~Long Term Capital Gains on equity-oriented fund is to be taxed at 10% on gains greater than Rs. 1 lakh without indexation and subject to payment of STT.

The mode of computation of cost of acquisition in respect of the long-term gains earned on sale of unit of an equity-oriented fund acquired before the 1st day of February 2018, shall be deemed to be the higher of –

a) the actual cost of acquisition of such asset; and

b) the lower of –

(i) the fair market value of such asset; and

(ii) the full value of consideration received or accruing as a result of the transfer of the capital asset.

Note 1: As per amendment to Finance Bill, 2023 gains arising on transfer, redemption or maturity of specified mutual funds acquired on or after 1 April 2023 will deemed to be 'short-term capital gains' (regardless of the period of holding).

Specified mutual fund means a mutual fund by whatever name called, where not more than 35% of its total proceeds is invested in the equity shares of domestic companies.

Accordingly, gains arising on transfer, redemption or maturity of specified mutual funds which were acquired before 1 April 2023 and are held for a period of more than 36 months shall continue to be taxable (along with withholding tax in case of non-resident unit holders) at the following rates.

Particulars	Taxability in the hands of Individuals / Non-corporates / Corporates	
	Resident	Non-Resident
-Listed funds	20% with indexation benefit in respect of cost of acquisition (plus applicable surcharge and health and education cess)	20% with indexation benefit in respect of cost of acquisition (plus applicable surcharge and health and education cess)
-Unlisted funds	20% with indexation benefit in respect of cost of acquisition (plus applicable surcharge and health and education cess)	10% without foreign currency and indexation benefit in respect of cost of acquisition (plus applicable surcharge and health and education cess)

HOW TO READ A FACTSHEET

AUM
AUM or assets under management refers to the recent/ updated cumulative market value of investments managed by a mutual fund or any investment firm.

NAV
The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

BENCHMARK
A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

NATURE OF SCHEME
The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

APPLICATION AMOUNT FOR FRESH SUBSCRIPTION
This is the minimum investment amount for a new investor in a mutual fund scheme.

MINIMUM ADDITIONAL AMOUNT
This is the minimum investment amount for an existing investor in a mutual fund scheme.

EXIT LOAD
Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the redemption price would be ₹ 99 Per Unit.

YIELD TO MATURITY
The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

MODIFIED DURATION
Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

STANDARD DEVIATION
Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

SHARPE RATIO
The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

BETA
Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

HOLDINGS
The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

RATING PROFILE
Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes one of the fund's typical features of debt funds.

TRACKING ERROR
Tracking error is a measure of how closely a portfolio follows the index to which it is benchmarked. It is calculated as the standard deviation of the difference between the portfolio and index returns.

