Differentiation with existing open ended equity schemes (Data as on July 31, 2021) (Contd.)

Investment Strategy: Equity portfolio will be run as a diversified portfolio with a balanced mix of large and mid cap stocks.

The Scheme will look at the 3 pillars while constructing the portfolio:

- High quality portfolio
- Sustainable growth across market cycles
- Low churn

Portfolio construction would be a combination of both top down and bottom up approach. The top down approach will be based on macro-economic analysis and will be used to arrive at the geographical market and sectors/themes while the bottom-up process will focus on appreciation potential of individual stocks from a fundamental perspective to arrive at the stock selection. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include companies having a robust business models and enjoying sustainable competitive advantages as compared to their competitors.

Investment in Foreign Securities will be made to capture potential opportunities in equity markets of developed and/or emerging markets across geographies. Investment could also be made in themes/brands/market leaders present in these specific markets that cannot be played through the domestic economy either because these are not present or the companies are not listed on an exchange in India.

The portfolio will have an absolute return focus. That is the fund manager will not look at the market cycles but will try to generate returns while minimizing the potential for downside. Thus the Scheme will have the leeway to take a higher allocation to cash in case the fund manager is not able to find appropriate stocks at acceptable valuations at any time.

The Scheme by utilising a holistic risk management strategy will endeavour to manage risks associated with investing in equity markets. The Scheme has identified the following risks and designed risk management strategies, which are embedded in the investment process to manage these risks

- i. Quality Risk - Risk of investing in unsustainable / weak companies.
- ii. Price Risk - Risk of overpaying for a company
- iii. Liquidity Risk - High Impact cost of entry and exit
- iv. Volatility Risk - Volatility in price due to company or portfolio specific factors
- v. Event Risk - Price risk due to a company / sector specific or market event

Differentiation: A diversified equity portfolio of securities with current or potentially attractive opportunities from both Indian and overseas markets.

Other equities and equity related instruments	0% - 20%

Units issued by REIT/InvIT	0% - 10%

Primary Investment Objective: To generate long term capital appreciation by investing in a diversified portfolio of companies demonstrating sustainable practices across Environmental, Social and Governance (ESG) parameters.

Investment Strategy: ESG represents factors viz. Environmental (such as impact of business on natural resources), Social (such as business having social impact) and Governance (being the way in which the company is run).

Quality companies with a competitive advantage, sustainable business model and visibility of earnings growth are the best avenues for long term wealth generation. ESG factors can complement traditional tools of evaluating and identifying quality businesses and thus improve the overall understanding of the company.

Axis Special Situations Fund

Instruments	Indicative Allocation (% of net assets)
Equity & Equity related instruments of special situations theme	80% - 100%
Other Equity and Equity related instruments	0% - 20%
Debt & Money Market Instruments	0% - 20%
Units issued by REITs & InvITs	0% - 10%

Primary Investment Objective: To generate long-term capital appreciation by investing in mis-priced stocks facing special situations. The mis-pricing of stocks can occur due to companies facing special situations like regulatory/policy changes, management restructuring, technology led disruption and innovation or any temporary challenges in the operating environment.

Investment Strategy: The Special situations can occur due to companies facing / undergoing issues like technology led disruption and innovation, regulatory/policy changes, management restructuring, or any prolonged cyclical challenges in the operating environment. The effect of these special situations on the companies' business model could be medium to long term in nature.

Financial markets are inefficient and often slow to recognize the impact of special situations such as genuine disruptive innovation or are reluctant to accept the impact of disruption. This creates a gap between market expectations and likely outcomes and can lead to significant mispricing or unanticipated growth potential of these stocks.

Disruptive change is accelerating as technological power grows exponentially, costs fall and with dramatic changes in the regulatory environment (GST, RERA, etc). Further disruption and new business models are being actively promoted by heavy investments from private equity investors and the global tech giants. This has catalyzed innovation and adoption rates further. The reward of disruptive growth is not limited only to the disruptors - it creates opportunity across the entire value chain. Apart from disruptors beneficiaries could include enablers (companies that are facilitating the change) and adaptors (incumbents who positively respond to the changed reality).
