PORTFOLIO TURNOVER

The Scheme being an open ended scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis by Authorized Participants/ Market Makers and Large Investors that may require purchase or sale of gold. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

For details pertaining to Risk Controls and Risk Mitigation refer Point no. C Part I of Section II of the Scheme Information Document.

HOW DOES AXIS GOLD ETF WORK?

How a Gold ETF works

Note: The role of the AMC is of a facilitator to the Authorised Participants/ Market Makers and Large Investors to purchase / sell Gold on their behalf for the purpose of creating/redeeming the ETF units in Creation Unit Size.

The ETF is listed on the NSE and/or any other stock exchange and investors can buy or sell units of the ETF from the secondary market. The minimum number of units that can be bought or sold on the stock exchange is 1 (one) unit.

Alternatively, the Authorised Participants / Market Makers and Large Investors can directly buy / sell the ETF units from the Fund in 'Creation Unit' size.

THROUGH THE MUTUAL FUND

I. Creation of the ETF units in Creation Unit Size:

(A) Authorised Participants/ Market Makers:

1. Authorised Participants / Market Makers may submit an application for purchase of the ETF units in Creation Unit Size to the AMC on any Business Day, within the applicable cut-off timing for NAV applicability.
2. By submitting the application the Authorised Participants / Market Makers agree to transfer (deposit) the Portfolio Deposit (i.e. gold) and the Cash Component, if any in the Scheme's account. The day on which the application is submitted is referred to as the 'T' day.
3. Authorised Participants / Market Makers are required to transfer (deposit) the Portfolio Deposit (i.e. gold) to the Custodian before the applicable cut off time, while the balance Cash Component, if any has to be paid to the AMC only by means of payment instruction of Real Time Gross Settlement (RTGS) /National Electronic Funds Transfer (NEFT) or Funds Transfer Letter/ Transfer Cheque of a bank where the Scheme has a collection account. The total amount of gold and equivalent Cash Component, if any

required for creation of units in Creation Unit Size will be based on the pro-rata amount of the NAV of the Scheme represented by the Creation Units (i.e. 1,00,000 units) being created determined on the day the request to create is placed by the Authorised Participants/ Market Makers.

4. As per the agreement with Custodian for gold, Custodian will accept gold only if the gold is in compliance with the Good Delivery norms as specified by LBMA which are as under:
 - (a) Original Assay Certificate; (b) Bar list from the refiner; (c) relevant shipping documents (airway bill and customs invoice) establishing that the gold has been shipped directly from a Good London Refiner using an accredited international shipping company on a door to door basis through one of the accredited agencies; and (d) such other documents that the Custodian may require from time to time so as to adequately indicate the purity of the Gold deposited with it.

The Custodian will ensure that all Gold deposited with it is accompanied by the above documents and that the Gold bars indicate that the fineness is 995 or above.

5. On having credited the Scheme's account with the gold deposits in the form, the custodian will confirm to the AMC of vaulting of gold and in turn AMC instructs the registrar the total number of units to be created at applicable NAV upon realization of the Cash Component.
6. The Registrar & Transfer Agent will then allocate the units in proportion of the amount received from the Authorised Participants / Market Makers and will credit the units to the demat account of the Authorised Participants/ Market Makers.

(B) Large Investors:

1. Large Investors may submit an application for purchase of the ETF units in Creation Unit Size to the AMC on any Business Day, within the applicable cut-off timing for NAV applicability.
2. Large Investors can apply to the AMC for creation of units in Creation Unit Size at NAV based prices by payment of requisite cash as determined by AMC only by means of payment instruction of Real Time Gross Settlement (RTGS) / National Electronic Funds Transfer (NEFT) or Funds Transfer Letter / Transfer Cheque of a bank where the Scheme has a collection account. The AMC will not accept Portfolio Deposit (i.e. gold) from the Large Investors.