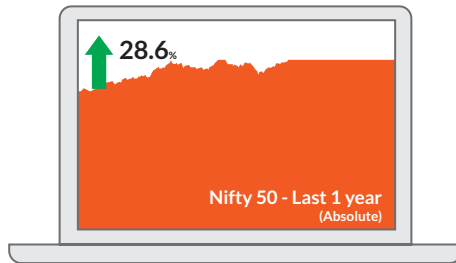

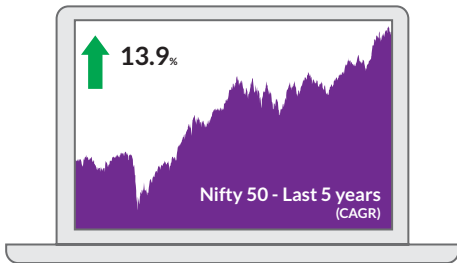

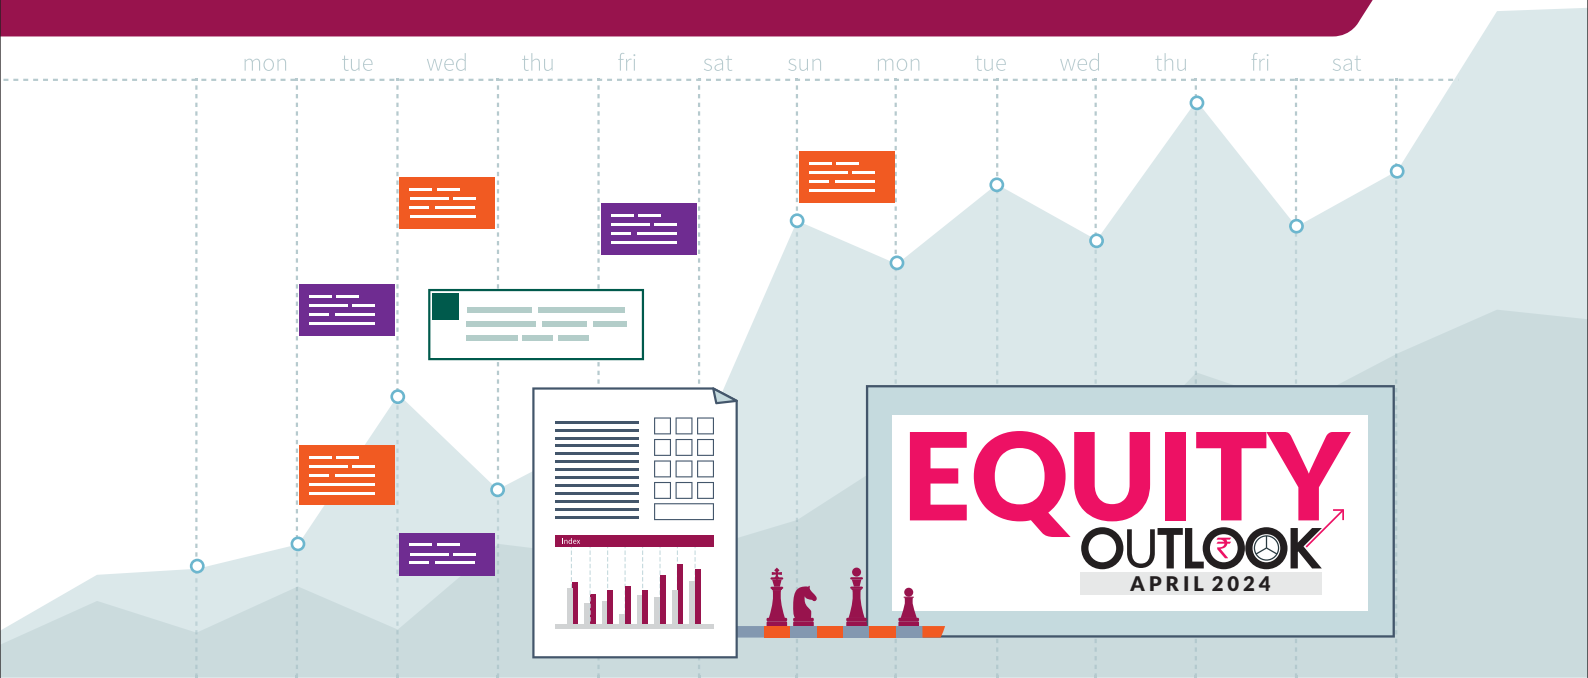

NOTE
SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

FUND MANAGER
An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

SIP
SIP or Systematic Investment Plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

QUICK TAKE

Equity market valuations are broadly reasonable adjusted for the cyclical low in earnings and potential for revival going forward.

We remain bullish on equities from a medium to long term perspective.

Investors are suggested to have their asset allocation plan based on one's risk appetite and future goals in life.

KEY HIGHLIGHTS

MARKETS

Indian equities faced volatility in the first half of the month but rebounded in the later half closing on a higher note. The S&P BSE Sensex and the NIFTY 50 ended 1.6% higher each. Mid-caps and small caps saw a sharp correction this month and underperformed the frontline indices. The NIFTY Midcap 100 ended the month down 0.5% while NIFTY Small cap 100 ended lower 4.4%. Market volatility was lower compared to the previous month while the advance decline line was down 14% in March.

