelines circular no. 62/2015-16 dated September 18, 2015 and other applicable regulations has prescribed guidelines, for identification of Beneficial Ownership to be followed by the intermediaries. A ‘Beneficial owner’ is defined as a natural person or persons who ultimately own, control or influence a client and/or persons on whose behalf a transaction is being conducted, and includes a person who exercises ultimate effective control over a legal person or arrangement. In this regard, all categories of investors (including all new / existing investors / unitholders) (except individuals, companies listed on a stock exchange or majority-owned subsidiary of such companies) are mandatorily required to provide beneficial ownership details for all investments. Failing which, fund reserves the right to reject applications / subscription requests/additional subscription requests (including switches) / restrict further investments or seek additional information from investors who have not provided the requisite information on beneficial ownership. In the event of change in beneficial ownership, investors are requested to immediately update the details with the Fund/Registrar.

**Foreign Account Tax Compliance Act and Common Reporting Standards requirements**

As a part of various ongoing tax and regulatory developments around the globe such as Foreign Account Tax Compliance Act (‘FATCA’) and Common Reporting Standard (‘CRS’), financial institutions like Axis Mutual Fund (‘Axis MF’) are being cast with additional investor and counterparty account related due diligence requirements.

FATCA is a United States of America (“U.S.”) tax initiative that requires all financial institutions to report financial transactions of U.S. persons including entities in which U.S. persons hold a substantial ownership, etc., to the relevant tax authorities. It was introduced by the United States Department of Treasury and the US Internal Revenue Service (“IRS”). The purpose of FATCA is to prevent tax evasion by US citizens and residents (US Persons) through use of offshore accounts. FATCA obligates financial institutions (FIs), including Indian financial institutions to provide information...
Axis Global Equity Alpha Fund of Fund

on the accounts of / to report accounts held by specified US Persons. FATCA requires enhanced due diligence procedures by the FI so as to identify US reportable accounts. With respect to individuals, the US reportable accounts would cover those with US citizenship or US residency.

Further, similar to FATCA, G20 and OECD countries have released a “Standard for Automatic Exchange of Financial Account Information in Tax Matters”, commonly known as the CRS on Automatic Exchange of Information (AEOI). CRS mandates automatic tax information exchange regarding accounts of reportable persons between the CRS compliant jurisdictions.

The Indian Government signed an Inter-Governmental Agreement (“IGA”) with the U.S. on July 9, 2015 to implement FATCA in India. In addition, India also signed the OECD’s Model Competent Authority Agreement for tax information sharing in accordance with multilateral Common Reporting Standard (“CRS”) on June 3, 2015. India had committed to implement CRS and the same has been implemented from January 1, 2016. Towards this, the Central Board of Direct Taxes has inserted Section 285BA of the Income Tax Act, 1961 along with Rules 114F to 114H (FATCA-CRS Rules), as part of the Income-tax Rules, 1962. These Rules require Indian financial institutions such as the Banks, Mutual Funds, etc. to seek additional personal, tax and beneficial owner information and certain certifications and documentation from all our investors and counterparties. According to the FATCA-CRS Rules, financial institutions in India are required to report tax information about account holders that tax resident of U.S. and other foreign countries, to the CBDT/ Indian Government which will, in turn, will relay that information to the IRS and governments of other foreign countries.

These developments have resulted in compliance and reporting obligations on Financial Institutions like Axis MF. In relevant cases, information will have to be reported to tax authorities i.e. CBDT. Towards compliance, the Fund may also be required to provide information to any institutions such as withholding agents for the purpose of ensuring appropriate withholding from the account or any proceeds in relation thereto. Axis MF has taken appropriate measures in order to become FATCA and CRS compliant, with effect from the applicable date as per applicable laws / rules/ regulations. As may be required by domestic or overseas regulators/ tax authorities, we may also be constrained to withhold and pay out any sums from your account or close or suspend your account(s). Axis MF may also have to comply with other similar laws as and when applicable.

