~Long Term Capital Gains on equity-oriented fund is to be taxed at 10% on gains greater than Rs. 1 lakh without indexation and subject to payment of STT.

The mode of computation of cost of acquisition in respect of the long-term gains earned on sale of unit of an equity-oriented fund acquired before the 1st day of February 2018, shall be deemed to be the higher of –

a) the actual cost of acquisition of such asset; and

b) the lower of –

(i) the fair market value of such asset; and

(ii) the full value of consideration received or accruing as a result of the transfer of the capital asset.

Note 1: As per amendment to Finance Bill, 2023 gains arising on transfer, redemption or maturity of specified mutual funds acquired on or after 1 April 2023 will deemed to be 'short-term capital gains' (regardless of the period of holding).

Specified mutual fund means a mutual fund by whatever name called, where not more than 35% of its total proceeds is invested in the equity shares of domestic companies.

Accordingly, gains arising on transfer, redemption or maturity of specified mutual funds which were acquired before 1 April 2023 and are held for a period of more than 36 months shall continue to be taxable (along with withholding tax in case of non-resident unit holders) at the following rates.

Particulars	Taxability in the hands of Individuals / Non-corporates / Corporates	
	Resident	Non-Resident
-Listed funds	20% with indexation benefit in respect of cost of acquisition (plus applicable surcharge and health and education cess)	20% with indexation benefit in respect of cost of acquisition (plus applicable surcharge and health and education cess)
-Unlisted funds	20% with indexation benefit in respect of cost of acquisition (plus applicable surcharge and health and education cess)	10% without foreign currency and indexation benefit in respect of cost of acquisition (plus applicable surcharge and health and education cess)

Certain deductions available under Chapter VI-A of the Act (Equity Linked Savings Schemes)

Equity Linked Savings Schemes (ELSS) are schemes formulated under the Equity Linked Savings Scheme (ELSS), 2005, issued by the Central Government.

Accordingly, any investment made by an assessee in the ELSS of the Fund up to a sum of Rs 1,50,000 in a financial year would qualify for deduction under section 80C of the Act.

An "assessee" as per ELSS 2005 means:—

- (i) an individual; or
- (ii) a Hindu undivided family; or
- (iii) an association of persons or a body of individuals consisting, in either case, only of husband and wife governed by the system of community of property in force in the State of Goa and Union Territories of Dadra and Nagar Haveli and Daman and Diu by whom, or on whose behalf, investment is made;

Note- Any individual/ HUF opting to be taxed under the new tax regime (i.e. opting for the option to pay taxes at a concessional rate as per new slab rates) will have to give up certain exemptions and deductions. Since, individuals/ HUF opting for the new tax regime are not eligible for Chapter VI-A deductions, the investment in ELSS Funds cannot be claimed as deduction from the total income.

HOW TO READ A FACTSHEET

AUM

AUM or assets under management refers to the recent/ updated cumulative market value of investments managed by a mutual fund or any investment firm.

NAV

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

BENCHMARK

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

NATURE OF SCHEME

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

APPLICATION AMOUNT FOR FRESH SUBSCRIPTION

This is the minimum investment amount for a new investor in a mutual fund scheme.

MINIMUM ADDITIONAL AMOUNT

This is the minimum investment amount for an existing investor in a mutual fund scheme.

EXIT LOAD

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the redemption price would be ₹ 99 Per Unit.

YIELD TO MATURITY

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

MODIFIED DURATION

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

STANDARD DEVIATION

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

SHARPE RATIO

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

BETA

Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

QUICK TAKE

Equity market valuations are broadly reasonable adjusted for the cyclical low in earnings and potential for revival going forward.

We remain bullish on equities from a medium to long term perspective.

Investors are suggested to have their asset allocation plan based on one's risk appetite and future goals in life.

KEY HIGHLIGHTS

MARKETS

Globally two events dominated headlines through most of the month - rising US Treasury yields and the geopolitical conflict between Israel and Hamas. These led equities across the globe and in India to buckle under pressure as investors shifted to less riskier assets. The S&P BSE Sensex fell 3% while the NIFTY 50 ended 2.8% down. NIFTY Midcap 100 & NIFTY Smallcap 100 too declined by 4.1% and 0.8% respectively. For the first time in many months, the large caps outperformed midcaps but underperformed smallcaps. Market breadth weakened with the advance/decline ratio down in October while volatility was higher compared to the previous month.