On receipt of confirmation from the Custodian of crediting the Scheme's account with the gold deposits purchased by the AMC on behalf of the Large Investor, AMC will instruct the Registrar & Transfer Agent the total number of units to be created and upon realization of the requisite cash, the creation of units will be at intra-day NAV, based on the executed price at which Gold of prescribed purity representing the underlying index are purchased

'Where the Large Investor brings in cash for subscription of units and the amount is less than the value of Units to be allotted in creation unit size, the application will be rejected. In case of excess amount provided by the investor, the excess amount will be refunded'.

The role of the AMC is of a facilitator to the Authorised Participants / Market Makers and Large Investors to purchase / sell Gold on their behalf for the purpose of creating/redeeming the ETF units in Creation Unit Size.

The Portfolio Deposit and/or Cash Component for the ETF may change from time to time due to change in NAV.

The Scheme shall meet its expenses out of the cash held and in case, the cash is insufficient to meet expenses, the Scheme may be required to sell the gold held by the Scheme to meet the Scheme expenses.

The Fund may from time to time change the size of the Creation Unit in order to equate it with marketable lots of the underlying instruments.

The subscription request can be made to the Mutual Fund in a duly filled application form. Application forms for subscription of the ETF can be obtained from the office of AMC, Distributors and Registrar and Transfer Agents. The requisite gold constituting the Portfolio Deposit have to be submitted to the Custodian/AMC while the Cash Component has to be paid to the AMC. If the instrument for Cash Component is not honored for any reason whatsoever, the application is liable to be rejected. The AMC may insist on the certificate issued by the refiner or manufacturer certifying the purity of the gold. On confirmation of the same by the Custodian/AMC that the predefined quantity and purity of gold has been received, the AMC will transfer the respective number of Units of the Scheme into the investor's Beneficiary

Account with the Depository.

The AMC may create Creation Unit prior to receipt of all or a portion of the relevant Portfolio Deposit and Cash Component in certain circumstances where the purchaser, among other things, posts collateral to secure its obligation to deliver such outstanding Portfolio Deposit and Cash Component.

II. Redeeming of the ETF units in Creation Unit Size:

(A) Redemption in Gold

The procedure by which Authorized Participants / Market Makers and Large Investors can redeem the ETF units in Creation Unit Size is as follows:

1. Authorised Participants / Market Makers and Large Investors may make a redemption request to the AMC for redemption of the ETF units in Creation Unit Size on any Business Day in a duly filled redemption form, within the applicable cut-off timing for NAV applicability.
2. By placing the redemption request, the Authorised Participants/ Market Makers and large investors agree to transfer the requisite number of the ETF units in Creation Unit Size to the Scheme's DP accounts on T+0 business days.
3. The request for redemption by Authorised Participants / Market Makers and Large Investors needs to be enclosed with the delivery order used in the depository system duly acknowledged by the DP with whom the Authorized Participants / Market Makers and Large Investors has a depository account stating the number of the ETF units transferred to the Scheme's DP account.
4. After successful verification of the redemption request, the AMC will instruct the Custodian to transfer the Portfolio Deposit of gold to the custody account of Authorized Participant/ Market Makers and Large Investors and remit/collect the Cash Component after adjusting transaction handling charges, other applicable charges and the difference between the applicable NAV and closing price of gold. In case of delivery of gold and not transfer to custody account please refer point 6 below.
5. The expenses associated with taking the delivery of gold will have to be borne by Authorised Participants/ Market Makers and Large Investors.
6. The delivery of gold to Authorised Participants / Market Makers and Large Investors will be made at the location of the Custodian within the jurisdiction of Mumbai.
7. The redemption price for redemption of units in Creation Unit Size will be based on the applicable NAV on the redemption request date subject to cut-off timing limits.

(B) Redemption For Cash

The Fund provides for cash redemption of the ETF units in Creation Unit Size by Large Investors/Authorised Participants/ Market Makers. On receipt of such redemption requests the Fund will arrange to sell Gold on behalf of the Large Investors/Authorised Participants/ Market Makers. Accordingly the sale proceeds of Gold after adjusting necessary charges/costs and exit load, if any will be remitted to the Large Investors/Authorised Participants/ Market Makers.

The creation/redemption request for cash can be made to the Fund in a duly filled application/transaction form.