SEBI issued its circular no. CIR/MIRSD/2/2015 dated August 26, 2015 inter-alia advising intermediaries to take necessary steps to ensure compliance with the requirements specified in the rules and guidelines specified by the Government of India. AMFI also issued its best practices guidelines circular no. 63/2015-16 dated September 18, 2015 on this matter. The AMC and the Mutual Fund are required to adhere to various requirements inter-alia including submission of various information / details relating to the investors in the schemes of the mutual fund, to authorities, as specified under the
Accordingly, the following aspects need to be adhered to:

- With effect from November 1, 2015 all investors will have to mandatorily provide the information and declarations pertaining to FATCA/CRS for all new accounts opened, failing which the application / transaction request shall be liable to be rejected.
- For all new accounts opened by investors, from September 1, 2015 till October 31, 2015, MFs need to obtain relevant FATCA declarations. These details / certification need to be obtained by December 31, 2015, particularly in cases where, after Indicia search, a positive match is found with any US indicia. If certification is not provided by an investor or the reasonableness of self-certification cannot be confirmed, the account is treated as reportable.
- Investors are requested to note that under the alternative procedure provided in Rule 114H(8) of the Income-tax Rules, 1962, the financial institutions were required to obtain FATCA/CRS self-certification and carry out due diligence in respect of all individual and entity accounts opened from 1st July 2014 to 31st August 2015. Such self-certification and documentation was required to be obtained by the financial institutions by an extended timeline of 31st August 2016. In the event that such self-certification were not received within this timeline, financial institutions were required to close the account and if the account were found to be a "reportable account", report the same. In view of the difficulties highlighted by stakeholders in complying with the provision for "closure" of financial accounts, the Ministry of Finance, Government of India vide Press Release dated 31st August 2016 extended the time line for closure (from 31 August 2016) until further notification.

Further to this, the Ministry of Finance, Government of India vide its Press release dated April 11, 2017 directed financial institutions to obtain the self-certification by April 30, 2017, failing which the accounts would need to be blocked. The transactions in such blocked folios would be permitted only once the self-certification is obtained and due diligence completed. Investors are advised to complete their self-certification at the earliest to prevent being inconvenienced on account of blocking of any folio(s).

Prospective investors and Unit holders will therefore be required to comply with the request of the Fund to furnish such information / documentation / declarations as and when deemed necessary by the Investment Manager in accordance with Applicable Laws. In case prospective investor / Unit holder fails to furnish the relevant information / documentation / declarations in accordance with Applicable Laws, the Fund reserves the right to reject the application or redeem the Units held directly or beneficially and may also require reporting of such accounts and/or levy of withholding tax on payments made to the Unit holders / investor and/or take any other action/s in accordance with Applicable Laws. FATCA-CRS provisions are relevant not only at on-boarding stage of Unit holders but also throughout the life cycle of investment with the Fund. Unit holders
therefore should immediately intimate to the Fund/the Investment Manager, any change in their status with respect to any FATCA-CRS related information / documentation / declarations provided by them previously, including but not limited to any declarations provided in respect of residency of the Unit holders for tax purposes. Further, if the Fund and/or the Investment Manager is required by Applicable Laws, to provide information regarding the Fund and/or the unit holders / investors to any regulatory authority and/or the Fund Investments and/or income therefrom, and the Fund and/or the Investment Manager complies with such request in good faith, whether or not it was in fact enforceable, they shall not be liable to the Unit holders / investors or to any other party as a result of such compliance or in connection with such compliance.

Prospective investors / Unit holders should consult their own advisors to understand the implications of FATCA-CRS provisions/requirements. Please note that Axis MF will be unable to provide advice to any investor or counterparty about their tax status or FATCA/CRS classification relevant to their account. It is the responsibility of the investor or counterparty to ensure that they record their correct tax status / FATCA/ CRS classification. Investor/ counterparty may seek advice from their tax advisor in this regard. The onus to provide accurate, adequate and timely inputs in this regard would be that of the investor or counterparty. Any changes in earlier information provided must be intimated within 30 days of such change.

Investors are requested to provide all the necessary information / declarations to facilitate compliance, considering India’s commitment to implement CRS and FATCA under the relevant international treaties.