Overall, FY2023-24 ended on an optimistic note led by strong buying by Foreign Portfolio Investors (FPIs) and Domestic Institutional Investors (DIIs), robust macroeconomic fundamentals and strong earnings momentum. This coupled with a buoyant investor sentiment propelled frontline indices to all-time highs. India's market capitalisation crossed US\$ 4 trn placing the country in the fifth spot globally. The BSE SENSEX ended up 27.8%, the NIFTY 50 was up 31.7% while the NIFTY Midcap 100 and the NIFTY Smallcap 100 surpassed expectations, rising 64.9% and 75.5% respectively. Midcaps and small caps experienced a sharp correction in March exacerbated by regulatory measures aimed at curbing speculation. Nonetheless, markets ended 10 of the 12 months in positive territory.

FPI inflows in FY24 stood at Rs 2.08 lakh crore (US\$21 bn). This was the highest FPI inflow since FY21 when the FPI investment stood at Rs 2.74 lakh crore. Furthermore, even domestic inflows (Rs 2.06 lakh crore) more than matched FPI flows. Meanwhile in the month of March, FPI inflows stood at Rs 35,098 cr (US\$4.2 bn) while DIIs bought stocks to the tune of US\$6.8 bn. Domestic mutual fund investors have been net buyers in equity-oriented schemes for 36 months in a row. Over the last 11 months, investments through systematic investment plans (SIPs) scaled multiple record highs.

Global rating agency Moody's earlier this month raised India's growth forecast for the 2024 calendar year to 6.8% and said that the country will remain the fastest growing among G20 countries. Economic growth as evidenced by the headline GDP print of 8.4% in Q3FY24 remains

strong. Furthermore, inflation is slowing down and could give the central bank room for rate cuts in the latter half of the year.

With markets at or near all-time highs, investors should be cautious of potential volatility in the near term. Mid-caps and small caps have experienced a sharp run barring the last two months, valuations in India still remain expensive relative to the Asian peers and India remains the most expensive market (on both forward P/E and trailing P/B basis). Investors should focus on the long term rather than making short term decisions and utilise short term corrections to increase exposure to mutual funds.

Elections are finally around the corner and the outcome of these would set the tone for the markets. In particular, policy continuity is the key and could likely set the stage for a further rally in equities. The immediate near term trigger is the reporting season. Meanwhile, India's long term growth story remains intact. India is one of the fastest growing economies globally. Construction cycle is already underway with rise in Government Infra spending and the Real estate upturn. Rising private capex should further accelerate the capex cycle. Corporate balance sheets and Banks are in great shape laying a platform for a private capex cycle.

We anticipate that market dynamics will be influenced by favorable cyclical factors and capex-driven segments such as infrastructure, domestic oriented manufacturing, and utilities should benefit. Our portfolios are positioned accordingly and we are overweight these segments. We are also optimistic and overweight consumer discretionary sector, particularly automobiles and real estate. We also have exposure to sectors such as power, defense, and transportation that could benefit from government policies. As companies seek financing for expansion and new projects, banks are likely to see an increase in credit demand, which should bolster their performance. We expect the improved pricing environment to continue and strengthen in the pharmaceutical sector. We are underweight in the exports segment due to slowing global growth.

INVESTMENT OBJECTIVE: To generate long-term capital appreciation by investing in mis-priced stocks facing special situations. The mis-pricing of stocks can occur due to companies facing special situations like regulatory/policy changes, management restructuring, technology led disruption and innovation or any temporary challenges in the operating environment. However, there can be no assurance that the investment objective of the Scheme will be achieved.

Note: Since the fund has not completed 1-year annualized tracking error is taken from the launch date of the scheme. The tracking error may look optically elevated on account of deployment during the first few days of the scheme. This effect is transitional in nature and normalizes as the fund completes 1 year since fund launch.

FIXED INCOME

OUTLOOK ₹

APRIL 2024

QUICK TAKE

- Expect lower interest rates in the second half of 2024.
- Investors should add duration with every rise in yields, as yield upside limited.
- Mix of 10-year duration and 3-5-year duration assets are best strategies to invest in the current macro environment.
- Credits continue to remain attractive from a risk reward perspective give the improving macro fundamentals.

Bond markets were quite lackluster this month as investors assessed the outlook for interest rates in light of higher than expected inflation data in the US. Most markets have now aligned to realistic expectations of interest rate cuts. Yields on US Treasuries ended the month slightly lower at 4.20%. Indian government bond yields hovered in a tight range through the month and fell marginally by 3 bps to 7.05%. Foreign Portfolio Investors (FPI) flows were buyers of government bonds to the tune of US\$1.6 bn over the month and year to date, debt inflows total to US\$6.7 bn.