Application/Transaction form for Creation / Redemption for the ETF units in '**Creation Unit Size**' can be obtained from the office of the AMC and the Registrar & Transfer Agent.

Example of computation of Cash Component for Creation / Redemption of Units in Creation Unit Size:

As explained above, the Creation Unit is made up of 2 components i.e. Portfolio Deposit and Cash Component. The Portfolio Deposit will be determined by Fund. The Portfolio Deposit will be Gold and will be for 1 kg and in multiples of 1 kg. The value of Portfolio Deposit will change due to changes in the prices during the day.

The Cash Component will be arrived in the following manner:

Number of units comprising one Creation Unit	A	1,00,000
NAV per unit	B	Rs.40.64
Value of 1 Creation Unit	C	Rs.40,64000.00
Closing price per gram of Gold	D	Rs.4675.00
Value of Portfolio Deposit (Gold of 1 kg) (AxD)	E	Rs.46,75,000.00
Cash Component (C-E)	F	- 6,11,000.00

The above is just an example to illustrate the calculation of Cash Component.

The requisite number of Units of the ETF equaling the Creation Unit has to be transferred to the Fund's DP account and the Cash Component to be paid to the AMC.

The AMC may redeem Units prior to receipt of all or portion of the relevant number of units of the ETF in certain circumstances where the Unit holder, among other things, posts collateral to secure its obligation to deliver such outstanding Units of the Scheme.

Redemption process will be completed within 3 working Days of the date of redemption subject to confirmation with the depository records of the Scheme's DP account (where redemption is being made in cash)

BUYING / SELLING THROUGH THE STOCK EXCHANGE

Buying / selling units on the stock exchange is just like buying / selling any other normal listed securities. If an investor has bought units, an investor has to pay the purchase amount to the broker / sub-broker such that the amount paid is realised before the funds pay-in day of the settlement cycle on the exchange. If an investor has sold units, an investor has to deliver the units to the broker/sub- broker before the securities pay-in day of the settlement cycle on the exchange.

The units (in case of units bought) and the funds (in the case of units sold) are paid out to the broker on the payout day of the settlement cycle on the exchange. The trading member would pay the money or deliver the units to the investor in accordance with time prescribed by the stock exchange regulations.

If an investor has bought units, he should give standing instructions for 'Delivery-In' to his/her DP for accepting units in his/her beneficiary account. An investor should give the details of his/her beneficiary account and the DP-ID of his/her DP to his/her trading member. The trading member will transfer the units directly to his/her beneficiary account on receipt of the same from exchange's clearing corporation.

An investor who has sold units should instruct his/her Depository Participant (DP) to give 'Delivery Out' instructions to transfer the units from his/her account to the trading member account through whom he/she have sold the units. The details of the pool A/c of his/her trading member to which the units are to be transferred, unit quantity etc. should be mentioned in the delivery out instructions given by him/her to the DP. The instructions should be given will before the prescribed securities pay-in day. SEBI has advised that the delivery out instructions should be given atleast 24 hours prior to the cut off time for the prescribed securities pay in to avoid any rejection of instructions due to data entry errors, network problems, etc.

The above procedure relating to purchase and sale of units by different types of investors/Authorised Participants/ Market Makers in Axis Gold ETF is tabulated for easy reference.

Part III. OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per Unit under the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation day. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The Net Assets Value (NAV) of the Units under the Scheme shall be calculated as shown below:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's Investments} + \text{Current Assets including Accrued Income} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under Scheme on the Valuation Day}}$$

The NAV shall be calculated up to four decimal places. However the AMC reserves the right to declare the NAV up to additional decimal places as it deems appropriate.

NAV will be calculated and disclosed on all the Business Days.

The Fund will invest in gold. Since gold and other permitted instruments linked to gold are denominated in gold tonnage, it will be valued based on the market price of gold in the domestic market and will be marked to market on a daily basis. The market price of gold in the domestic market on any business day would be arrived at as under:

Domestic price of gold = (London Bullion Market Association AM fixing in US\$/ounce X conversion factor for converting ounce into kg for 0.995 fineness X rate for US\$ into INR) + custom duty for import of gold + sales tax/octroi and other levies applicable.