Markets have been witnessing bouts of consolidation and this will likely continue in the near term. Investors should be mindful of the volatility seen in the mid and small caps. This segment has more representation of B2B companies having exposure to investment and exports part of economy. Underperformance of consumption compared to investments and exports has helped the rally in mid-small cap so far. With expectations of a global slowdown, this could be impacted, although investment part of economy could continue to do well.

CORPORATE

FPIs retreated for the second consecutive month and October saw outflows to the tune of Rs 24,548 cr. The sectors that saw maximum outflows, were financials, FMCG, power and IT. In contrast, domestic institutional investors infused Rs 28,254 cr this month. The ongoing earnings season has been in line with market expectations; however, few bellwether companies in the IT segment did disappoint. Many banks and financial companies reported margin pressure due to lagged impact of repricing of the deposit book. Of the hits and misses, most beats were concentrated in Utilities, NBFC, Energy and Autos, while misses were Consumer Durables. Discretionary consumption volume growth across sectors remains low, pinning hopes on the festive season. B2B sectors/segments of companies reported strong volume growth due to higher government capex and lower commodity prices on annual basis, while volume growth in the exports segment took a hit.

We have always suggested to our investors to stay invested in the markets and use the bouts of volatility as opportunities to increase exposure to the markets. Patience is the biggest reward to long-term investors. Five states witness elections in November with the outcome in early December and this could provide fresh triggers to the market. Overall, India's growth story remains one of resilience compared to its regional peers and this will limit the downside despite a cyclical regional slowdown.

GLOBAL

Headline inflation dropped to 5.02% due to lower vegetable prices. After double digit gains in September, crude oil process moderated ~8% despite the Israel-Hamas conflict. Markets globally have been cautious about the conflict given its potential to spread wide and far and any escalation of war could lead to attacks on oil tankers. Incoming macroeconomic data pointed to strength in the economy - GST collections, automobile sales, while industrial production and PMI indicators also showed strength.

Demand growth for cement and construction materials has been the highest in many years. With corporate balance sheets deleveraging, and a large part of operating cash flows in the last few years used to bring down debt; the debt-to-equity and debt-to-EBITDA ratios for major corporates are both near cyclical lows. Leverage among the lenders has also come down, partly due to fund-raising and partly due to several years of low credit growth, where surpluses have accumulated on balance sheets. These should offset the several headwinds faced by the economy. Even if the central bank keeps the repo rate unchanged going forward, financial conditions can continue to tighten as older loans roll over. The global economic slowdown has already brought down growth in goods and services; a likely US recession next year can intensify pressure in some of the export-driven sectors.

Since the fund has not completed 1-year annualized tracking error is taken from the launch date of the scheme. The tracking error may look optically elevated on account of deployment during the first few days of the scheme. This effect is transitional in nature and normalizes as the fund completes 1 year since fund launch.

FIXED INCOME

OUTLOOK

NOVEMBER 2023

QUICK TAKE

- Broadly interest rate cycles have peaked both in India and globally.
- Investors should add duration with every rise in yields.
- Mix of 10-year duration and 2-4-year duration assets are best strategies to invest in the current macro environment.
- Credits continue to remain attractive from a risk reward perspective given the improving macro fundamentals.

Indian government bond yields rose higher over the month, trading in a wider band of 7.23-7.40%. The key factors driving the bond markets were the rising US Treasury yields, the geopolitical conflict between Israel and Hamas, and the likelihood of OMO sales by the Reserve Bank of India (RBI). Debt markets witnessed higher inflows over the month due to the higher yields offered by Indian government bonds. The impending inclusion of government bonds in JP Morgan Global Indices has also evinced interests from FPIs.

Key Market Events

US Treasury yields rise over the month, growth defies slowdown fears: The yields on the 10-year US Treasury briefly touched 5% before falling to 4.85-4.95% levels. Fiscal deficit in the US rose to ~\$1.7 trn for the year ended

September 2023 and this could likely keep yields elevated. The US economy resisted fears of an impending slowdown and posted stronger than expected growth. The country's GDP expanded 4.5% in Q3FY24 vs 2.1% in the previous quarter due to a tight jobs market and higher consumer spending. In a widely expected move, the Fed held the federal funds rate unchanged for the second consecutive month in a target range between 5.25%-5.5%. The Fed chairman Jerome Powell said that the process of bringing down inflation to 2% has a long way to go and they will remain data dependent. However, we believe tighter financial conditions and higher treasury yields have resulted into an indirect rate hike.