Key Market Events

Global interest rate environment:

Recent macroeconomic data in the US has exhibited mixed trends, and monthly inflation appears uneven but would gradually decline. During its policy meeting, the US Federal Reserve (Fed) decided to keep its key interest rate unchanged. Despite revising its inflation and growth forecasts upward, the Fed maintained its projection for three rate cuts throughout 2024. Notably, the Fed emphasized that it will refrain from reducing the target range until it gains greater confidence that inflation, currently hovering around 3%, is moving sustainably toward the Fed's 2% goal.

The European Central Bank (ECB) has flagged a possible rate cut for June, depending on whether wage growth continues to moderate. Meanwhile, the Reserve Bank of India (RBI) left its interest rates unchanged in its policy meeting on 5th April.

As anticipated, the Bank of Japan ended its yield curve control and raised interest rates for the first time since 2007, effectively putting an end to the world's only negative rates regime. Surprisingly, market reactions were muted and the central bank continued to buy Japanese government bonds. In China, macroeconomic indicators particularly manufacturing data has showed signs of a rebound. Additionally, the central bank has introduced several policy measures related to the real estate sector.

Inflationary pressures slow down but oil prices up: CPI stayed unchanged at 5.1% in February while core CPI declined further to 3.4%. This was led by a slowdown in prices across the board, for both core goods and services, from the previous month's levels. Going forward, a normal monsoon could lead to a downward trajectory in inflation in the second half of 2024.

Lower H1 government borrowing: Out of gross market borrowing of Rs 14.13 trillion estimated for 2024-25, Rs 7.5 trillion, or 53%, is planned to be

borrowed in the first half of FY 2024-25. Both gross and net borrowings are 15-25% lower than last year. A lower borrowing calendar augurs well for the bond markets and also shows the changing investor demand patterns. We expect alignment of higher supply in the second half with expected FPI flows on account of bond inclusion.

Market view

Inflation across economies has peaked, and the pace is suggestive of a further slowdown. However, rising crude could likely push up inflation. We expect the Fed and other central banks including the ECB to start lowering rates from June onwards. Accordingly, given rate cuts are almost three months away, yields could have a limited upside. In line with our view, the RBI maintained a status quo and we believe that the central bank would lower rates after the Fed. The only risk to our view is rising oil prices in the near term. If oil prices remain under control, we expect that inflation could touch 4% over the course of the year.

While inflation continues to moderate, economic growth as expected by the RBI remains high and India remains one of the fastest growing economy globally. Proactive liquidity management by the RBI has led to a shift in operative rate from 6.75% to 6.5% in the last 30 days. With policy rates remaining incrementally stable, we remain long duration across our portfolios within the respective scheme mandates. The path of fiscal consolidation, demand supply dynamics in government bonds and expectations of falling interest rates in the US, Europe and in India make an interesting theme for a long duration stance for investors.

Positioning & Strategy

As the fixed income curve is pricing in no rate cuts till December, we have retained our long duration stance across our portfolios within the respective scheme mandates. We do expect the 10-year bond yields to soften to 6.75% over the next few months.

From a strategy perspective, while the overall call is to play a falling interest rate cycle over the next 6-12 months, markets are likely to see sporadic rate movements. From a strategy perspective, we continue to add duration across portfolios within the respective investment mandates. Investors could use this opportunity to top up on duration products with a structural allocation to short and medium duration funds and a tactical play on Gilt funds. We have taken a tactical allocation to corporate and SDL bonds in the dynamic and Gilt Funds to take advantage of the spread compression on account of improved liquidity conditions and lower supply.

Note: Since the Scheme has not completed Six Months, performance details for the Scheme are not provided. Since the fund has not completed 1-year annualized tracking error is taken from the launch date of the scheme. The tracking error may look optically elevated on account of deployment during the first few days of the scheme. This effect is transitional in nature and normalizes as the fund completes 1 year since fund launch.