The Trustees reserve the right to change the source (centre) for determining the exchange rate. The AMC shall record in writing the reason for change in the source for determining the exchange rate.

Value of gold:

1. The gold held by the Scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:
 - a. adjustment for conversion to metric measures as per standard conversion rates;
 - b. adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and
 - c. addition of –
 - (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the Fund; and
 - (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from London to the place where it is actually stored on behalf of the Fund.

Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the Fund.

Provided further that where the gold held by the Scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

2. If the gold acquired by the Scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of sub-paragraph (1).

Illustration of Computation of NAV:

The computation of NAV per unit using various components is explained as follows:

Particulars	Amount in Rs
Market or Fair Value of Scheme's Investments (A)	10,00,00,000.00
Add: Current Assets including Accrued Income (B)	75,34,345.00
Less: Current Liabilities and Provisions. (C)	(30,00,000.00)
Net Assets (A+B-C)	10,45,34,345.00

No. of Units outstanding under Scheme on the Valuation Day: 100,00,000

The NAV per unit will be computed as follows: $10,45,34,345.34 / 100,00,000 = \text{Rs. } 10.4534$ per unit (rounded off to four decimals)

The Mutual Fund will ensure that the Redemption Price will not be lower than 95% of the Applicable NAV.

For other details such as policies w.r.t computation of NAV, rounding off, procedure in case of delay in disclosure of NAV etc. refer to SAI.

Illustration of impact of expense ratio on scheme's returns

For any scheme, NAV is computed on a daily basis factoring in all the assets as well as liabilities of the scheme (including expenses charged). Expenses charged to the scheme bring down its NAV and hence the investor's net returns on a corresponding basis.

Please Note:

- The purpose of the above illustration is purely to explain the impact of expense ratio charged to the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments.
- Calculations are based on assumed NAV, and actual returns on your investment may be more, or less.

Section II

I. Introduction

A. Definitions/interpretation

For details refer website of Axis Mutual Fund: <https://www.axismf.com/statutory-disclosures>

B. Risk factors

Scheme Specific Risk Factors

Risks associated with investment in Gold Exchange Traded Funds

Market Risk

The NAV of gold ETFs is closely related to the value of gold held by the scheme. The value (price) of gold may fluctuate for several reasons and all such fluctuations will result in changes in the NAV of gold ETFs. The factors that may effect the price of gold, among other things, include demand and supply for gold in India and in the global market, Indian and foreign exchange rates, interest rates, inflation trends, trading in gold as commodity, legal restrictions on the movement/trade of gold that may be imposed by RBI, Government of India or countries that supply or purchase gold to/from India, trends and restrictions on import/export of gold jewellery in and out of India, etc.

A significant portion of the aggregate world gold holdings is owned by governments, central banks and related institutions. If one or more of these institutions decides to sell in amounts large enough to cause a decline in world gold prices, the NAV of the gold ETF will be adversely affected.

Counter party Risk

India does not have an Exchange for trading gold. Therefore, the gold ETF may have to buy or sell gold from the open market, which may lead to counter party risks for trading and settlement.

Liquidity Risk

The gold ETF has to sell gold only to bullion bankers/traders who are authorized to buy gold. Though there are adequate number of players (commercial or bullion bankers) to whom the gold ETF can sell gold, it may have to resort to distress sale of gold if there is no or low demand for gold to meet its cash needs of redemption or expenses.

Handling, storing and safekeeping of physical gold

There is a risk that part or all of the scheme's gold could be lost, damaged or stolen. Access to it could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the Scheme.

Indirect taxation

For the valuation of gold by the scheme, indirect taxes as applicable (customs duty, VAT, GST etc) would be considered for NAV calculations and transactions with the AMC. Any change in the rates of indirect taxation would accordingly affect the valuation of the Scheme and the indicative NAVs published by the AMC.

Risks associated with investments in Fixed Income Securities

The following are the risks associated with investment in fixed income securities:

Interest-Rate Risk: Fixed income securities such as government bonds, Instruments corporate bonds, and money market instruments or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.