Inflationary pressures dissipate while oil prices also fall: Headline inflation further moderated to 5.02% as against 6.8% seen in August following a broad based decline in vegetable prices. Core inflation, too retreated to 4.6% vs 4.8% in August. While inflation is within the central bank's band of 2-6%, the governor has emphasized that they are targeting the 4% midpoint thereby signaling no change to their stance on the monetary policy. However, the below average monsoon could keep prices elevated, particularly for cereals and pulses. Surprisingly, crude oil prices fell to below \$90 even amid increasing fears of the conflict in West Asia intensifying further.

Central banks remain on a pause: Central banks of the large developed economies are now on a pause mode. This includes the key ones, the US, Europe and the UK. "Higher for longer" theme prevails across economies. The focus has moved from how high interest rates can go up to how long will interest rates stay elevated. The RBI in its monetary policy meeting in early October held interest rates unchanged but surprised the markets with unexpected Open Market Operations (OMOs). The minutes of the meeting released later in the month outline the MPC's unanimous views on the transient spike in headline inflation, along with moderating core inflation, keeping policy rates steady and anchoring of inflationary expectations. On

the growth front, all members were concurrent on the resilient trend in growth, driven by broad-based strength in domestic demand, notwithstanding weak global growth and uncertain macro environment.

Market view

US Treasury yields briefly breached the 5% mark before retreating to 4.93% at end of October and 4.75% post the policy announcement. We expect the yields to trade in a higher range. Concurrent to our view, the Fed held interest rates unchanged and we believe that the top has already been reached. The US economy did exhibit strong growth contrary to market expectations, and the macro data also has been robust – a strong payrolls report, and rising retail sales. However, we still hold our view that growth has probably peaked and slowdown could become more apparent in the coming quarters. Our view is based on two reasons – slowdown in China that will have repercussions globally and "higher for longer rates" in the developed economies. Central banks will remain on hold until inflation sustains at lower levels and based on the strength of the economy. The struggle in US is becoming increasingly apparent through rising credit card defaults, higher number of corporate bankruptcy filings and the higher fiscal deficit. Likewise, the central banks too have reached a peak of their rate cycle and we expect growth to be subdued in these economies as well. Policy makers in China are trying to boost the economy with modest support for the property sector, infrastructure spending and consumption. However we believe these would have a limited impact in turning around the economy.

In India, headline inflation declined and is within RBI's comfort zone. While the central bank expects it to fall further, the effects of imported inflation (crude oil prices) and a deficit monsoon could set the momentum. Briefly, we could again see rising vegetable prices resulting into higher price pressures but we do not expect these to be a grave concern. We believe that the RBI will remain on a pause mode till the first half of 2024 and will make use of liquidity management tools to navigate any uncertainties emanating globally. The likely inclusion of government bonds in Bloomberg indices could further boost inflows. Most part of the fixed income curve is pricing in no cuts for the next one year. We reiterate that interest rates have peaked globally and in India. With policy rates remaining incrementally stable, we have added duration gradually across our portfolios within the respective scheme mandates. We do expect the 10-year bond yields to touch 6.75% by April-June 2024.