HYBRID

OUTLOOK ₹ 
APRIL 2024

Quick Take - Equity

- Equity market valuations are broadly reasonable adjusted for the cyclical low in earnings and potential for revival going forward.
- We remain bullish on equities from a medium to long term perspective.
- Investors are suggested to have their asset allocation plan based on one's risk appetite and future goals in life.

Quick Take - Fixed Income

- Expect lower interest rates by the second half of 2024.
- Investors should add duration with every rise in yields, as yield upside limited.
- Mix of 10-year duration and 3-5-year duration assets are best strategies to invest in the current macro environment.
- Credits continue to remain attractive from a risk reward perspective give the improving macro fundamentals.

KEY HIGHLIGHTS

Indian equities faced volatility in the first half of the month but rebounded in the later half closing on a higher note. The S&P BSE Sensex and the NIFTY 50 ended 1.6% higher each. Mid-caps and small caps saw a sharp correction this month and underperformed the frontline indices. The NIFTY Midcap 100 ended the month down 0.5% while NIFTY Small cap 100 ended lower 4.4%. Market volatility was lower compared to the previous month while the advance decline line was down 14% in March.

Bond markets were quite lackluster this month as investors assessed the outlook for interest rates in light of higher than expected inflation data in the US. Most markets have now aligned to realistic expectations of interest rate cuts. Yields on US Treasuries ended the month slightly lower at 4.20%. Indian government bond yields hovered in a tight range through the month and fell marginally by 3 bps to 7.05%. Foreign Portfolio Investors (FPI) flows were buyers of government bonds to the tune of US\$1.6 bn over the month and year to date, debt inflows total to US\$6.7 bn.

Key Market Events

Global interest rate environment: Recent macroeconomic data in the US has exhibited mixed trends, and monthly inflation appears uneven but would gradually decline. During its policy meeting, the US Federal Reserve (Fed) decided to keep its key interest rate unchanged. Despite revising its inflation and growth forecasts upward, the Fed maintained

its projection for three rate cuts throughout 2024. Notably, the Fed emphasized that it will refrain from reducing the target range until it gains greater confidence that inflation, currently hovering around 3%, is moving sustainably toward the Fed's 2% goal.

The European Central Bank (ECB) has flagged a possible rate cut for June, depending on whether wage growth continues to moderate. Meanwhile, the Reserve Bank of India (RBI) left its interest rates unchanged in the policy meeting on 5th April.

As anticipated, the Bank of Japan ended its yield curve control and raised interest rates for the first time since 2007, effectively putting an end to the world's only negative rates regime. Surprisingly, market reactions were muted and the central bank continued to buy Japanese government bonds. In China, macroeconomic indicators particularly manufacturing data has showed signs of a rebound. Additionally, the central bank has introduced several policy measures related to the real estate sector.

Inflationary pressures slow down but oil prices up: CPI stayed unchanged at 5.1% in February while core CPI declined further to 3.4%. This was led by a slowdown in prices across the board, for both core goods and services, from the previous month's levels. Going forward, a normal monsoon could lead to a downward trajectory in inflation in the second half of 2024.

KEY HIGHLIGHTS

Lower H1 government borrowing: Out of gross market borrowing of Rs 14.13 trillion estimated for 2024-25, Rs 7.5 trillion, or 53%, is planned to be borrowed in the first half of FY 2024-25. Both gross and net borrowings are 15-25% lower than last year. A lower borrowing calendar augurs well for the bond markets and also shows the changing investor demand patterns. We expect alignment of higher supply in the second half with expected FPI flows on account of bond inclusion.

Market View

Equity Markets

FPI inflows in FY24 stood at Rs 2.08 lakh crore (US\$21 bn). This was the highest FPI inflow since FY21 when the FPI investment stood at Rs 2.74 lakh crore. Furthermore, even domestic inflows (Rs 2.06 lakh crore) more than matched FPI flows. Meanwhile in the month of March, FPI inflows stood at Rs 35,098 cr (US\$4.2 bn) while DIIs bought stocks to the tune of US\$6.8 bn. Domestic mutual fund investors have been net buyers in equity-oriented schemes for 36 months in a row. Over the last 11 months, investments through systematic investment plans (SIPs) scaled multiple record highs.