Re-investment Risk: Investments in fixed income securities carry re-investment risk as interest rates prevailing

on the coupon payment or maturity dates may differ from the original coupon of the bond.

Liquidity Risk: The liquidity of money market instruments may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the instrument. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Schemes' investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio. However, the Scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities and other money market instruments.

Credit Risk: This is the risk associated with the issuer of a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest.

Settlement Risk: Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV

Market Maker Risk

The Market Maker(s) appointed would offer buy and sell quote on the exchange for creating liquidity for investors. However, at times, on account of technical issues or unforeseen events, such quotes may deviate from iNAV or may not be available.

Risk associated with Listing of Axis Gold ETF

Listing of the units of the fund does not necessarily guarantee their liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained. Consequently, the price quotes of the fund may deviate from its face value / NAV.

Trading in Units of the Scheme on the Exchange may be halted because of market conditions or for reasons that in view of Exchange Authorities or SEBI, trading in Units of the Scheme is not advisable. In addition, trading in Units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Units of the Scheme will continue to be met or will remain unchanged. Any changes in trading regulations by the Stock Exchange(s) or SEBI may inter-alia result in wider premium/ discount to NAV. The Units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of Units of the Scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the Scheme. However, the Units of the Scheme can be subscribed / redeemed in Creation Unit size directly with the Fund, which provides efficient arbitrage between the traded prices and the NAV, thereby reducing the incidence of the units of the Scheme being traded at premium/discounts to NAV. However, any changes in the trading regulations by NSE/Stock Exchange/SEBI may affect the ability of the market makers/Authorized Participants to arbitrage resulting into wider premium or discount to NAV. The Units will be issued in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.

The market price of the Units of the Scheme, like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the Unit (or NAV), and (2) demand and supply of Units in the market. Sizeable demand or supply of the Units in the Exchange may lead to market price of the Units to quote at premium or discount to NAV.

Risk associated with Redemption of units of Axis Gold ETF

Investors may note that even though this is an open-ended scheme, the Scheme would repurchase/redeem Units in Creation Unit size only. Thus unit holdings less than the Creation Unit size can

only be sold through the secondary market on the Stock Exchange where these units are listed, subject to the rules and regulations of the Exchange.

B. Risk mitigation strategies

Risk Control

As the scheme is an Exchange Traded Fund investing predominantly in Gold, it is not intended to have a diversified portfolio. The primary risk in investing in gold is the risk to the holding of gold (e.g. through theft or damage). The scheme, through the custodian, will store the gold in secure vaults and insure the same against common risks. For the investments in money market instruments, the AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme.

Risk control measures with respect to investment in Gold

Tracking error risk: The performance of the Scheme may not commensurate with the performance of the benchmark index on any given day or over any given period. Such variation, referred to as tracking error may impact the performance of the Scheme.

Mitigation: The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible.

Custody Risk - There is a risk that part or all of the physical Gold belonging to the underlying Scheme could be lost, damaged or stolen.

Mitigation - In order to ensure safety, the said Gold will be stored with custodian in its vaults. The custodian will insure/cover all such risks.

Liquidity Risk - Inability to buy / sell appropriate quantity of gold

Mitigation - The underlying scheme may retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements. The Trustee (subject to applicable regulations) in general interest of the Unit holders of the underlying scheme offered under its Scheme Information Document and keeping in view of the unforeseen circumstances / unusual market conditions, may limit the total number of Units, which can be redeemed on any Business Day.

Risk control measures with respect to Debt & Money Market Instruments

Market Risk / Interest Rate Risk: Changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. The price movement up and down in fixed income securities will lead to possible movements in the NAV.

Mitigation - In a rising interest rates scenario the scheme may increase its investment in money market securities whereas if the interest rates are expected to fall the allocation to debt securities with longer maturity may be increased thereby mitigating risk to that extent.

Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM).

Mitigation- The scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds.

Credit risk or default risk: It refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security). Normally, the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Mitigation– Apart from the basic examination, management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower. In case of securitized debt instruments, the Scheme will ensure that these instruments are sufficiently backed by assets.