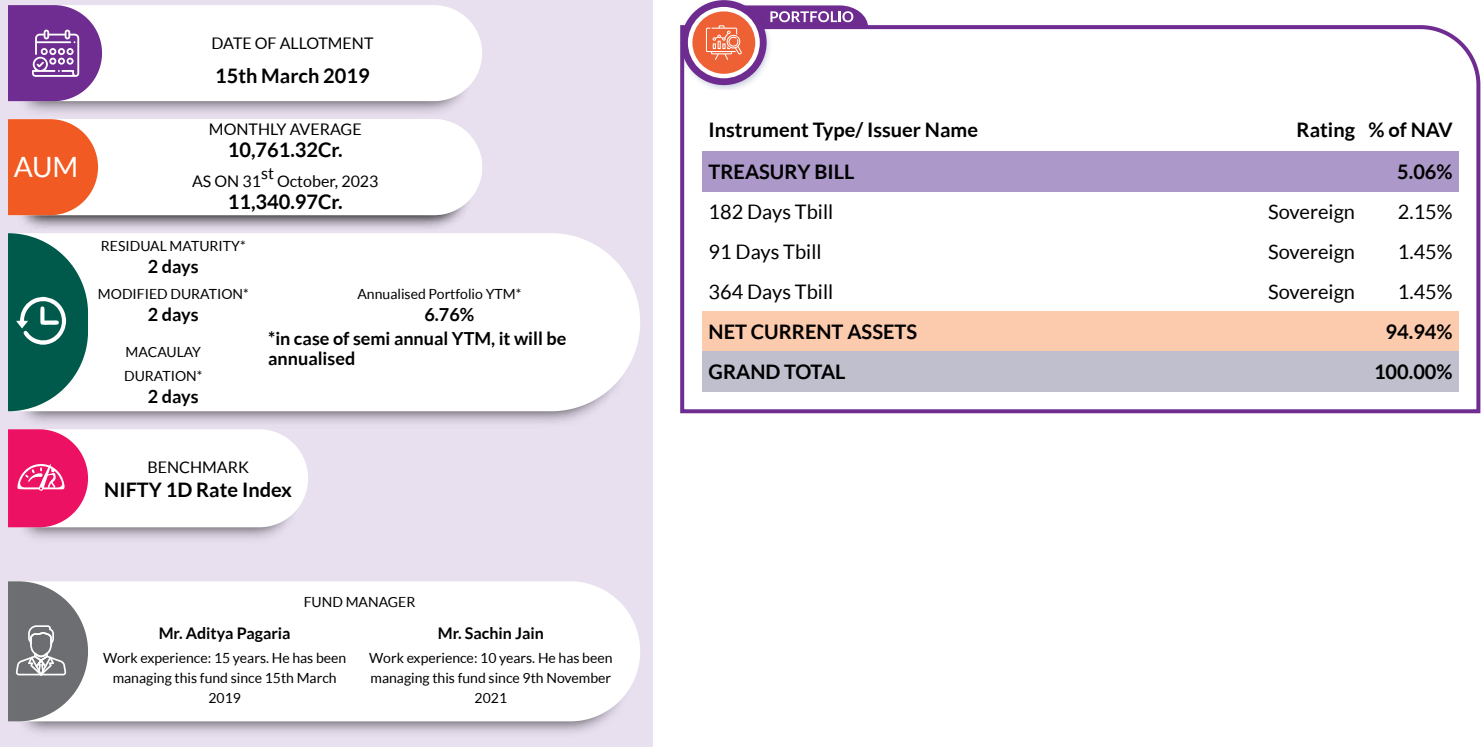

From a strategy perspective, we continue to add duration across portfolios within the respective investment mandates. We expect our duration call to add value in the medium term. Investors could use this opportunity to top up on duration products with a structural allocation to short and medium duration funds and a tactical play on GILT funds.

HYBRID

OUTLOOK ₹ 
NOVEMBER 2023

Quick Take - Equity

- Equity market valuations are broadly reasonable adjusted for the cyclical low in earnings and potential for revival going forward.
- We remain bullish on equities from a medium to long term perspective.
- Investors are suggested to have their asset allocation plan based on one's risk appetite and future goals in life.

Quick Take - Fixed Income

- Broadly interest rate cycles have peaked both in India and globally.
- Investors should add duration with every rise in yields.
- Mix of 10-year duration and 2-4-year duration assets are best strategies to invest in the current macro environment.
- Credits continue to remain attractive from a risk reward perspective give the improving macro fundamentals.

KEY HIGHLIGHTS

Globally two events dominated headlines through most of the month - rising US Treasury yields and the geopolitical conflict between Israel and Hamas. These led equities across the globe and in India to buckle under pressure as investors shifted to less riskier assets. The S&P BSE Sensex fell 3% while the NIFTY 50 ended 2.8% down. NIFTY Midcap 100 & NIFTY Smallcap 100 too declined by 4.1% and 0.8% respectively. For the first time in many months, the large caps outperformed midcaps but underperformed smallcaps. Market breadth weakened with the advance/decline ratio down in October while volatility was higher compared to the previous month. Indian government bond yields rose higher over the month, trading in a wider band of 7.23-7.40%.