Global rating agency Moody's earlier this month raised India's growth forecast for the 2024 calendar year to 6.8% and said that the country will remain the fastest growing among G20 countries. Economic growth as evidenced by the headline GDP print of 8.4% in Q3FY24 remains strong. Furthermore, inflation is slowing down and could give the central bank room for rate cuts in the latter half of the year.

With markets at or near all-time highs, investors should be cautious of potential volatility in the near term. Mid-caps and small caps have experienced a sharp run barring the last two months, valuations in India still remain expensive relative to the Asian peers and India remains the most expensive market (on both forward P/E and trailing P/B basis). Investors should focus on the long term rather than making short term decisions and utilise short term corrections to increase exposure to mutual funds.

Elections are finally around the corner and the outcome of these would set the tone for the markets. In particular, policy continuity is the key and could likely set the stage for a further rally in equities. The immediate near term trigger is the reporting season. Meanwhile, India's long term growth story remains intact. India is one of the fastest growing economies globally. Construction cycle is already underway with rise in Government Infra spending and the Real estate upturn. Rising private capex should further accelerate the capex cycle. Corporate balance sheets and Banks are in great shape laying a platform for a private capex cycle.

We anticipate that market dynamics will be influenced by favorable cyclical factors and capex-driven segments such as infrastructure,

domestic oriented manufacturing, and utilities should benefit. Our portfolios are positioned accordingly and we are overweight these segments. We are also optimistic and overweight consumer discretionary sector, particularly automobiles and real estate. We also have exposure to sectors such as power, defense, and transportation that could benefit from government policies. As companies seek financing for expansion and new projects, banks are likely to see an increase in credit demand, which should bolster their performance. We expect the improved pricing environment to continue and strengthen in the pharmaceutical sector. We are underweight in the exports segment due to slowing global growth.

Debt Markets

Inflation across economies has peaked, and the pace is suggestive of a further slowdown. However, rising crude could likely push up inflation. We expect the Fed and other central banks including the ECB to start lowering rates from June onwards. Accordingly, given rate cuts are almost three months away, yields could have a limited upside. As expected, the RBI maintained a status quo in its policy meeting. We believe that the central bank would lower rates after the Fed. The only risk to our view is rising oil prices in the near term. If oil prices remain under control, we expect that inflation could touch 4% over the course of the year.

While inflation continues to moderate, economic growth as expected by the RBI remains high and India remains one of the fastest growing economy globally. Proactive liquidity management by the RBI has led to a shift in operative rate from 6.75% to 6.5% in the last 30 days. With policy rates remaining incrementally stable, we remain long duration across our portfolios within the respective scheme mandates. The path of fiscal consolidation, demand supply dynamics in government bonds and expectations of falling interest rates in the US, Europe and in India make an interesting theme for a long duration stance for investors.

As the fixed income curve is pricing in no rate cuts till December, we have retained our long duration stance across our portfolios within the respective scheme mandates. We do expect the 10-year bond yields to soften to 6.75% over the next few months.

From a strategy perspective, while the overall call is to play a falling interest rate cycle over the next 6-12 months, markets are likely to see sporadic rate movements. From a strategy perspective, we continue to add duration across portfolios within the respective investment mandates. Investors could use this opportunity to top up on duration products with a structural allocation to short and medium duration funds and a tactical play on Gilt funds. We have taken a tactical allocation to corporate and SDL bonds in the dynamic and Gilt Funds to take advantage of the spread compression on account of improved liquidity conditions and lower supply.

SIP PERFORMANCE OF SELECT SCHEMES (as on 28th March, 2024)

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time. SIP returns are computed after accounting for cash flow by using XIRR method (investment internal rate of return).*

#Formerly known as Axis Triple Advantage Fund- Regular Plan - Growth Option

**The benchmark of Axis Multi Asset Allocation Fund is Nifty 500 TRI Index (65%) + Nifty Composite Debt Index (20%) + Domestic Price of Physical Gold (7.5%) + Domestic Price of Physical Silver (7.5%) pursuant to change in fundamental attribute which was effective from April 27, 2023. Investors are requested to note that Domestic Price of Silver is available from September 2022 since the inception of Axis Silver ETF. Hence, the existing benchmark for comparing with scheme returns is placed, once we start building the data for Silver, we will keep updating the returns with revised benchmark.