SEBI vide its circular no. CIR/MRD/DP/31/2014 dated November 12, 2014,
in order to enable a single consolidated view of all the investments of an investor in Mutual Fund and securities held in demat form with Depositories, has required Depositories to generate and dispatch a single CAS for investors having mutual fund investments and holding demat accounts.

In view of the aforesaid requirement, for investors who hold demat account, for transactions in the schemes of Axis Mutual Fund on or after February 1, 2015, a CAS, based on PAN of the holders, will be sent by Depositories to investors holding demat account, for each calendar month within 10th day of the succeeding month to the investors in whose folios transactions have taken place during that month.

CAS will be sent by Depositories every half yearly (September/March), on or before 10th day of succeeding month, detailing holding at the end of the six month, to all such investors in whose folios and demat accounts there have been no transactions during that period.

CAS sent by Depositories is a statement containing details relating to all financial transactions made by an investor across all mutual funds viz. purchase, redemption, switch, dividend payout, dividend reinvestment, systematic investment plan, systematic withdrawal plan, systematic transfer plan (including transaction charges paid to the distributor) and transaction in dematerialized securities across demat accounts of the investors and holding at the end of the month.

In case of demat accounts with nil balance and no transactions in securities and in mutual fund folios, the depository shall send account statement in terms of regulations applicable to the depositories. Investors whose folio(s)/ demat account(s) are not updated with PAN shall not receive CAS.

Consolidation of account statement is done on the basis of PAN. Investors are therefore requested to ensure that their folio(s)/ demat account(s) are updated with PAN. In case of multiple holding, it shall be PAN of the first holder and pattern of holding.

For Unit Holders who have provided an e-mail address to the Mutual Fund or in KYC records, the CAS is sent by e-mail. However, where an investor does not wish to receive CAS through email, option is given to the investor to receive the CAS in physical form at the address registered in the Depository system.

Investors who do not wish to receive CAS sent by depositories have an option to indicate their negative consent. Such investors may contact the depositories to opt out. Investors who do not hold demat account continue to receive CAS sent by RTA/AMC, based on the PAN, covering transactions across all mutual funds as per the current practice.

In case an investor has multiple accounts across two depositories; the depository with whom the account has been opened earlier will be the default depository.
The dispatches of CAS by the depositaries constitute compliance by the AMC/ the Fund with the requirement under Regulation 36(4) of SEBI (Mutual Funds) Regulations. However, the AMC reserves the right to furnish the account statement in addition to the CAS, if deemed fit in the interest of investor(s).

Investors whose folio(s)/demat account(s) are not updated with PAN shall not receive CAS. Investors are therefore requested to ensure that their folio(s)/demat account(s) are updated with PAN.

For folios not included in the CAS (due to non-availability of PAN), the AMC shall issue monthly account statement to such Unit holder(s), for any financial transaction undertaken during the month on or before 10th of succeeding month by mail or email.

For folios not eligible to receive CAS (due to non-availability of PAN), the AMC shall issue an account statement detailing holding across all schemes at the end of every six months (i.e. September/March), on or before 10th day of succeeding month, to all such Unit holders in whose folios no transaction has taken place during that period shall be sent by mail/e-mail.

**Option to hold units in dematerialised (demat) form**

Investors shall have an option to receive allotment of Mutual Fund units in their demat account while subscribing to the Scheme in terms of the guidelines/ procedural requirements as laid by the Depositories (NSDL/CDSL) from time to time.

Investors desirous of having the Units of the Scheme in dematerialized form should contact the ISCs of the AMC/Registrar.

Where units are held by investor in dematerialized form, the demat statement issued by the Depository Participant would be deemed adequate compliance with the requirements in respect of dispatch of statements of account.

In case investors desire to convert their existing physical units (represented by statement of account) into dematerialized form or vice versa, the request for conversion of units held in physical form into Demat (electronic) form or vice versa should be submitted alongwith a Demat/Remat Request Form to their Depository Participants. In case the units are desired to be held by investor in dematerialized form, the KYC performed by Depository Participant shall be considered compliance of the applicable SEBI norms.

Further, demat option shall also be available for SIP transactions. Units will be allotted based on the applicable NAV as per Scheme Information Document and will be credited to investors Demat Account on weekly basis on realization of funds.