Key Market Events

US Treasury yields rise over the month, growth defies slowdown fears: The yields on the 10-year US Treasury briefly touched 5% before falling to 4.85-4.95% levels. Fiscal deficit in the US rose to ~\$1.7 trn for the year ended September 2023 and this could likely keep yields elevated. The US economy resisted fears of an impending slowdown and posted stronger than expected growth. The country's GDP expanded 4.5% in Q3FY24 vs 2.1% in the previous quarter due to a tight jobs market and higher consumer spending. In a widely expected move, the Fed held the federal funds rate unchanged for the second consecutive month in a target range between 5.25%-5.5%. The Fed

chairman Jerome Powell said that the process of bringing down inflation to 2% has a long way to go and they will remain data dependent. However, we believe tighter financial conditions and higher treasury yields have resulted into an indirect rate hike.

Inflationary pressures dissipate while oil prices also fall: Headline inflation further moderated to 5.02% as against 6.8% seen in August following a broad based decline in vegetable prices. Core inflation, too retreated to 4.6% vs 4.8% in August. While inflation is within the central bank's band of 2-6%, the governor has emphasized that they are targeting the 4% midpoint thereby signaling no change to their stance on the monetary policy. However, the below average monsoon could keep prices elevated, particularly for cereals and pulses. Surprisingly, crude oil prices fell to below \$90 even amid increasing fears of the conflict in West Asia intensifying further.

Central banks remain on a pause: Central banks of the large developed economies are now on a pause mode. This includes the key ones, the US, Europe and the UK. "Higher for longer" theme prevails across economies. The focus has moved from how high interest rates can go up to how long will interest rates stay elevated. The RBI in its monetary policy meeting in early October held interest rates unchanged but surprised the markets with unexpected Open Market Operations (OMOs). The minutes of the meeting released later in the month outline

KEY HIGHLIGHTS

the MPC's unanimous views on the transient spike in headline inflation, along with moderating core inflation, keeping policy rates steady and anchoring of inflationary expectations. On the growth front, all members were concurrent on the resilient trend in growth, driven by broad-based strength in domestic demand, notwithstanding weak global growth and uncertain macro environment.

Market View

Equity Markets

The ongoing earnings season has been in line with market expectations; however, few bellwether companies in the IT segment did disappoint. Many banks and financial companies reported margin pressure due to lagged impact of repricing of the deposit book. Of the hits and misses, most beats were concentrated in Utilities, NBFC, Energy and Autos, while misses were Consumer Durables. Discretionary consumption volume growth across sectors remains low, pinning hopes on the festive season. B2B sectors/segments of companies reported strong volume growth due to higher government capex and lower commodity prices on annual basis, while volume growth in the exports segment took a hit.

We have always suggested to our investors to stay invested in the markets and use the bouts of volatility as opportunities to increase exposure to the markets. Patience is the biggest reward to long-term investors. Five states witness elections in November with the outcome in early December and this could provide fresh triggers to the market. Overall, India's growth story remains one of resilience compared to its regional peers and this will limit the downside despite a cyclical slowdown.

Demand growth for cement and construction materials has been the highest in many years. With corporate balance sheets deleveraging, and a large part of operating cash flows in the last few years used to bring down debt; the debt-to-equity and debt-to-EBITDA ratios for major corporates are both near cyclical lows. Leverage among the lenders has also come down, partly due to fund-raising and partly due to several years of low credit growth, where surpluses have accumulated on balance sheets. These should offset the several headwinds faced by the economy. Even if the central bank keeps the repo rate unchanged going forward, financial conditions can continue to tighten as older loans roll over. The global economic slowdown has already brought down growth in goods and services; a likely US recession next year can intensify pressure in some of the export-driven sectors.

Debt Markets

US Treasury yields briefly breached the 5% mark before retreating to 4.93% at end of October and 4.75% post the policy announcement. We expect the yields to trade in a higher range. Concurrent to our view, the Fed held interest rates unchanged and we believe that the top has already been reached. The US economy did exhibit strong growth contrary to market expectations, and the macro data also has been robust – a strong payrolls report, and rising retail sales. However, we still hold our view that growth has probably peaked and slowdown could become more apparent in the coming quarters. Our view is based on two reasons – slowdown in China that will have repercussions globally and “higher for longer rates” in the developed economies. Central banks will remain on hold until inflation sustains at lower levels and based on the strength of the economy. The struggle in US is becoming increasingly apparent through rising credit card defaults, higher number of corporate bankruptcy filings and the higher fiscal deficit. Likewise, the central banks too have reached a peak of their rate cycle and we expect growth to be subdued in these economies as well. Policy makers in China are trying to boost the economy with modest support for the property sector, infrastructure spending and consumption. However we believe these would have a limited impact in turning around the economy.

In India, headline inflation declined and is within RBI's comfort zone. While the central bank expects it to fall further, the effects of imported inflation (crude oil prices) and a deficit monsoon could set the momentum. Briefly, we could again see rising vegetable prices resulting into higher price pressures but we do not expect these to be a grave concern. We believe that the RBI will remain on a pause mode till the first half of 2024 and will make use of liquidity management tools to navigate any uncertainties emanating globally. The likely inclusion of government bonds in Bloomberg indices could further boost inflows. Most part of the fixed income curve is pricing in no cuts for the next one year. We reiterate that interest rates have peaked globally and in India. With policy rates remaining incrementally stable, we have added duration gradually across our portfolios within the respective scheme mandates. We do expect the 10-year bond yields to touch 6.75% by April - June 2024.

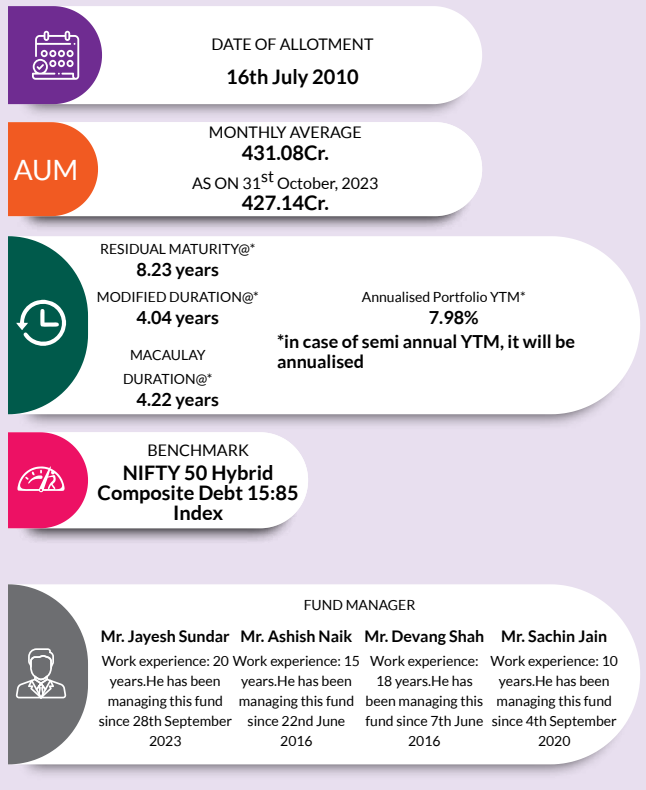

From a strategy perspective, we have added duration across portfolios within the respective investment mandates. We expect our duration call to add value in the medium term. Investors could use this opportunity to top up on duration products with a structural allocation to short and medium duration funds and a tactical play on GILT funds.

AXIS RETIREMENT SAVINGS FUND - DYNAMIC PLAN

(An open-ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier))

FACTSHEET
October 2023

INVESTMENT OBJECTIVE: The investment objective of the Investment Plan(s) under the Scheme is to provide long-term capital appreciation / income by investing in a mix of equity, debt and other instruments to help investors meet their retirement goals. However, there can be no assurance that the investment objective of the Scheme will be achieved. The Investment Plan has a dual objective of generating capital appreciation by investing in equity and equity related securities as well as generating income by investing in debt and money market securities, while attempting to manage risk from the market through active asset allocation. The Investment Plan may also invest in units of Gold ETF or units of REITs & InvITs for income generation / wealth creation.

Since the fund has not completed 1-year annualized tracking error is taken from the launch date of the scheme. The tracking error may look optically elevated on account of deployment during the first few days of the scheme. This effect is transitional in nature and normalizes as the fund completes 1 year since fund launch.
